Automotive & Logistics: AI Agents From Cockpit to Curbside

Representative use cases across Customer, Employee, and Code agents

Agent Type	Organization	Use Case Summary	Key Outcome
Customer	Mercedes-Benz	MBUX Virtual Assistant (Gemini/Vertex AI) — natural language navigation & POI	Natural language in-car assistant
Customer	LUXGEN (Taiwan EV)	AI agent on LINE messenger answers customer questions via Vertex AI	CS workload reduced by 30%
Customer	General Motors (OnStar)	Virtual assistant recognises speaker intent via Google Cloud conversational AI	Improved intent recognition
Customer	Volkswagen of America	myVW app: drivers query owner's manuals; multimodal camera for dashboard alerts	Gemini multimodal capabilities
Customer	PODS / Tombras	"World's Smartest Billboard" on trucks adapts to NYC neighbourhoods in real time	6,000+ unique headlines, 29 hours
Employee	Toyota	Factory AI platform lets workers build & deploy ML models on Google Cloud	10,000+ man-hours/year saved
Employee	Uber	AI agents summarise CS communications and surface prior interaction context	Improved CS rep effectiveness
Employee	Rivian	Gemini in Google Workspace for instant research, learning & skill acquisition	Faster onboarding & deep research
Employee	Geotab	Gemini for research, summarisation, legal review across 4.7M connected vehicles	Cross-functional productivity
Code	Renault (Ampere)	Enterprise Gemini Code Assist understands company code base and conventions	Developer productivity for EV SW

Quantified Impact: 500% ROI, 30% Workload Reduction, 10,000 Hours Saved

These are production results — not pilots

ROI

500%

Mercari

Japan's largest online marketplace anticipates 500% ROI via AI-powered customer service

Employee WL Reduction

20%

Mercari

Workload reduction for employees alongside 500% ROI in the same deployment

CS Workload Reduction

30%

LUXGEN

Customer service agent workload cut by 30% with Vertex AI chatbot (Taiwan EV brand)

Man-Hours/Year Saved

10,000+

Toyota

Factory AI platform on Google Cloud saves over 10,000 man-hours per year

Unique Headlines in 29 Hours

6,000+

PODS / Tombras

"World's Smartest Billboard" generated 6,000+ unique ad headlines across 299 NYC neighbourhoods in just 29 hours

Personalised Ads per Batch

Thousands

Virgin Voyages

Veo text-to-video generates thousands of hyper-personalised ads and emails per batch without sacrificing brand voice

Common Patterns: Customer Assistants, Employee Productivity & Creative Scale

Three dominant patterns emerge across all 1,001 use cases

01 Conversational Customer Agents

Most visible entry point

- Mercedes-Benz — MBUX Virtual Assistant (Gemini/Vertex AI)
- GM OnStar — Conversational AI for intent recognition
- Volkswagen — myVW multimodal owner's manual assistant
- LUXGEN — LINE-based CS agent, 30% workload reduction
- Commerzbank — Gen AI improves customer service reach

02 Employee Productivity Tools

Broadest category across all industries

- Uber — AI agents surface prior CS interaction context
- Rivian — Gemini Workspace for research & onboarding
- Rivian — NotebookLM for centralised FAQ with verified sources
- Geotab — Research, legal review & data filtering at scale
- Mercari — 20% employee workload reduction in production

03 Creative at Scale

Fastest-growing frontier

- Virgin Voyages — Thousands of hyper-personalised video ads via Veo
- PODS / Tombras — 6,000+ real-time ad headlines in 29 hours
- Figma — Brand-approved images & assets generated in seconds

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

Five actionable insights for enterprise leaders evaluating gen AI strategies

1

Gen AI is production-ready across all major industries

1,001 verified use cases across 11 verticals confirm this is no longer experimental. Customer, financial, healthcare, retail, and technology deployments are generating real business outcomes.

2

Customer & Employee agents are the highest-probability entry points

Conversational customer assistants and Gemini-for-Workspace productivity tools are the most common first deployments across every industry — low risk, fast time-to-value, measurable ROI.

3

Measurable ROI is achievable within months — not years

Mercari (500% ROI), LUXGEN (30% CS workload reduction), and Toyota (10,000+ man-hours/year saved) demonstrate that production-grade returns are possible within a single deployment cycle.

4

Creative and Code agents are the emerging frontier

Virgin Voyages, PODS/Tombras, Figma, and Renault Ampere signal that gen AI is moving rapidly from text-based tasks into multimodal creative production and enterprise software development.

5

The pace is accelerating — early movers gain compounding advantages

With 400 new use cases added in a single update and the overall list growing 10× in 18 months, enterprise gen AI adoption is still in its early exponential phase. Delay compounds disadvantage.
