

1,001 Real-World Gen AI Use Cases from Google Cloud Customers

Updated October 2025 | 10× growth from 101 to 1,001 in 18 months

1,001

Use Cases

11

Industries

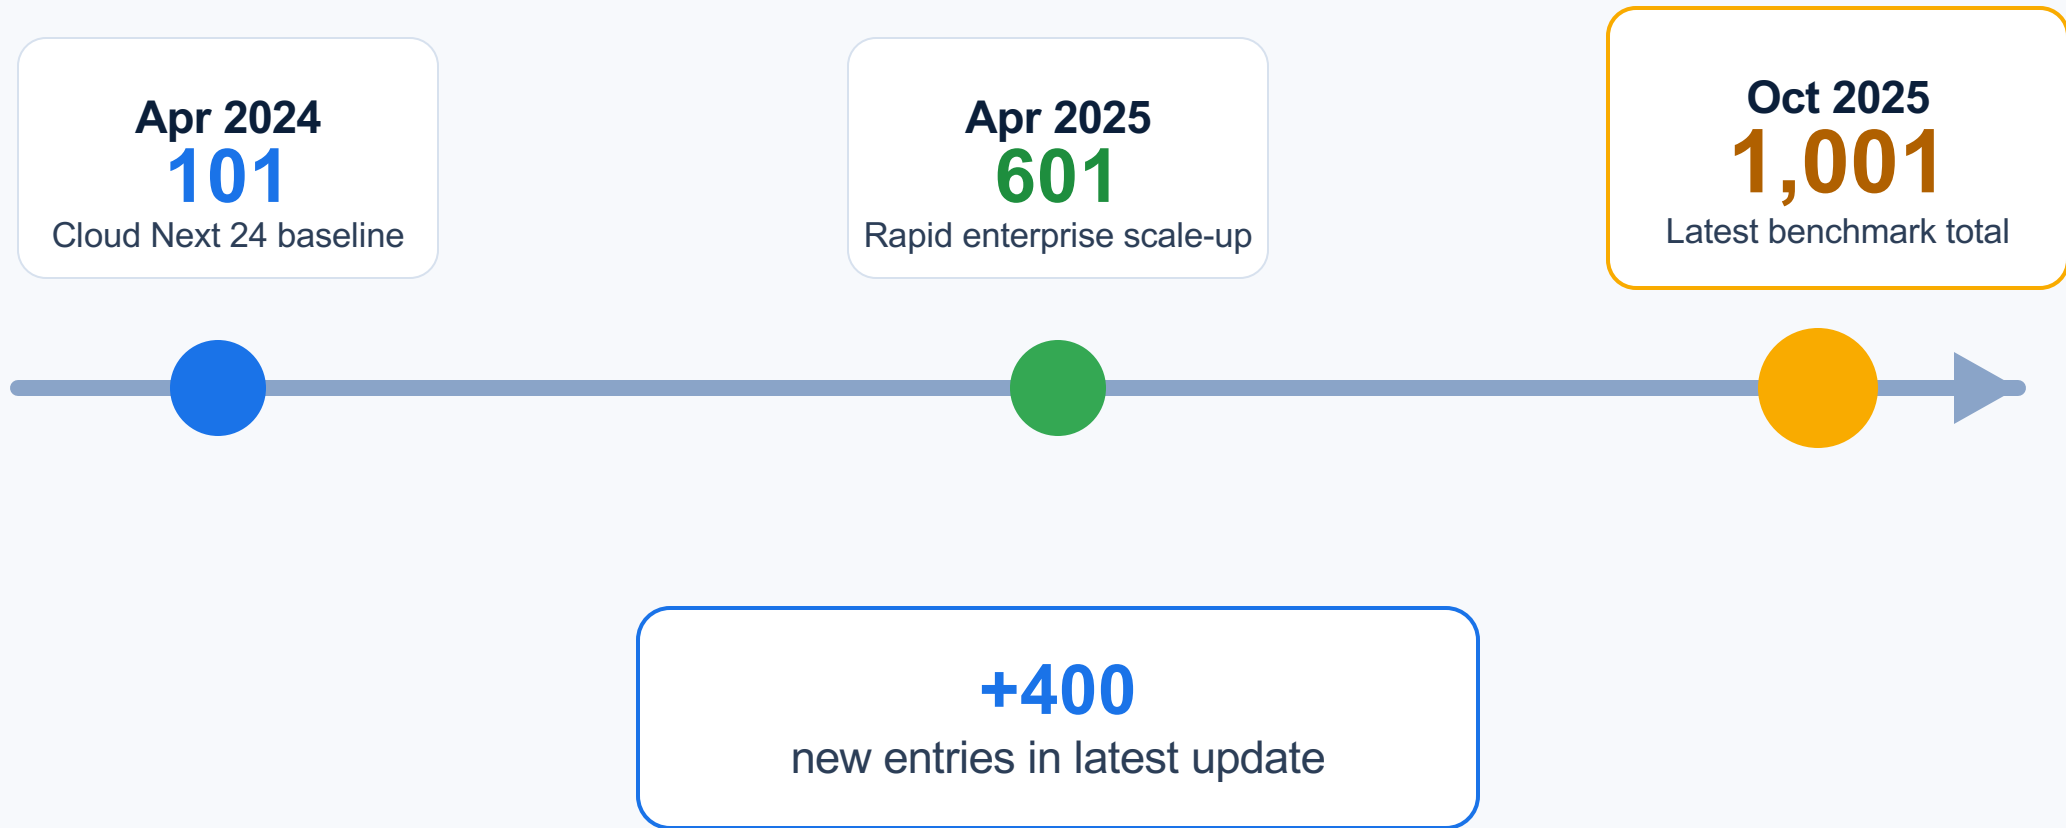

6

Agent Types

Scope of Analysis

- 1,001 customer-reported generative AI use cases
- Cross-industry benchmark across 11 sectors
- Structured by 6 agent deployment patterns

From 101 to 1,001: Gen AI Adoption Grew 10× in 18 Months

Takeaway: Enterprise gen AI deployment remains in an early exponential adoption phase.

11 Industries × 6 Agent Types: A Taxonomy of Enterprise Gen AI

Industry Vertical	Customer	Employee	Creative	Code	Data	Security
Automotive & Logistics						
Financial Services						
Healthcare						
Retail						
Telecommunications						
Energy						
Media & Entertainment						
Public Sector						
Manufacturing						
Travel & Hospitality						
Technology						

Framework view: customer, employee, and creative agents are currently most prevalent across industries.

Automotive & Logistics: AI Agents From Cockpit to Curbside

Agent Type	Company	Use Case	Outcome
Customer	Mercedes-Benz MBUX Virtual Assistant using Automotive AI Agent and Gemini on Vertex AI		Natural, contextual in-car interactions
Customer	Volkswagen of America myVW virtual assistant with Gemini models for contextual manual and app support		Improved driver support experience
Customer	LUXGEN AI voice assistant and chatbot powered by Gemini + Vertex AI Search		~30% customer service workload reduction
Employee	Toyota "O-Beya" AI assistant for engineering and operations		10,000+ man-hours saved annually
Code	Renault Group (Ampere) Gemini Code Assist for software development		Accelerated developer productivity
Data	UPS Capital ML + gen-AI delivery risk scoring and insurance ops		Better risk intelligence and decisioning

Representative examples show breadth across customer, employee, code, and data agents.

Quantified Impact: 500% ROI, 30% Workload Reduction, 10,000 Hours Saved

500%

anticipated ROI

Mercari (Retail): Gemini + BigQuery initiative
also targets 20% employee workload reduction

30%

workload reduction

LUXGEN customer service workload reduced
through Gemini-powered assistant experiences

10,000+

man-hours saved/year

Toyota "O-Beya" AI assistant supports
engineering and operations workflows

6,000+ in 29h

unique headlines generated

PODS campaign covered 299 NYC neighborhoods
with rapid adaptive creative production

Common Patterns: Customer Assistants, Employee Productivity, and Creative Scale

Customer Agents

Conversational support at scale

- Mercedes-Benz MBUX assistant
- GM OnStar with Google Cloud
- Volkswagen myVW assistant
- LUXGEN AI chatbot platform

Employee Agents

Knowledge and workflow acceleration

- Uber teams using Gemini for Workspace
- Rivian cross-functional productivity
- Geotab research and drafting support
- HR to engineering use expansion

Creative Agents

Fastest-growing multimodal frontier

- Virgin Voyages video personalization
- Figma brand-approved assets
- PODS adaptive billboard headlines
- Real-time campaign localization

Pattern synthesis: customer and employee agents dominate today; creative agents are scaling fastest.

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

1 Treat gen AI as a production platform

1,001 deployments show implementation maturity across major industries.

2 Start with customer and employee agents

These are the most common entry points and provide near-term operational value.

3 Anchor programs to measurable KPIs

Outcomes like 500% ROI, 30% workload reduction, and 10,000+ hours saved are achievable.

4 Build capabilities for creative, code, and data agents now

These categories are gaining momentum and extend value beyond conversational AI.

5 Move early to capture compounding advantage

10× growth in 18 months indicates adoption speed is accelerating, not plateauing.
