

1,001 Real-World Gen AI Use Cases

from Google Cloud Customers

11 Industries · 6 Agent Types · 1,001 Production Deployments

Original research published at Cloud Next '24 (April 2024) with 101 entries.

This edition reflects 10× growth — now 1,001 use cases — updated October 2025.

From 101 to 1,001: Gen AI Adoption Grew 10× in 18 Months

The 1,001 use cases span top global companies, governments, researchers, and startups across all major industries.

11 Industries × 6 Agent Types: A Taxonomy of Enterprise Gen AI

Industry Vertical	Customer	Employee	Creative	Code	Data	Security
Automotive & Logistics						
Financial Services						
Healthcare & Life Sciences						
Retail & E-Commerce						
Manufacturing & Industrial						
Media, Marketing & Gaming						
Hospitality & Travel						
Business & Professional Svcs						
Public Sector & Nonprofits						
Technology						
Telecommunications						

Customer Agent

Employee Agent

Creative Agent

Code Agent

Data Agent

Security Agent

Automotive & Logistics: AI Agents From Cockpit to Curbside

Agent Type	Organization	Use Case Summary	Key Metric / Detail
Customer	Mercedes-Benz	MBUX Virtual Assistant — Gemini via Vertex AI, natural in-car navigation & POI	Natural language driver assistant
Customer	LUXGEN (Taiwan EV)	AI agent on LINE messaging platform via Vertex AI answers customer questions	30% human CS workload reduction
Customer	General Motors	OnStar virtual assistant with Google Cloud AI — recognizes speaker intent	Improved intent recognition
Customer	Volkswagen	myVW app — Gemini multimodal; driver's manual query & camera-based dashboard alerts	Gemini multimodal capabilities
Customer	UPS Capital	DeliveryDefense Address Confidence — ML scoring of delivery success likelihood	Data-driven delivery confidence
Customer	PODS / Tombras	"World's Smartest Billboard" — adaptive ads on trucks using Gemini per neighborhood	6,000+ unique headlines · 299 neighborhoods · 29 hrs
Employee	Toyota	AI platform on Google Cloud enables factory workers to build and deploy ML models	10,000+ man-hours/year saved
Employee	Uber	AI agents summarize customer-service communications, surface prior interaction context	Improved CS rep effectiveness
Employee	Rivian	Gemini in Google Workspace — instant research, accelerated onboarding, FAQ chat	Faster onboarding & deep research
Employee	Geotab	Gemini for Workspace — research, summarization, legal review across 4.7M vehicles	Cross-functional productivity
Employee	Routematic	Full infrastructure migration to Google Cloud (Compute Engine, GKE) in 8 months	Release cycles: weeks → days

Quantified Impact: ROI, Workload Reduction & Hours Saved

Production results — not pilots.

Virgin Voyages also uses Veo text-to-video to generate thousands of hyper-personalized ads and emails in a single batch — without sacrificing brand voice. Figma enables brand-approved asset generation in seconds.

Common Patterns: Customer Assistants, Employee Productivity & Creative Scale

01

Conversational Customer Agents

Most visible enterprise entry point

- Mercedes-Benz MBUX — natural language in-car assistant
- GM OnStar — AI intent recognition for drivers
- Volkswagen myVW — Gemini multimodal car assistant
- LUXGEN — 30% CS workload reduction via LINE chatbot
- Commerzbank — AI-powered customer service access
- Mercari — 500% ROI, 20% workload reduction

02

Employee Productivity Agents

Broadest deployment category across industries

- Uber — AI summaries of CS communications
- Rivian — Gemini for Workspace research & onboarding
- Geotab — Legal review & data filtering across 4.7M vehicles
- Toyota — Factory AI platform, 10,000+ man-hours saved
- Oxa — Gemini for cross-functional document workflows

03

Creative & Scale Agents

Fastest-growing frontier — multimodal production

- Virgin Voyages — Thousands of hyper-personalized video ads via Veo
- PODS / Tombras — 6,000+ adaptive billboard headlines in 29 hrs
- Figma — Brand-approved asset generation in seconds
- Renault Ampere — Gemini Code Assist for EV software development

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

1

Production-ready across all major industries

The 1,001 use cases prove gen AI has moved well beyond proof-of-concept. All 11 industry verticals — Automotive, Financial Services, Healthcare, Retail, Manufacturing, Media, Hospitality, Business Services, Public Sector, Technology, and Telecom — now have validated production deployments.

2

Customer and Employee agents are the most common entry points

Conversational assistants and workplace productivity tools account for the majority of enterprise deployments. They offer the clearest ROI narratives and the fastest time-to-value, making them ideal starting points for organizations beginning their gen AI journey.

3

Measurable ROI is achievable within months

Organizations report 500% ROI (Mercari), 30% workload reduction (LUXGEN), and 10,000+ man-hours saved annually (Toyota) — all from production systems, not pilots. These numbers make the business case for gen AI investment concrete and defensible.

4

Creative and Code agents are the fastest-growing frontier

Multimodal gen AI — text-to-video, adaptive billboards, brand-approved asset generation — is moving from novelty to enterprise necessity. Code agents are accelerating developer productivity across Automotive, Technology, and Industrial sectors.

5

Early movers gain compounding advantages

With 400 new entries added in the latest update alone, the pace of adoption is accelerating. Organizations that establish gen AI capabilities now will build institutional knowledge, integrations, and governance frameworks that create durable competitive moats.
