From 101 to 1,001: Gen AI Adoption Grew 10× in 18 Months

Google Cloud's customer-use-case catalog expanded from a launch list to a 1,001-entry operating map for enterprise AI deployment.

11 Industries × 6 Agent Types: A Taxonomy of Enterprise Gen AI

Google Cloud organizes the 1,001 customer examples by industry vertical and agent type.

Industry vertical	Customer	Employee	Creative	Code	Data	Security
Automotive & Logistics						
Business & Professional Services						
Financial Services						
Healthcare & Life Sciences						
Hospitality & Travel						
Manufacturing, Industrial & Electronics						
Media, Marketing & Gaming						
Public Sector & Nonprofits						
Retail						
Technology						
Telecommunications						

Taxonomy lens: identify where each agent type can address customer, workforce, creative, engineering, data, and security workflows within each vertical.

Automotive & Logistics: AI Agents From Cockpit to Curbside

A representative cross-section from the Automotive & Logistics vertical shows customer-facing assistants, employee productivity platforms, code assistance, and ML

Agent type	Company	Use case	Outcome / detail
Customer	Mercedes-Benz	MBUX Virtual Assistant powered by Gemini via Vertex AI	Natural language in-car assistant
Customer	Volkswagen of America	myVW app virtual assistant for owner manuals and dashboard indicators	Gemini multimodal capabilities
Customer	LUXGEN	AI agent on LINE answers customer questions via Vertex AI	30% human CS workload reduction
Customer	UPS Capital	DeliveryDefense Address Confidence scores delivery success likelihood	Data-driven delivery confidence
Employee	Toyota	Factory workers build and deploy ML models on Google Cloud	10,000+ man-hours/year saved
Employee	Rivian	Gemini in Workspace supports research, learning, and skill acquisition	Faster onboarding and deep research
Code	Renault Group (Ampere)	Enterprise Gemini Code Assist understands code base, standards, conventions	Developer productivity for EV software

Quantified Impact: 500% ROI, 30% Workload Reduction, 10,000 Hours Saved

Selected production outcomes reported by Google Cloud customers show measurable financial, workload, labor, and creative-scale impact.

500%

anticipated ROI

Mercari

AI-powered customer service also reduces employee workloads by 20%

30%

workload reduction

LUXGEN

Vertex AI chatbot reduced human customer service workload

10,000+

man-hours/year saved

Toyota

Factory AI platform lets workers build and deploy ML models

Common Patterns: Customer Assistants, Employee Productivity, and Creative Scale

1

Conversational Customer Agents

Most visible entry point

- Mercedes-Benz, GM, VW, LUXGEN
- Commerzbank
- Mercari

2

Employee Productivity Agents

Broadest category

- Uber
- Rivian
- Geotab
- Oxa

3

Creative and Scale Agents

Fastest-growing frontier

- Virgin Voyages
- PODS / Tombras
- Figma

Pattern signal: deployments cluster around reducing customer friction, scaling knowledge work, and moving multimodal content creation into enterprise production workflows.

Takeaways: Where to Start and What to Expect from Enterprise Gen AI

1

Start with visible entry points

Customer assistants and employee productivity tools dominate deployment patterns across the catalog.

2

Use the 6-agent taxonomy to prioritize

Customer, Employee, Creative, Code, Data, and Security agents create a practical opportunity map.

3

Anchor programs in measurable outcomes

Reported results include 500% ROI, 30% workload reduction, and 10,000+ man-hours saved annually.

4

Treat creative and code as fast-moving frontiers

Veo, Gemini Code Assist, Figma, and PODS examples show multimodal and engineering use cases scaling.

5

Move with the adoption curve

10× growth in 18 months and 400 new entries in the latest update point to early exponential deployment.

Enterprise planning lens

Pick the agent type, prove the metric, then scale by industry workf
