

Cloudflare Radar 2024 Year in Review

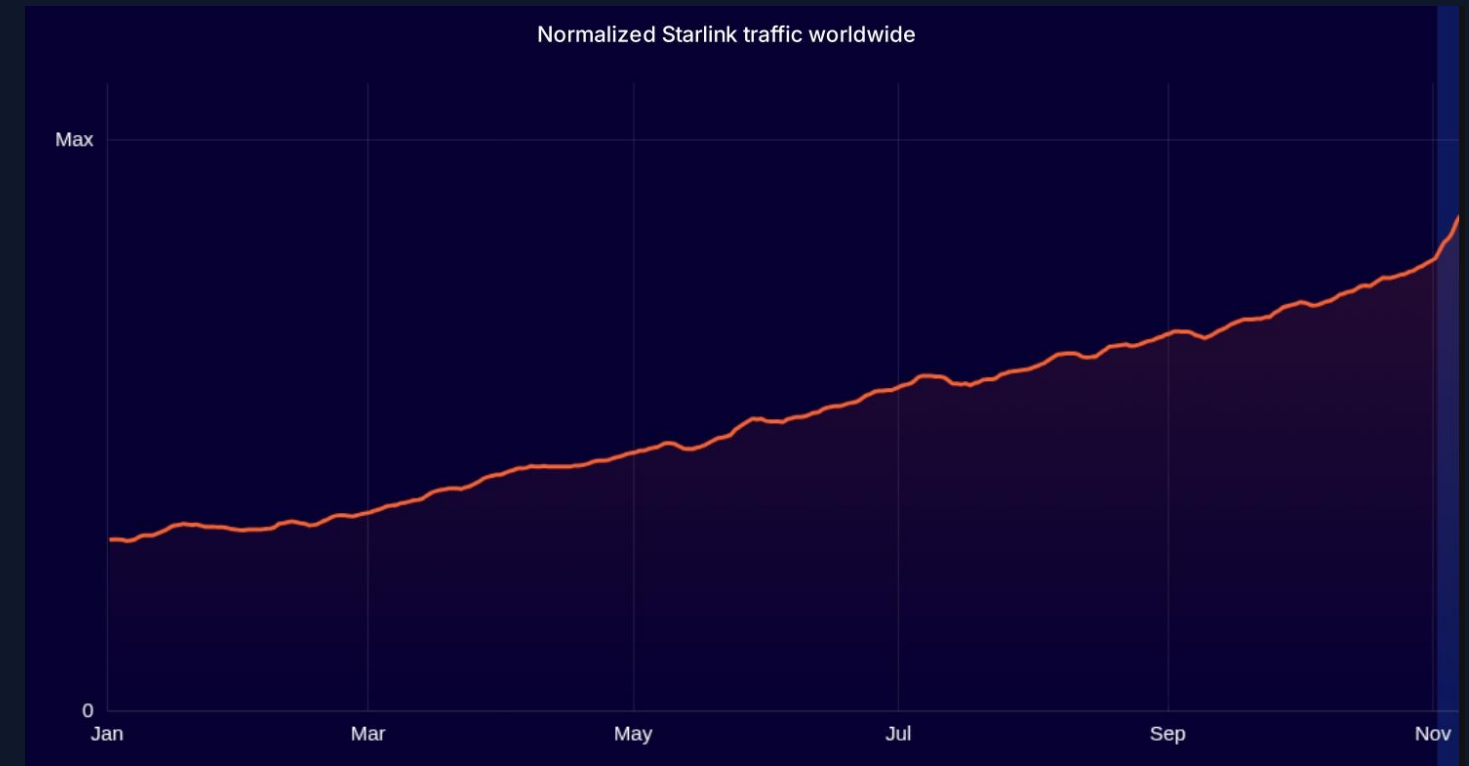

Internet patterns and trends observed through
Cloudflare's global network during 2024.

17% Global Traffic Growth and Starlink's 3.3x Surge

Global Internet traffic grew by 17% in 2024.

Driven by increasing reliance on the Internet for communication, commerce, entertainment, and transportation.

SpaceX Starlink traffic saw dramatic 3.3x growth during 2024, continuing to bring satellite Internet connectivity to previously underserved locations.

Google Leads Top 10 Services as Generative AI Rises

Google maintained its position as the most popular Internet service overall, topping the rankings for the second consecutive year. Google

Rank	Service
#1	Google
#2	Facebook
#3	Apple
#4	TikTok
#5	AWS
#6	Microsoft
#7	Instagram
#8	YouTube
#9	Amazon
#10	WhatsApp

#10	WhatsApp

Post-Quantum Encryption Jumps from 2% to 13% of TLS 1.3

Post-Quantum Encryption

Adoption jumped from 2% to 13% following Google Chrome 124 enabling post-quantum key agreement by default.

HTTP/3

21% of traffic uses HTTP/3, the most recent version of the protocol that runs on top of QUIC.

API Client Languages

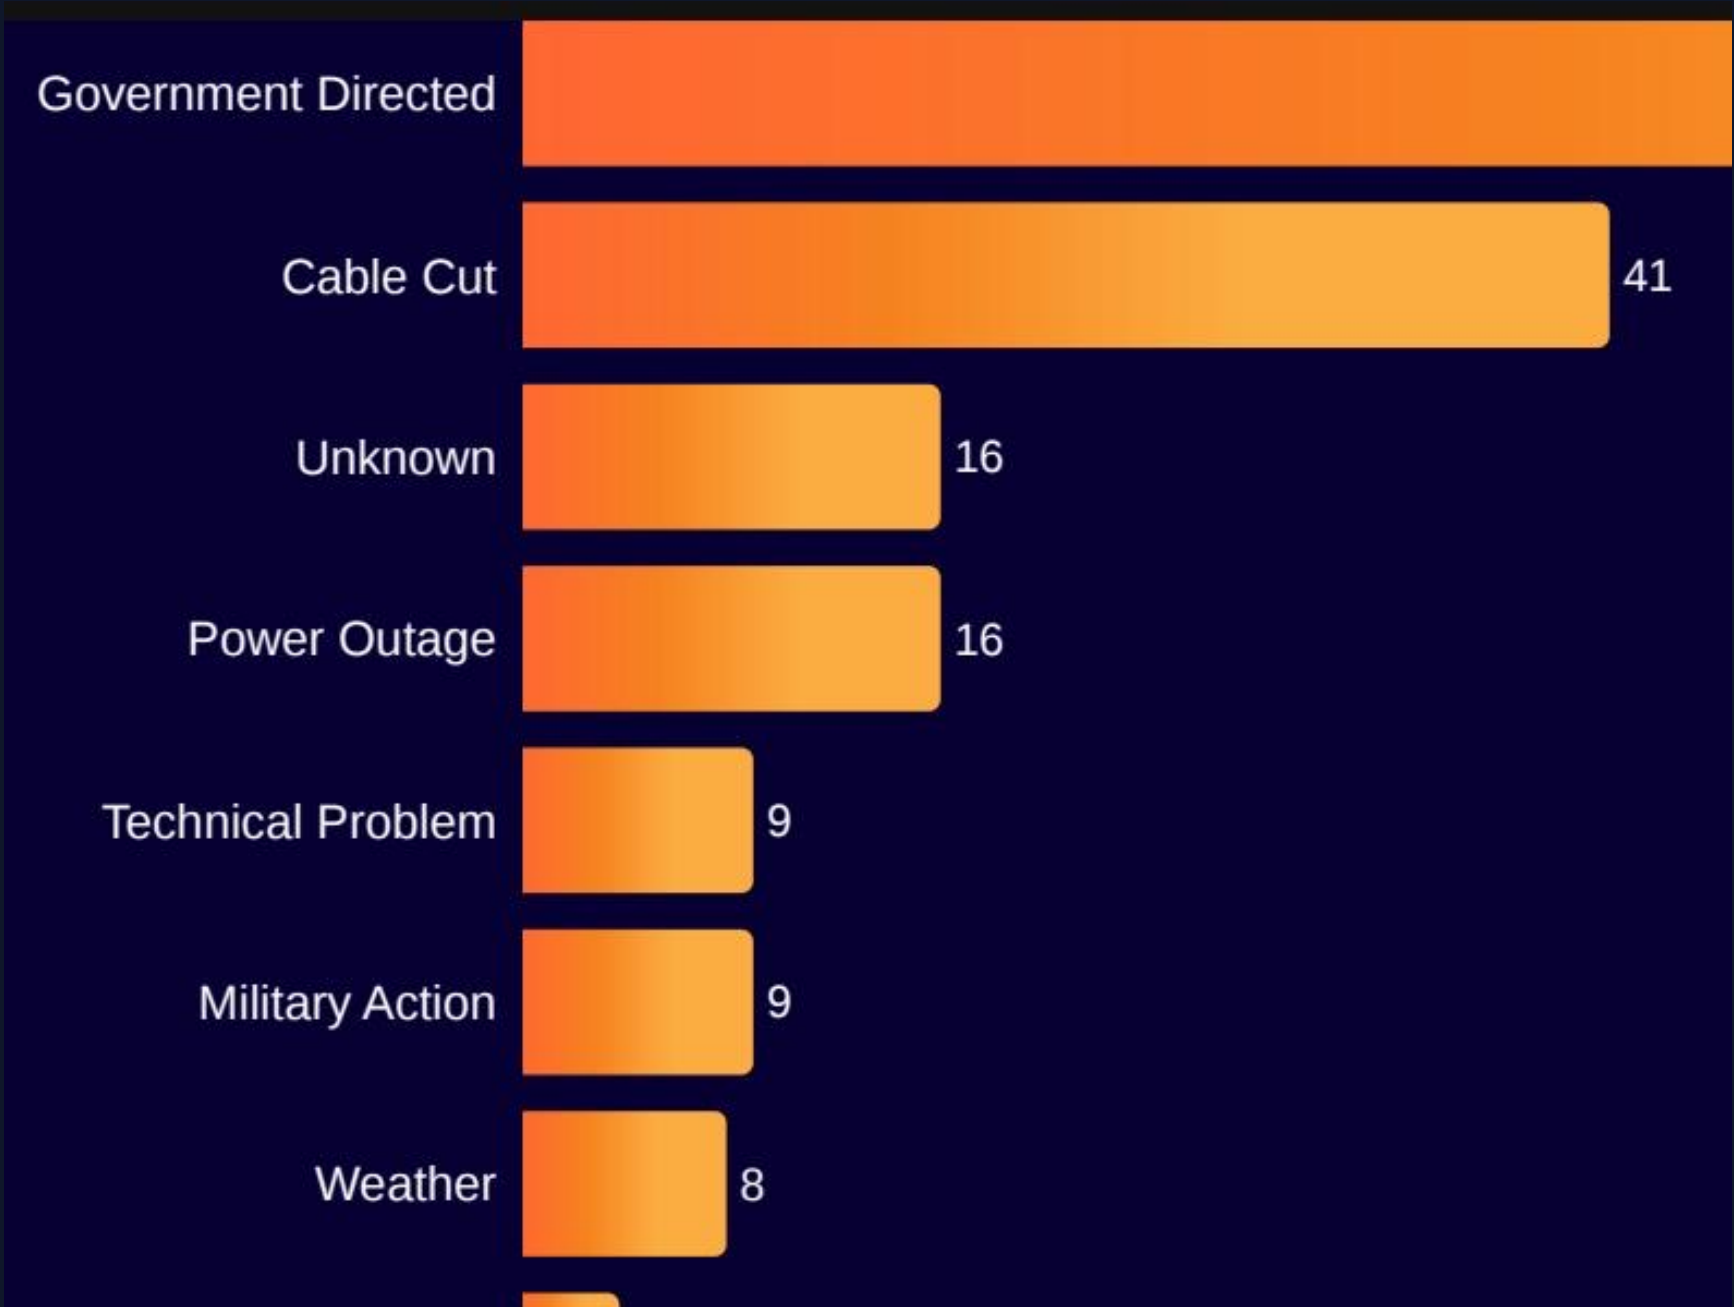

Go is the most popular API client language with approx. 12% of automated API requests.

225 Major Disruptions: Government Shutdowns Lead Outage Causes

Cloudflare observed 225 major Internet disruptions globally in 2024. Government-directed shutdowns were the leading cause.

Cause	Count
Government Directed	116+
Cable Cut	41
Unknown	16
Power Outage	16
Technical Problem	9
Military Action	9
Weather	8
Maintenance	4
Cyber Attack	4
Natural Disaster	1
Fire	1

6.5% of Traffic Mitigated: Persistent Threats and Bot Concentration

Traffic Mitigation:

Cloudflare mitigated 6.5% of all traffic processed, indicating the scale of ongoing threats.

Targeted Sectors & Bots:

The Gambling and Games sector was the most attacked industry category. 68% of global bot traffic originated from just the top 10 countries.

Persistent Vulnerabilities:

The Log4j vulnerability continues to be actively targeted more than two years later.

Email Security:

4.3% of processed emails were malicious. 43% of these contained deceptive links.

Five Takeaways Shaping the 2025 Internet Outlook

1. Global Internet traffic grew 17% year-over-year, with Starlink traffic surging 3.3x as satellite connectivity expanded to underserved regions.
2. Post-quantum encryption adoption leapt from approximately 2% to 13% of TLS 1.3 traffic following Chrome 124's default enablement in April 2024.
3. Government-directed shutdowns remained the leading cause of the 225 major Internet disruptions observed, followed by cable cuts (41 incidents) and power outages (16).
4. Security threats remained pervasive: 6.5% of all traffic was mitigated, Gambling/Games was the most targeted sector, and Log4j exploitation persists years after disclosure.
5. Go surpassed other languages to become the most popular API client language, capturing roughly 12% of automated API traffic.
