

1,001 Real-World Gen AI Use Cases from Google Cloud Customers

A data-forward executive briefing on adoption patterns, agent taxonomy, and quantified outcomes across industries.

1,001

use cases

11

industries

6

agent types

Updated October 2025 • Expanded 10× from the original 101 entries published at Cloud Next 24

From 101 to 1,001: Gen AI Adoption Grew 10× in 18 Months

Trajectory suggests enterprise deployment remains in an early exponential phase.

11 Industries × 6 Agent Types: A Taxonomy of Enterprise Gen AI

Industry verticals	Customer	Employee	Creative	Code	Data	
Automotive & Logistics						
Business & Professional Services						
Financial Services						
Healthcare & Life Sciences						
Hospitality & Travel						
Manufacturing, Industrial & Electronics						
Media, Marketing & Gaming						
Public Sector & Nonprofits						
Retail						
Technology						
Telecommunications						

How to read it

Use industry rows to benchmark peer patterns.

Use agent columns to map reusable capabilities.

Prioritize where customer or employee agents can create near-term value.

Six agent types provide a structured way to identify and prioritize gen AI opportunities.

Automotive & Logistics: AI Agents From Cockpit to Curbside

A cross-section across Customer, Employee, Code and Data-adjacent deployments.

Customer

Employee

Code

Agent	Company	Use case	Outcome / detail
Customer	Mercedes-Benz	MBUX Virtual Assistant enables natural driver conversations for navigation and POI	Natural language in-car assistant
Customer	Volkswagen of America	myVW app assistant answers owner manual queries; camera feature for dashboard indicators	Gemini multimodal capabilities
Customer	LUXGEN	LINE AI agent answers customer questions via Vertex AI	30% CS workload reduction
Employee	Toyota	Factory workers build and deploy ML models on Google Cloud AI platform	10,000+ man-hours/year saved
Code	Renault Group (Ampere)	Enterprise Gemini Code Assist understands company code base, standards and conventions	Developer productivity for EV software
Customer	UPS Capital	DeliveryDefense Address Confidence scores delivery success likelihood	Data-driven delivery confidence

Examples shown are directly sourced from the brief; UPS Capital appears in the brief as a Customer agent with data-driven delivery confidence.

Quantified Impact: 500% ROI, 30% Workload Reduction, 10,000 Hours Saved

500% ROI

Mercari

Anticipates 500% ROI while reducing employee workloads by 20% through AI-powered customer service.

30%

LUXGEN

Reduced human customer-service workload with a Vertex AI chatbot on LINE.

10,000+

Toyota

Factory AI platform saved over 10,000 man-hours per year.

6,000+

PODS / Tombras

Unique ad headlines across 299 NYC neighborhoods in 29 hours.

Additional briefed impact signals: Virgin Voyages creates thousands of hyper-personalized ads and emails in one batch; Figma creates brand-approved assets in seconds.

Common Patterns: Customer Assistants, Employee Productivity, and ~~Creative Scale~~

1

Conversational Customer Agents

Most visible entry point

Mercedes-Benz, GM OnStar, VW and LUXGEN in automotive

Commerzbank in financial services

Mercari in retail customer service

2

Employee Productivity Agents

Broadest workplace category

Uber summarizes CS communications

Rivian and Geotab use Gemini for Workspace

Use cases span research, drafting, legal review and data filtering

3

Creative and Scale Agents

Fast-growing frontier

Virgin Voyages uses Veo for personalized video campaigns

PODS adapts billboard headlines in real time

Figma generates brand-approved images and assets in seconds

Pattern: enterprises start with repeatable workflows, then expand into multimodal creative, code and data workflows.

Where to Start and What to Expect from Enterprise Gen AI

A practical adoption sequence for technology leaders evaluating portfolio strategy.

- 01

Treat gen AI as production-ready across all major industries
The 1,001-use-case corpus spans 11 industry groups, from automotive to telecommunications.
- 02

Start with customer and employee agents
The brief identifies conversational assistants and workplace productivity as dominant deployment patterns.
- 03

Use measurable ROI to prioritize the portfolio
Production outcomes include 500% ROI, 30% workload reduction and 10,000+ man-hours saved annually.
- 04

Track creative, code and data as expansion lanes
Creative scale, Enterprise Gemini Code Assist and delivery-confidence scoring show broader operating-model reach.
- 05

Move early enough to compound learning advantages
The list grew 10× in 18 months, with 400 new entries in the latest update.
