Common Patterns: Customer Assistants, Employee Productivity, and Creative Scale

Synthesis of themes observed across the 1,001 reported deployments

1) Conversational customer agents

- Automotive: Mercedes-Benz, General Motors (OnStar), Volkswagen of America, LUXGEN
- Financial services: Commerzbank
- Retail: Mercari

2) Employee productivity agents

- Uber: summarize customer service communications + surface interaction context
- Rivian + Geotab: Gemini for Google Workspace for research, summarization, and analysis
- NotebookLM: verified sources + interactive Q&A for internal FAQs (Rivian)

3) Creative scale

- Virgin: creates personalized person
- PODS: headlines in 29 h
- Figma: assets i

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

Action-oriented guidance grounded in reported deployments

1) Treat gen AI as production-ready

The 1,001 examples span 11 industries and include measured outcomes (e.g., ROI, workload reduction, hours saved).

2) Start with customer + employee agents

Conversational customer agents and workplace productivity agents are the most common deployment patterns across industries.

3) Use a taxonomy to prioritize

Map opportunities by industry × agent type (Customer, Employee, Creative, Code, Data, Security) to compare value vs. cost.

4) Focus on measurable ROI and business outcomes
