

1,001 Real-World Gen AI Use Cases from Google Cloud Customers

Strategic briefing for enterprise technology and digital transformation leaders

1,001

Total documented use cases

11

Industry verticals represented

6

Agent types in framework

Covers organizations from enterprises, governments, researchers, and startups worldwide.

Tracks expansion from 101 use cases (Apr 2024) to 1,001 use cases (Oct 2025).

Organized across Customer, Employee, Creative, Code, Data, and Security agents.

10× Growth in 18 Months

Use case count expanded from 101 to 1,001 between April 2024 and October 2025

Use Cases

+900 Net new use cases documented

400 New entries added in Oct 2025 edition

11 Industries with production examples

6 Agent types used for portfolio planning

Industry × Agent Taxonomy

Framework to map adoption opportunities across verticals and agent types

Industry Vertical	Customer	Employee	Creative	Code	Data	Security
Automotive & Logistics						
Business & Professional Services						
Financial Services						
Healthcare & Life Sciences						
Hospitality & Travel						
Manufacturing, Industrial & Electronics						
Media, Marketing & Gaming						
Public Sector & Nonprofits						
Retail						
Technology						
Telecommunications						

Automotive & Logistics Deep Dive

Representative use cases by agent type, organization, and outcome

Agent Type	Organization	Use Case	Outcome / Metric
Customer	Mercedes-Benz	MBUX Virtual Assistant via Gemini/Vertex AI	Natural language in-car assistant
Customer	LUXGEN	AI agent on LINE for customer Q&A	30% reduction in human CS workload
Customer	General Motors (OnStar)	Virtual assistant with conversational AI	Improved speaker intent recognition
Customer	Volkswagen of America	myVW assistant + multimodal camera support	Driver manual and dashboard assistance
Customer	PODS / Tombras	AI-adaptive truck billboard campaign	6,000+ headlines, 299 neighborhoods, 29 hours
Employee	Toyota	Factory AI platform on Google Cloud	10,000+ man-hours saved per year
Employee	Uber	AI agents summarize CS communications	Improved representative effectiveness
Employee	Routematic	Cloud migration with zero downtime	Release cycles improved from weeks to days
Code	Renault Group (Ampere)	Gemini Code Assist for enterprise codebase	Developer productivity for EV software

Measurable ROI Highlights

Quantified outcomes reported across Google Cloud customer deployments

500% ROI

Mercari: anticipated ROI from AI-powered customer service

30% workload reduction

LUXGEN: reduced customer service agent workload

10,000+ hours saved

Toyota: factory AI platform annual man-hours saved

6,000+ headlines in 29 hours

PODS / Tombras: unique ad headlines across 299 NYC neighborhoods

Cross-Industry Adoption Patterns

Three recurring patterns across 1,001 documented implementations

Conversational Customer Agents

Most visible entry point across automotive, financial services, and retail for faster support and lower service friction.

Employee Productivity Agents

Broadest category: summarization, research, drafting, legal review, and knowledge support across departments.

Creative & Scale Agents

Fastest-growing frontier: multimodal content generation and hyper-personalized campaigns at enterprise scale.

Strategic Takeaways for Enterprise Leaders

Actions to prioritize adoption, scale value, and govern outcomes

Use the 11-industry × 6-agent taxonomy to build a portfolio roadmap, not isolated pilots.
Prioritize customer and employee agents first, where adoption evidence and value realization are strongest.
Set KPI-linked business cases upfront using benchmarks such as ROI, workload reduction, and hours saved.
Scale from proven vertical patterns (e.g., Automotive & Logistics) into adjacent business units.
Prepare for acceleration: 400 new use cases in the latest update indicates early exponential momentum.
