

1,001 Real-World Gen AI Use Cases from Google Cloud Customers

A strategic adoption briefing for enterprise technology leaders

1,001

use cases

11

industry groups

6

agent types

10x

growth from 101

Enterprise gen AI adoption expanded 10× in 18 months

The Google Cloud customer list grew from 101 use cases at Cloud Next ' 24 to 1,001 by the October 2025 update.

A practical taxonomy: 11 industries × 6 agent types

Use the matrix as a portfolio lens: scan each vertical for Customer, Employee, Creative, Code, Data, and Security agent opportunities.

Industry vertical	Customer	Employee	Creative	Code	Data	Security
Automotive & Logistics						
Business & Professional Services						
Financial Services						
Healthcare & Life Sciences						
Hospitality & Travel						
Manufacturing, Industrial & Electronics						
Media, Marketing & Gaming						
Public Sector & Nonprofits						
Retail						
Technology						
Telecommunications						
Framework cells indicate classification intersections, not source-provided counts.						

Automotive & Logistics shows agent breadth from cockpit to curbside

Representative use cases span driver assistants, service automation, factory productivity, developer tools, and delivery confidence.

Agent type	Company	Use case	Outcome / detail
Customer	Mercedes-Benz MBUX	Gemini via Vertex AI enables natural driver conversations for navigation and points of interest.	Natural language in-car assistant
Customer	Volkswagen of America myVW app	Virtual assistant lets drivers query owner’ s manuals; multimodal camera feature for dashboard indicators.	Gemini multimodal capabilities
Customer	LUXGEN Taiwan EV	AI agent on LINE answers customer questions via Vertex AI.	30% lower human CS workload
Customer	UPS Capital DeliveryDefense	Address Confidence uses ML to score delivery success likelihood.	Data-driven delivery confidence
Customer	PODS / Tombras Smart billboard	Truck billboards adapted to NYC neighborhoods in real time using Gemini.	6,000+ headlines 299 neighborhoods; 29 hours
Employee	Toyota Factory AI platform	Google Cloud platform lets factory workers build and deploy ML models.	10,000+ man-hours/year saved
Employee	Geotab Workspace + Gemini	Research, summarization, legal review, and data filtering across 4.7M connected vehicles.	Cross-functional productivity
Code	Renault Group Ampere	Enterprise Gemini Code Assist understands company code base, standards, and conventions.	Developer productivity for EV software

Production gen AI is already producing quantified enterprise impact

The brief cites ROI, workload reduction, time savings, and creative output metrics from deployed customer examples.

Mercari

500%

anticipated ROI

plus 20% employee workload reduction

AI-powered customer service

LUXGEN

30%

workload reduction

human customer service workload

Vertex AI chatbot on LINE

Toyota

10,000+

man-hours/year

saved by factory AI platform

Workers build and deploy ML models on Google Cloud

PODS / Tombras

6,000+

unique headlines

across 299 NYC neighborhoods

Generated in 29 hours for adaptive billboard campaign

Quantified results span customer service, operations, factory productivity, and creative production.

Three repeatable patterns cut across industries

Customer assistants and employee productivity are dominant entry points; multimodal creative scaling is an emerging frontier.

Conversational customer agents

Visible first deployments

- Mercedes-Benz, GM OnStar, VW, and LUXGEN in automotive
- Commerzbank in financial services
- Mercari in retail

Pattern: handle queries, reduce waits, lower support workload

Employee productivity agents

Broadest operating category

- Uber summarizes customer service communications and context
- Rivian accelerates research, learning, and FAQ answers
- Geotab supports research, legal review, and data filtering

Pattern: augment daily knowledge work

Creative at scale

Multimodal frontier

- Virgin Voyages uses Veo for hyper-personalized video ads
- Figma enables brand-approved image and asset generation
- PODS adapts billboards in real time

Pattern: scale personalized content

Where enterprise leaders should start — and what to expect

Strategic takeaways from the 1,001-use-case corpus

1

Treat gen AI as production-ready across major industries

The brief documents 1,001 real-world use cases across 11 industry groups.

2

Start with customer and employee agents

The source identifies conversational assistants and workplace productivity tools as the most common deployment patterns.

3

Build measurement into deployment from day one

Reported outcomes include 500% ROI, 30% workload reduction, and 10,000+ man-hours saved annually.

4

Expand into creative and code agents as capabilities mature

The brief highlights multimodal creative scale and developer productivity as fast-emerging enterprise patterns.

5

Move before the adoption curve compounds

The source frames the jump from 101 to 1,001 use cases — with 400 recent additions — as early exponential growth.

Portfolio lens: prioritize by industry context, agent type, measurable outcome, and speed to production.
