

Cloudflare Radar 2024 Year in Review

Global internet performance, adoption, disruptions, and security insights

- 17% global traffic growth YoY
- 3.3x Starlink traffic surge
- 225 major internet disruptions
- 6.5% of traffic mitigated as threats

17% Global Traffic Growth and Starlink's 3.3x Surge

Year-over-year traffic expansion and satellite connectivity acceleration

Google Leads Top 10 Services as Generative AI Rises

DNS-based popularity ranking and major platform momentum shifts

Rank	Service
#1	Google
#2	Facebook
#3	Apple
#4	TikTok
#5	AWS
#6	Microsoft
#7	Instagram
#8	YouTube
#9	Amazon
#10	WhatsApp

- Generative AI continued rapid growth in 2024.
- Metaverse interest receded from peak visibility.
- Google held #1 for second consecutive year.

Post-Quantum Encryption Jumps from 2% to 13% of TLS 1.3

Protocol and cryptography shifts reshape network performance and security posture

Post-Quantum TLS 1.3: 2% → 13%

HTTP/3 Adoption: 21%

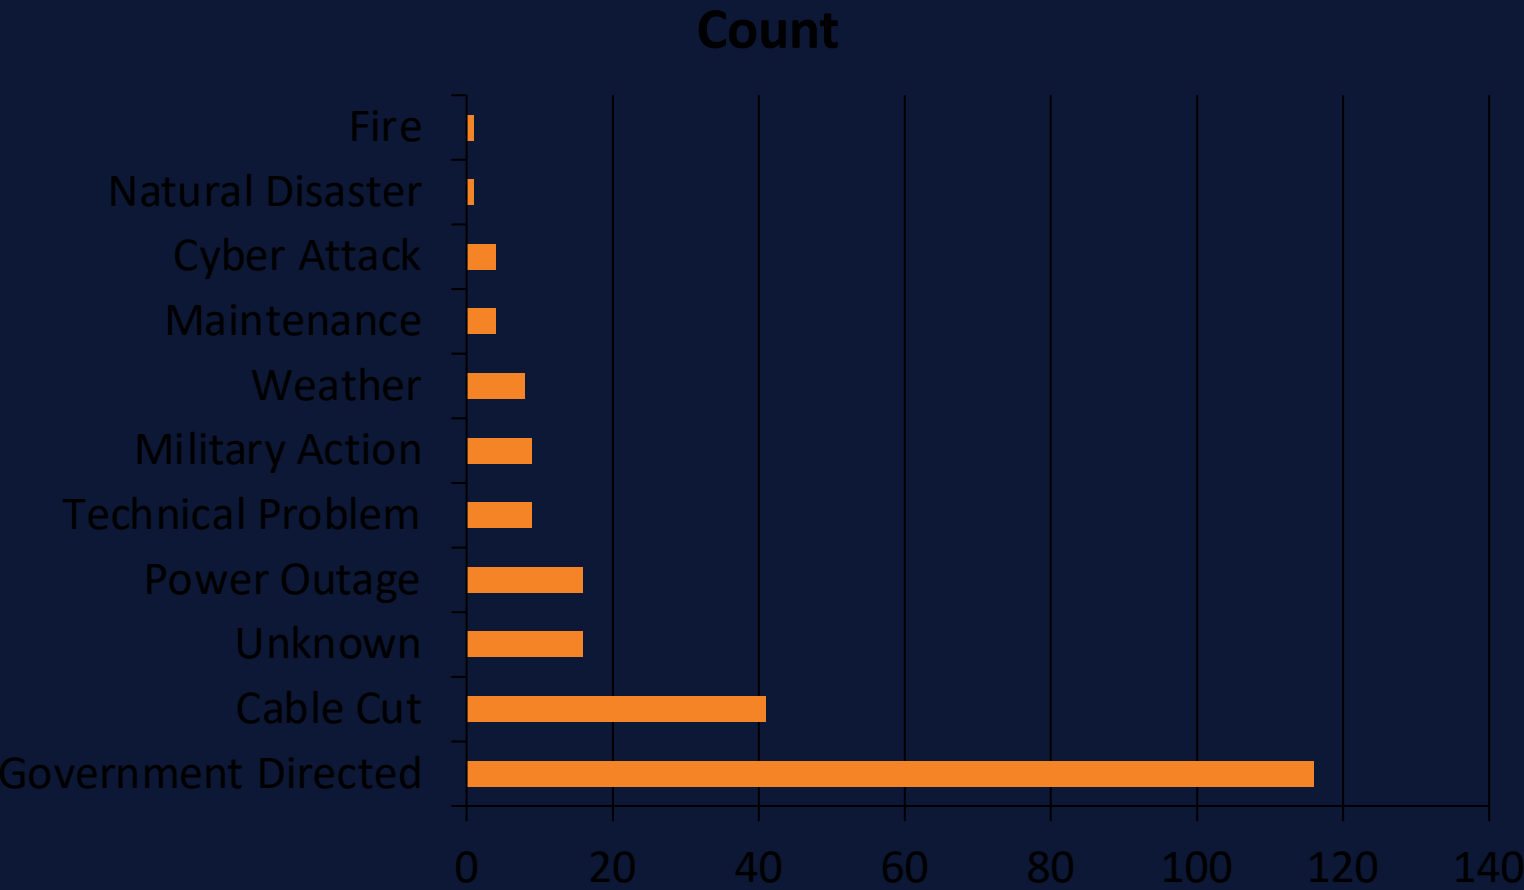

Top API Client Language: Go (~12%)

Search Referral Share: Google 89%

Mobile Device Traffic: 41%

225 Major Disruptions: Government Shutdowns Lead Outage Causes

225 major disruptions in 2024, with shutdowns as the dominant driver

6.5% of Traffic Mitigated: Persistent Threats and Bot Concentration

Threat volume, persistent vulnerabilities, and email attack patterns

- 6.5% of all processed traffic was mitigated by Cloudflare security systems.
- Most attacked sector: Gambling and Games.
- Log4j (CVE-2021-44228) remained actively targeted in 2024.
- 4.3% of processed emails were malicious; 43% contained deceptive links.
- Top-level domain .bar generated the largest share of malicious/spam email.
- 68% of global bot traffic originated from the top 10 countries.

Five Takeaways Shaping the 2025 Internet Outlook

Five implications for 2025 strategy and investment priorities

1. Scale for sustained traffic growth: 17% YoY baseline and rising edge demand.
2. Prioritize alternative access ecosystems as satellite traffic scales (Starlink 3.3x).
3. Accelerate cryptographic readiness as post-quantum adoption moves mainstream.
4. Harden resilience planning around shutdowns, cable cuts, and power-linked outages.
5. Align security budgets to persistent attacks, bot concentration, and email deception.
