

State of the Web 2020– 2025:

Tracking Page Weight, Protocols & Security at Scale

Based on HTTP Archive Data (Jan 2020 –

Mar 2026)

Prepared for Web Performance
Engineers and Front-End Architects

Crawl Sample Size Tripled: From ~5M to 16M Desktop URLs Since 2020

Explosive Growth in Crawl Volume:

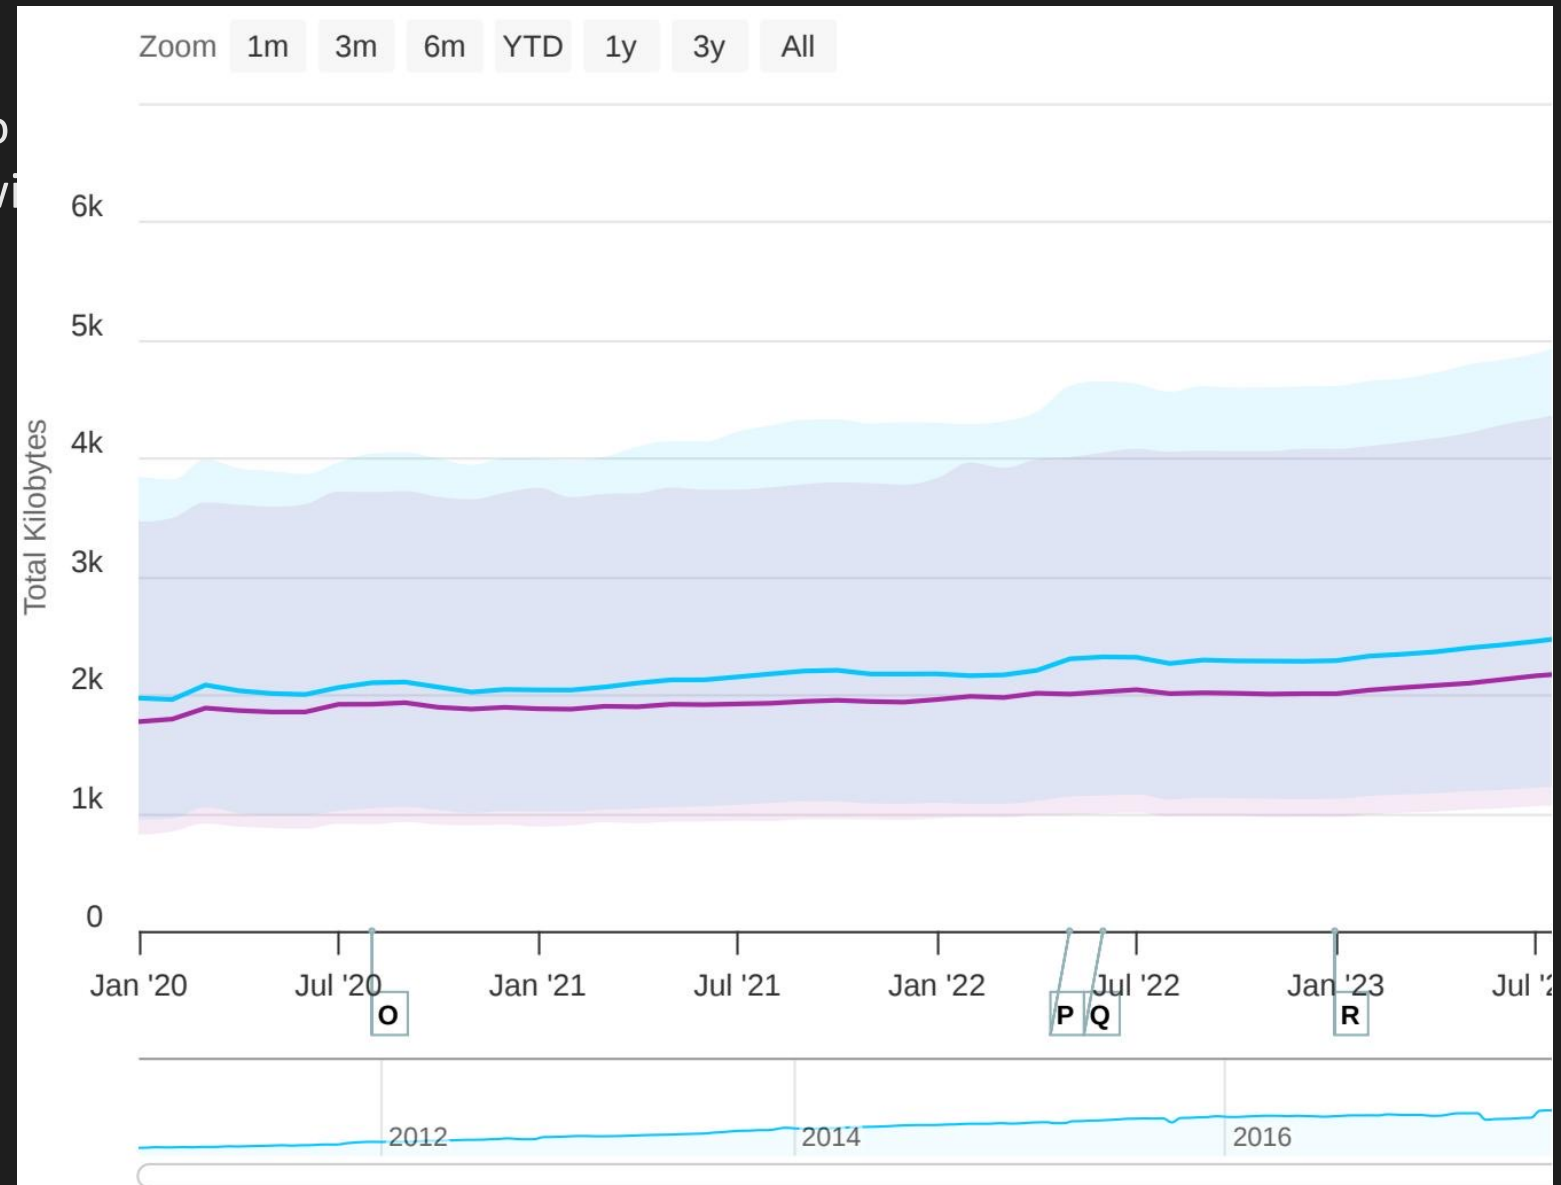

- Jan 2020: ~5M desktop, ~3.5M mobile
- Mid-2022: Sharp jump to ~15M desktop, ~10M mobile
- Mid-2023 onward: Stabilized at ~16M desktop

Median Page Weight Climbs Steadily to ~2,000 KB on Desktop

Page Weight Trends (2020-2026):

- Median desktop page grew from ~1,600 KB to
- Mobile tracks slightly lower (~1,900 KB) but w
- 75th percentile on desktop exceeds 4,000 KB.

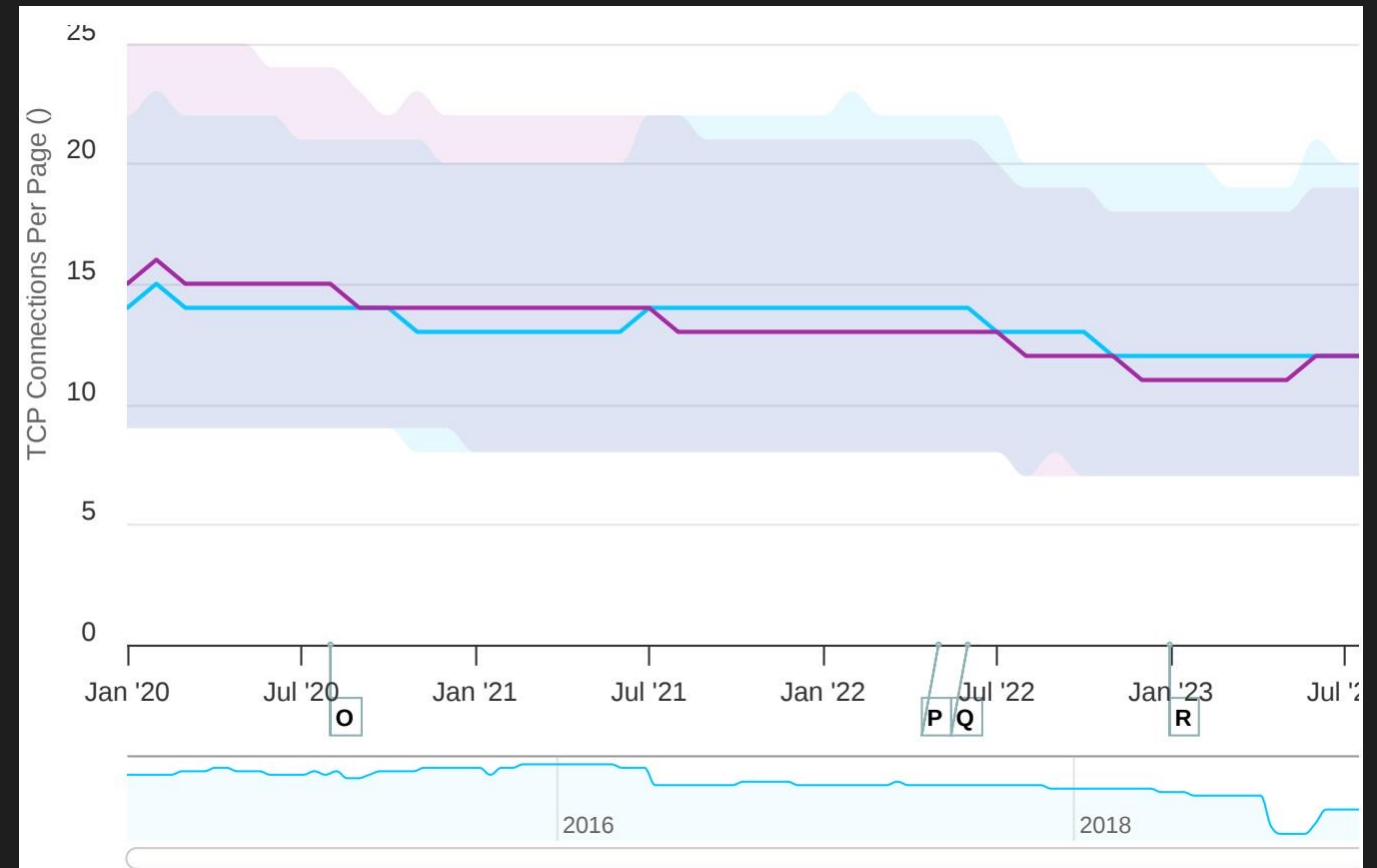

76 Requests per Desktop Page While TCP Connections Drop to 12

Multiplexing Efficiency (HTTP/2 & HTTP/3)

Median Total Requests

Desktop: 76 (▲ 2.7%)

Mobile: 71 (▲ 2.9%)

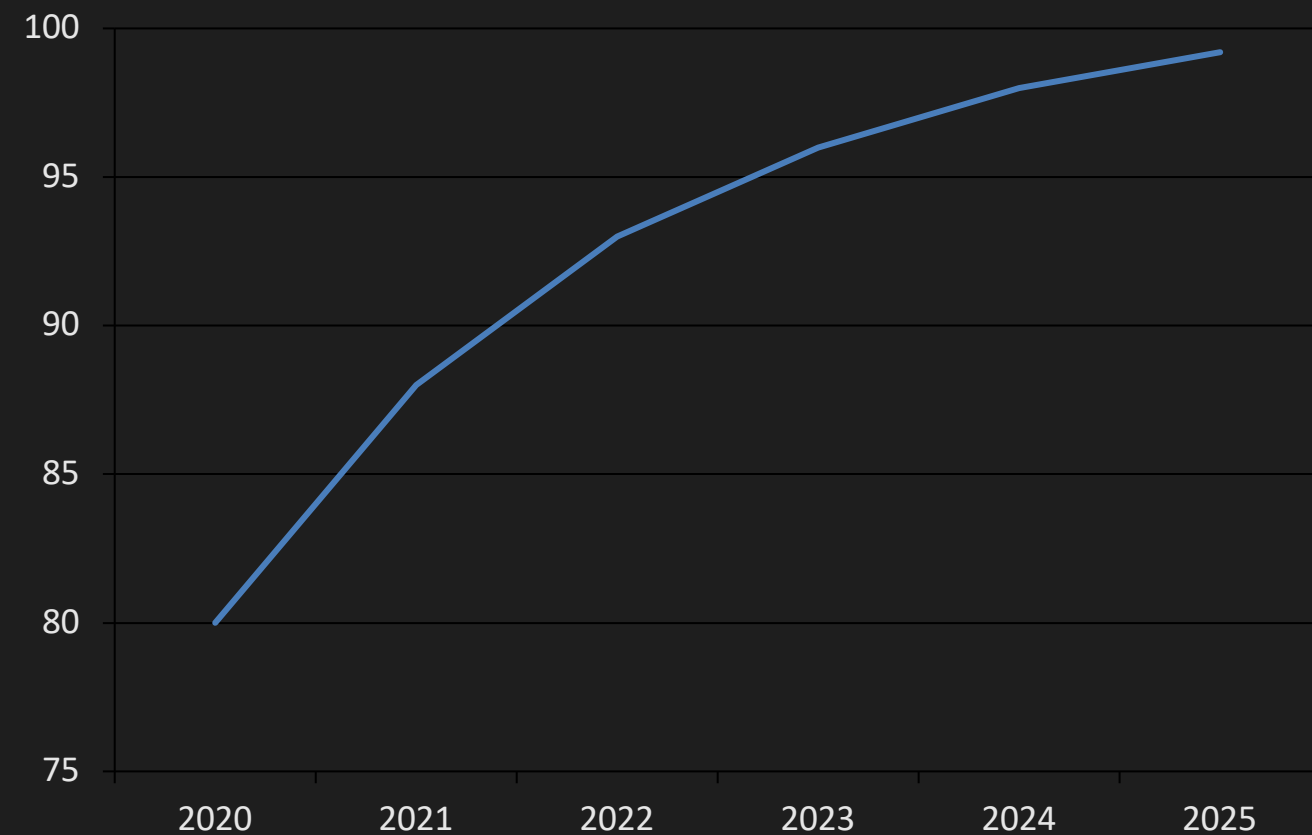

HTTPS Requests Reach 99%: Encryption Is Now the Default

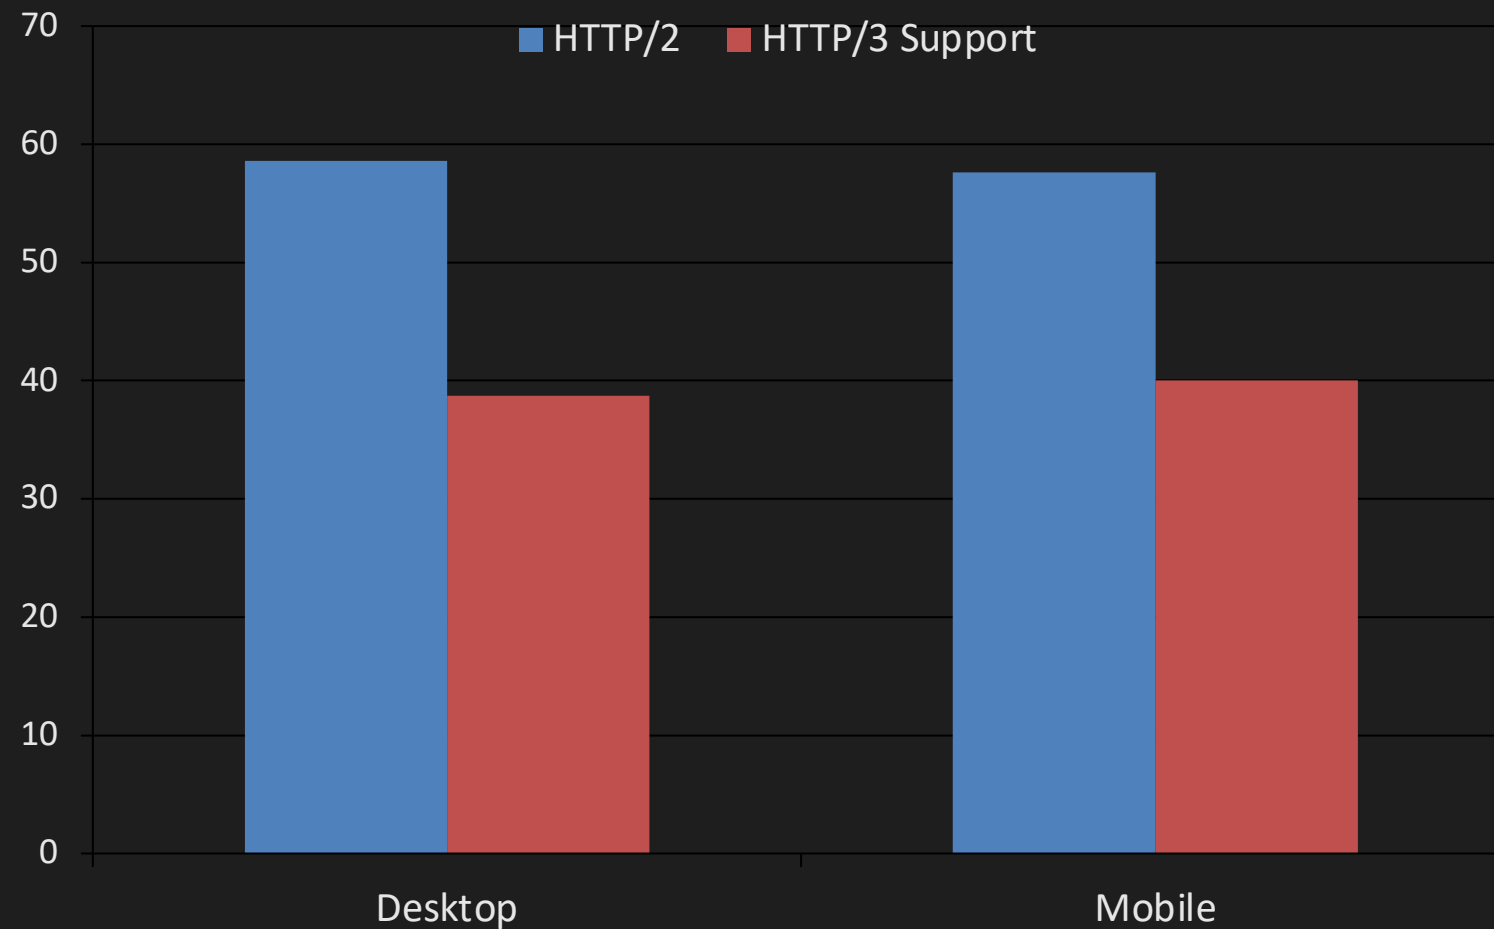

99.2%

Desktop Requests use HTTPS
(99.1% on Mobile)

HTTPS Adoption

HTTP/2 Holds at ~58% While HTTP/3 Support Surges to 40%

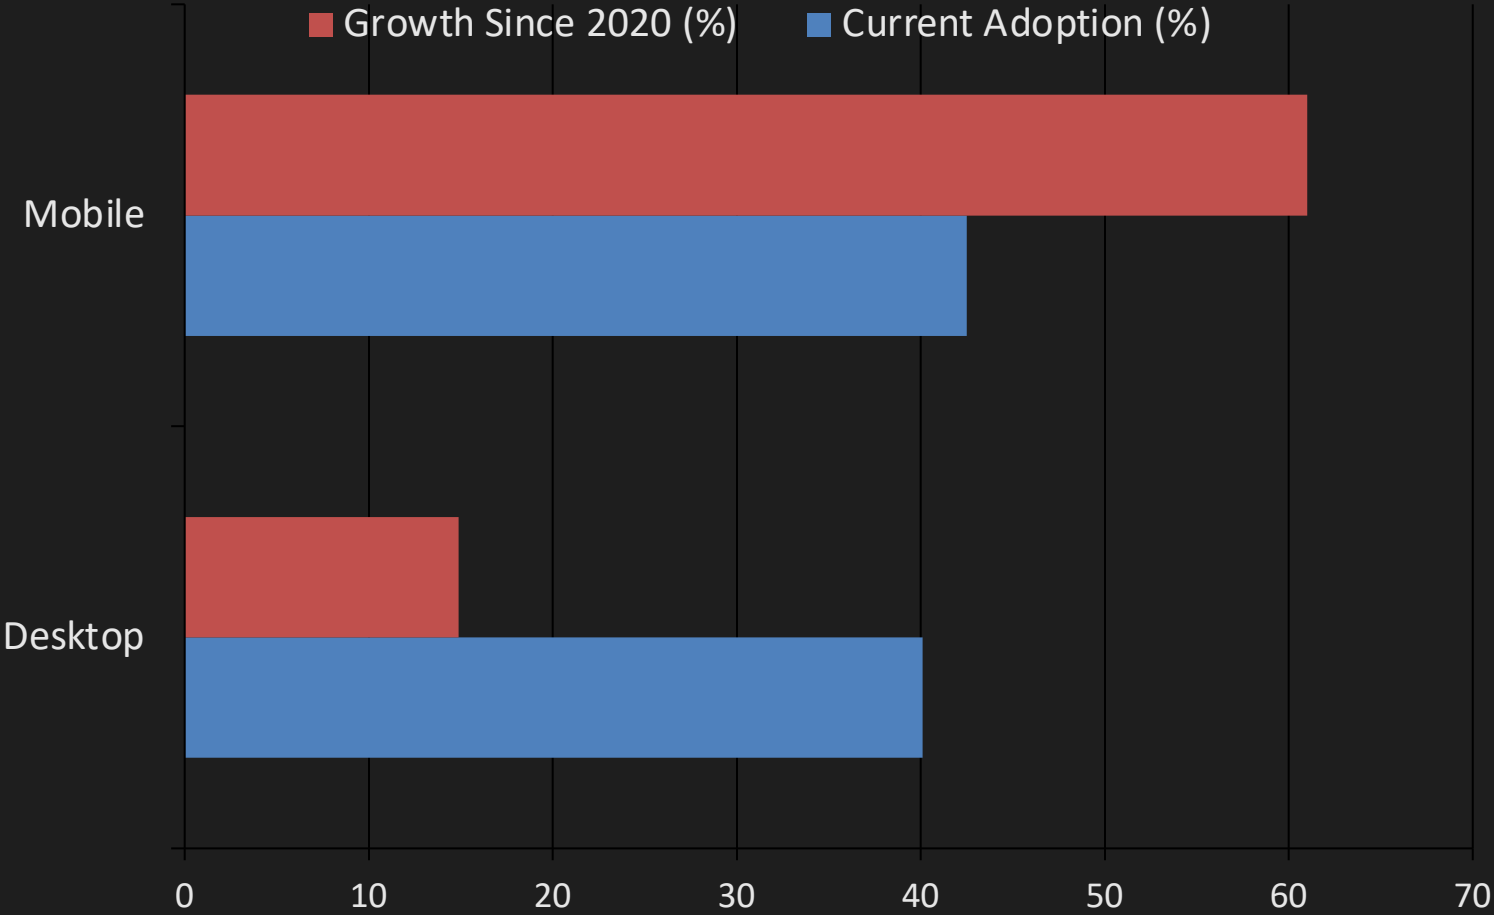

Explosive Growth:

- HTTP/3 support grew from near zero in 2020 to ~40%
- HTTP/2 growth is modest (1-3%) as HTTP/3 absorbs

*Note: Measures support, not usage. Fresh Chrome instances default

Font-Display Usage Reaches 42% on Mobile, Up 61% Since 2020

FOIT Avoidance:

- The font-display CSS property prevents the Flash of Invisible Text (FOIT).
- Mobile adoption surged 61% to reach 42.5%.
- Still, over 50% of pages risk invisible text during web page load.

Key Takeaways: Bigger Pages, Smarter Protocols, Stronger Security

Page weight continues to grow: Median desktop pages transfer ~2,000 KB (up 25%).

HTTPS is effectively universal: At 99%+ of requests, plaintext HTTP is extinct.

HTTP/3 support is surging: Fastest-growing metric, reaching ~40% support from near-zero.

TCP connections are declining: Multiplexing reduces connections by 15–27% despite more requests.

Font-display has room to grow: Adoption is ~40-42%, meaning many sites still suffer from FOIT.

Action: Benchmark your own sites against these baselines to prioritize optimization.
