Strategic Takeaways for Enterprise Leaders

Where to start and what to expect from enterprise gen AI

01

Gen AI is production-ready across all 11 major industries

1,001 documented deployments across Automotive, Financial Services, Healthcare, Retail, Technology, and more — this is no longer an emerging technology. It's operational.

02

Customer and Employee agents are the most common entry points

Conversational customer assistants and workplace productivity tools (Gemini for Workspace) dominate early deployments. Both deliver fast time-to-value with low implementation risk.

03

Measurable ROI is achievable within months

500% anticipated ROI (Mercari), 30% workload reduction (LUXGEN), 10,000+ man-hours saved/year (Toyota). Quantified production outcomes — not pilot projections.

04

Creative and Code agents are fast-emerging opportunities

Virgin Voyages, PODS, and Figma show gen AI moving into multimodal creative production at scale. Renault Ampere's Gemini Code Assist points to developer productivity at enterprise scale.

05

Early movers gain compounding advantages — the pace is accelerating

400 new use cases added in the October 2025 update alone. With 10× growth in 18 months and no signs of plateau, delayed adoption means ceding competitive ground to peers already in production.
