Source: Google Cloud customer use case brief (updated October 2025)

Representative production deployments across Customer, Employee, Code, and Data agent patterns.

Agent Type	Company / Program	Outcome / Application
Customer Agent	Mercedes-Benz	Conversational MBUX assistant
Customer Agent	Volkswagen (myVW app)	In-app customer assistant experience
Customer Agent	LUXGEN	Customer chatbot reducing workload by 30%
Employee Agent	Toyota	Reduced 10,000+ man-hours annually
Code Agent	Renault Ampere	Uses Gemini Code Assist for software development
Data Agent	UPS Capital	ML-based delivery scoring and risk insights

Quantified Impact: 500% ROI, 30% Workload Reduction, 10,000 Hours Saved

Measured Outcomes

Documented production results across marketplace, automotive, and marketing operations use cases.

500%

anticipated ROI

Mercari

30%

PODS across 299 NYC neighborhoods

Additional reported outcome: Mercari also cites a 20% employee workload reduction.

Common Patterns: Customer Assistants, Employee Productivity, and Creative Scale

Synthesis

1) Conversational Customer Agents

- Mercedes-Benz MBUX assistant
- GM OnStar conversational experience
- Volkswagen myVW assistant
- LUXGEN chatbot (30% workload reduction)

2) Employee Productivity Agents

- Uber uses Gemini for Workspace
- Rivian accelerates internal research
- Geotab drafts and reviews cross-functional content
- Pattern spans HR, legal, engineering, and operations

3) Creative & Scale Agents

- Virgin Voyages: hyper-personalized video ads (Veo)
- Figma: instant brand-approved asset generation
- PODS: adaptive billboard campaign at city scale
- Signals shift to multimodal creative production

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

1

Gen AI is production-ready across major industries, not confined to pilots.

2

Customer and employee agents are the most common entry points for scaled adoption.

3

Measurable outcomes can appear quickly: ROI, workload reduction, and labor-hour savings.

4

Creative and code agents are emerging rapidly as second-wave differentiators.

5

Adoption velocity is increasing; early movers build compounding capability advantages.

Strategic implication: organize initiatives by industry context and agent type to prioritize highest-value deployment pathways.
