Automotive & Logistics: Cockpit to Curbside

AGENT	COMPANY	USE CASE	OUTCOME
CUSTOMER	Mercedes-Benz	MBUX Virtual Assistant powered by Gemini via Vertex AI — natural driver conversations for navigation & POI	Natural language in-car assistant
CUSTOMER	LUXGEN (Taiwan EV)	AI agent on LINE answers customer questions via Vertex AI	30% CS workload reduction
CUSTOMER	Volkswagen of America	myVW app: drivers query owner's manuals; multimodal camera reads dashboard indicators	Gemini multimodal capabilities

Production ROI — Not Pilots

MERCARI

500%

Anticipated ROI

Japan's largest online marketplace deploys AI-powered customer service; also reduces employee workload by 20%.

IN PRODUCTION

TOYOTA

10K+

Man-hours saved per year

Factory AI platform on Google Cloud enables workers to build and deploy ML models without specialist expertise.

IN PRODUCTION

LUXGEN

30%

Customer service workload reduction

Taiwan EV brand deploys Vertex AI chatbot on LINE to answer customer questions and reduce human CS workload.

IN PRODUCTION

Three Dominant Patterns

PATTERN 1

Conversational Customer Agents

The most visible entry point — virtual assistants reduce wait times, handle queries at scale, and lower human workloads.

Mercedes-Benz	— MBUX Gemini in-car assistant
GM OnStar	— Intent recognition for roadside calls
Volkswagen	— myVW multimodal owner’s manual
LUXGEN	— 30% CS workload reduction
Mercari	— 500% anticipated ROI

PATTERN 2

Employee Productivity Agents

The broadest category — Gemini for Workspace accelerates research, drafting, legal review, and cross-functional data work.

Uber	— CS communication summaries and context
Rivian	— Gemini Workspace for onboarding and research
Geotab	— Research across 4.7M connected vehicles
Toyota	— 10,000+ man-hours/year saved in factory

PATTERN 3 — FASTEST GROWING

Creative & Scale Agents

Gen AI moves from text to multimodal creative production — hyper-personalized campaigns and brand-approved assets at enterprise scale.

Virgin Voyages	— Thousands of personalized video ads via Veo
PODS / Tombras	— 6,000+ adaptive billboard headlines
Figma	— Brand-approved image generation in seconds

Where to Start & What to Expect

1

Gen AI is production-ready across all major industries

With 1,001 documented use cases spanning 11 verticals, the technology is no longer experimental — leading organizations are operating at scale.

2

Customer and employee agents are the fastest, lowest-risk entry points

Conversational assistants and Gemini for Workspace tools are the most common first deployments — proven ROI, fast time-to-value, low implementation risk.

3

Measurable ROI is achievable within months

500% ROI (Mercari), 30% workload reduction (LUXGEN), 10,000+ hours saved/year (Toyota) — outcomes reported are from live production, not POCs.
