

State of the Web 2020–2025: Tracking Page Weight, Prot

HTTP Archive • State of the Web report • Jan 2020 – early 2026

Crawl Sample Size Tripled: From ~5M to 16M Desktop U

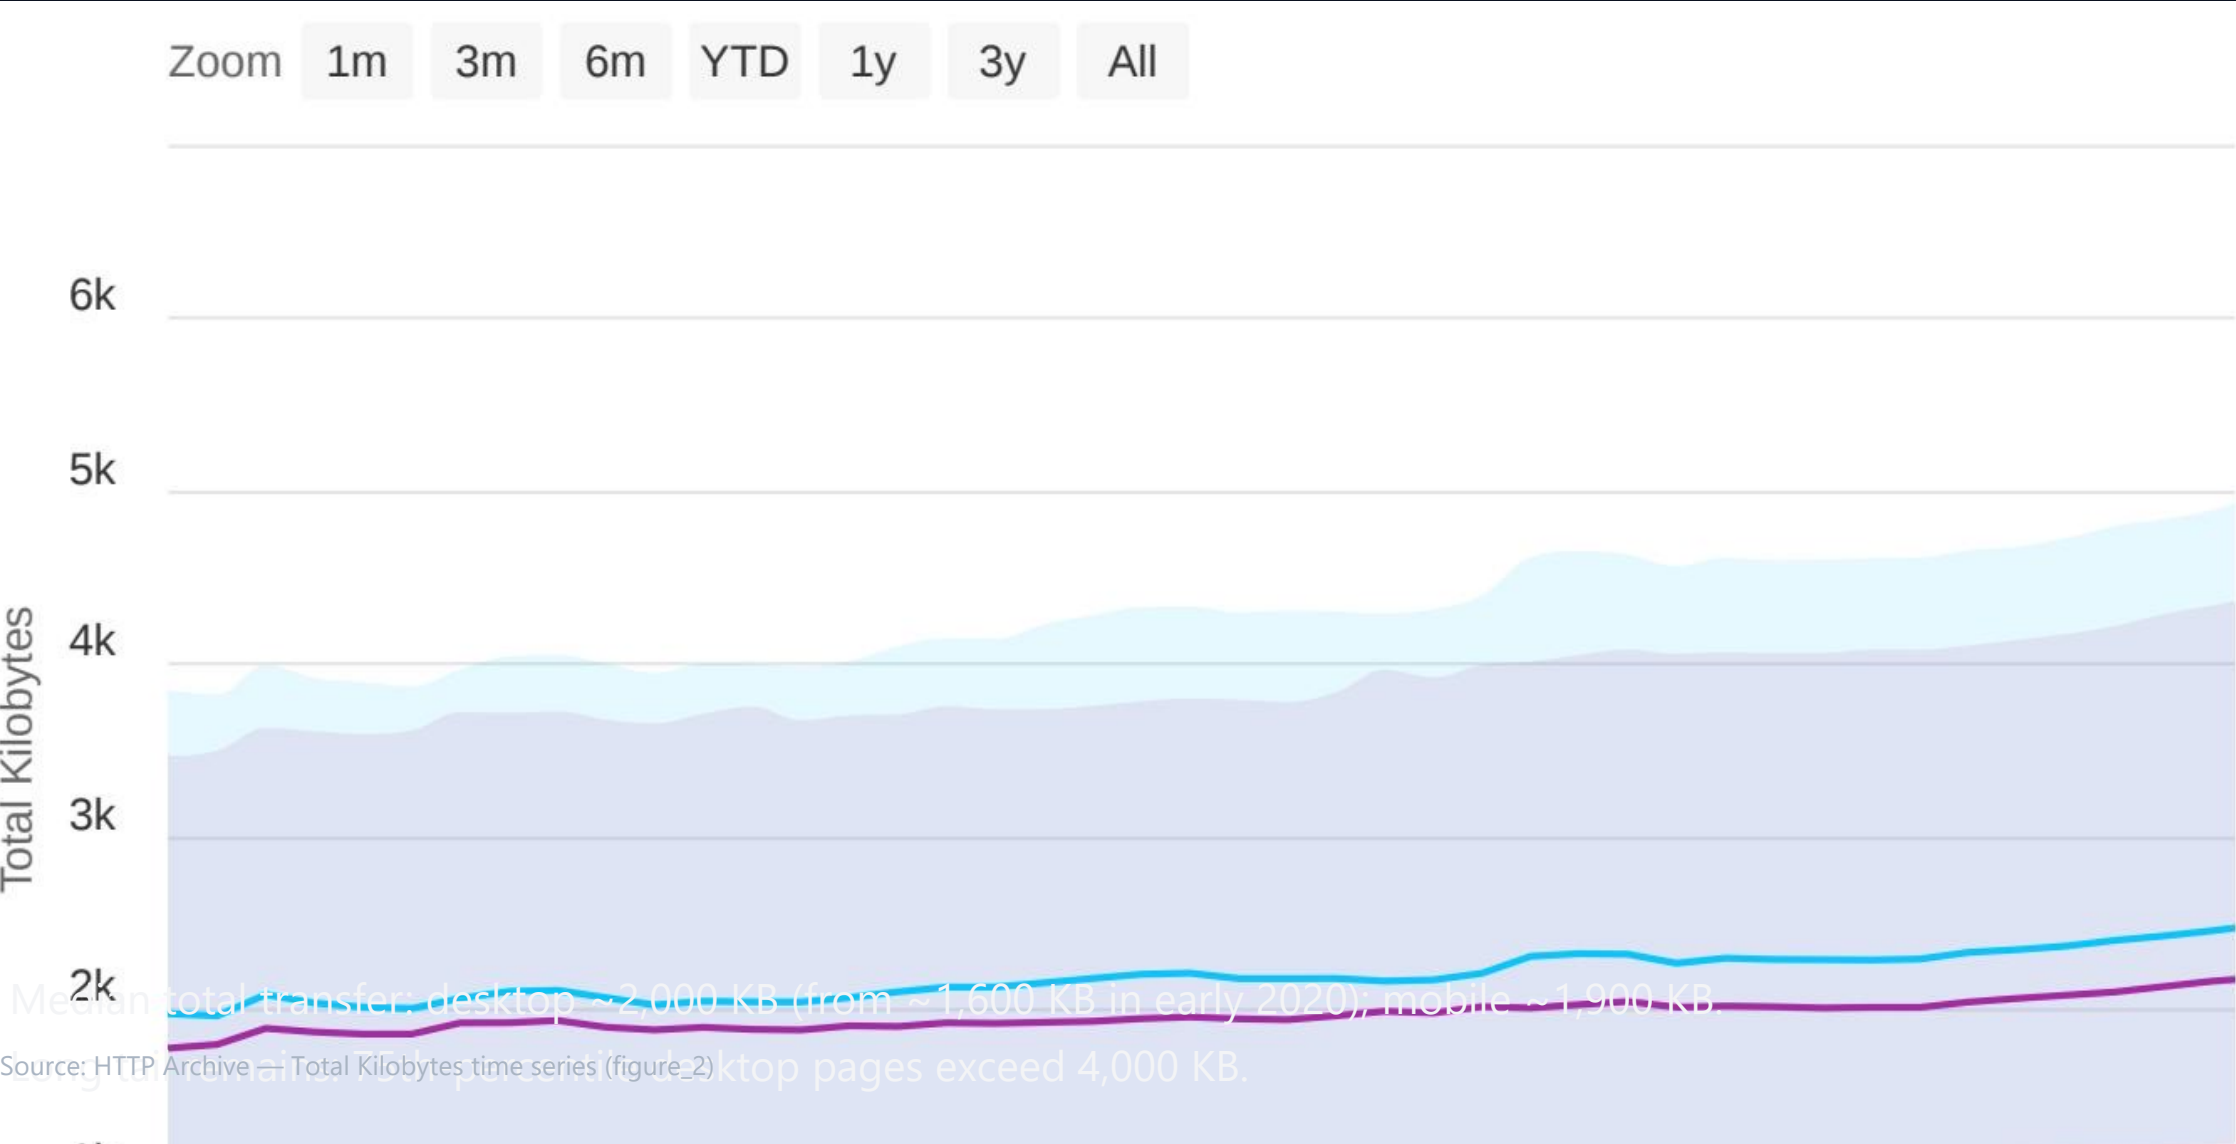

Jan 2020: ~5M desktop / ~3.5M mobile URLs

Mid-2022 step-change: ~15M desktop / ~10M mobile URLs

Mid-2023+ step-change: ~16M desktop / ~12.5M mobile URLs

Median Page Weight Climbs Steadily to ~2,000 KB on Desktop

76 Requests per Desktop Page While TCP Connections D

Median total requests per page

76 desktop / 71 mobile

(≈+3% since 2020)

Median TCP connections/page: desktop 12.0 (▼14.3%), mobile 11.0 (▼26.7%).

Interpretation: multiplexing (HTTP/2 + HTTP/3) reduces parallel connections even as request counts rise.

HTTPS Requests Reach 99%: Encryption Is Now the Default

Latest share of requests over HTTPS

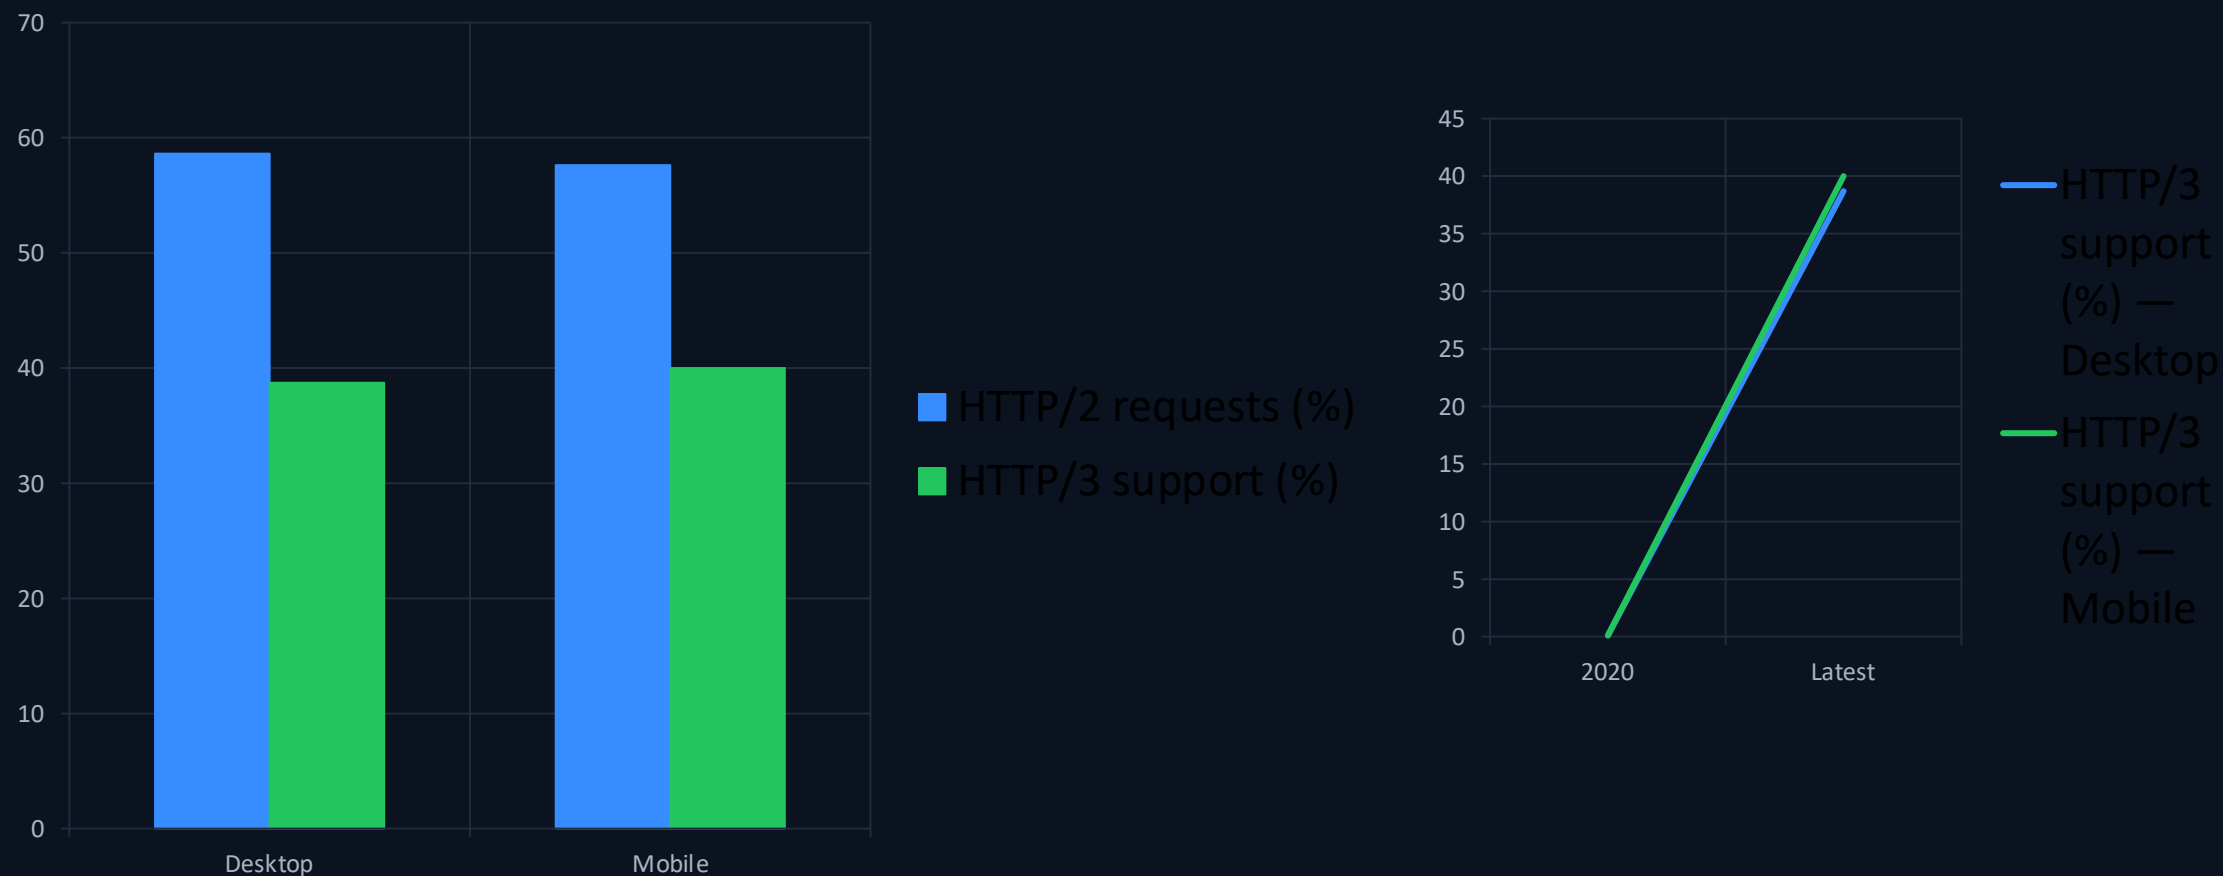

99%+

(99.2% desktop / 99.1% mobile)

Up ~19–20 percentage points since early 2020 ($\approx 80\% \rightarrow 99\%+$).
Plaintext HTTP is effectively gone at macro scale.

HTTP/2 Holds at ~58% While HTTP/3 Support Surges to

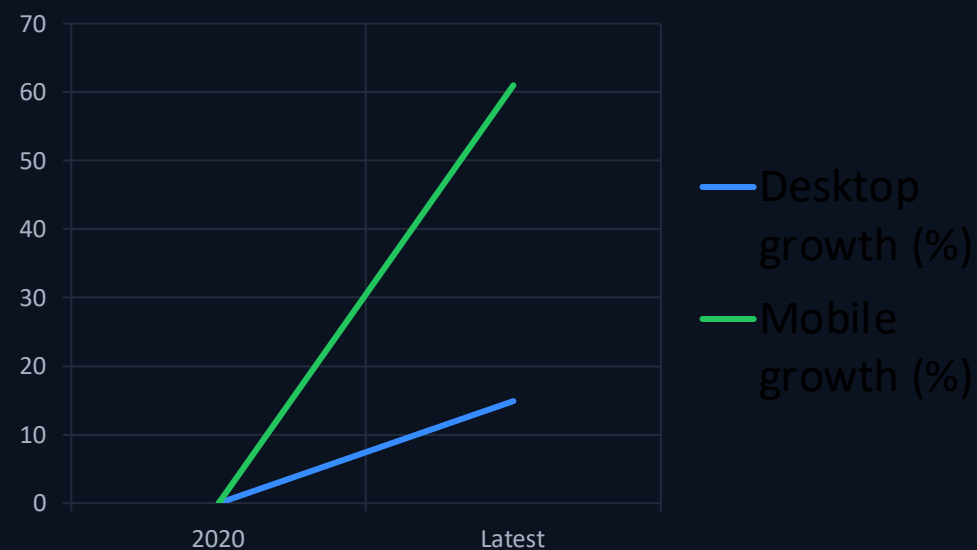

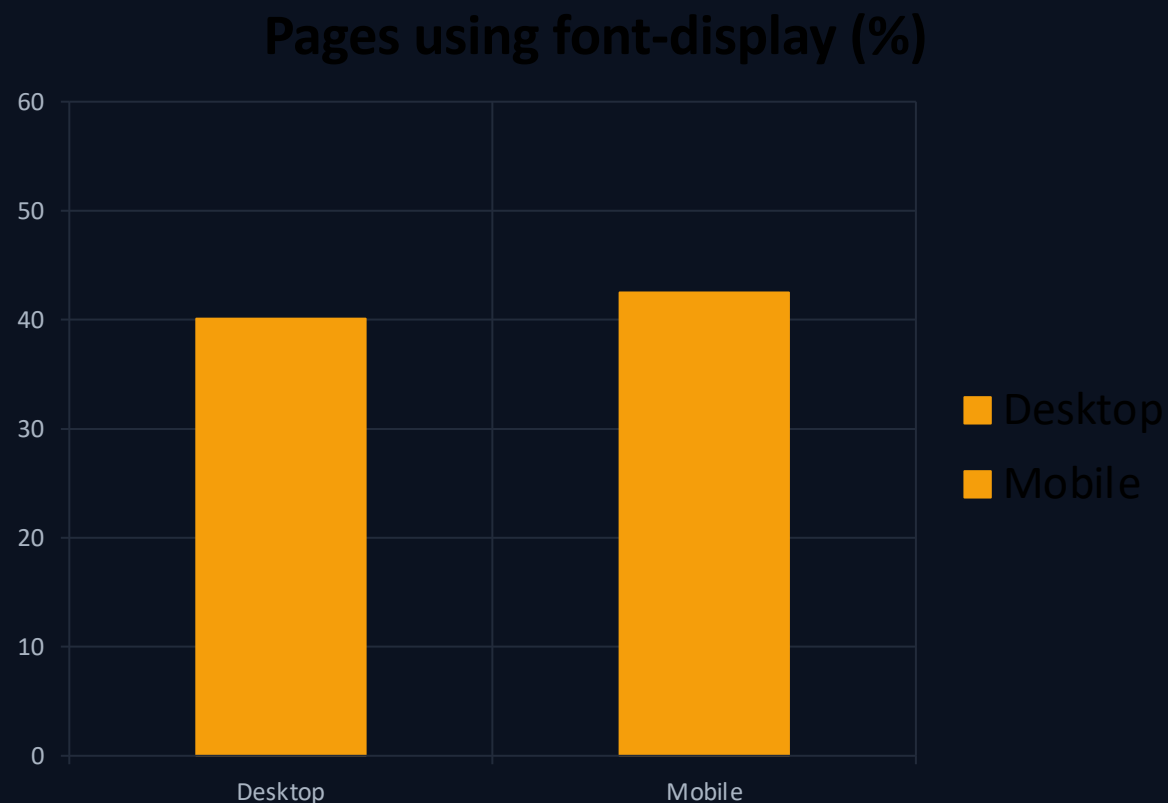

HTTP/2: 58.6% desktop / 57.6% mobile (relatively flat recently).

HTTP/3 support: 38.7% desktop / 40.0% mobile (from near-zero baseline).

Caveat: HTTP Archive measures support (Alt-Svc discovery): first connection defaults to HTTP/2 in fresh Chrome.

Font-Display Usage Reaches 42% on Mobile, Up 61% Sin

Adoption (Lighthouse): 40.1% desktop, 42.5% mobile.

Benefit: reduces FOIT risk during webfont loading; still underused on >50% of pages.

Key Takeaways: Bigger Pages, Smarter Protocols, Strong

Page weight keeps climbing: median desktop ~2,000 KB (▲~25% vs 2020).

HTTPS is the baseline: 99%+ of requests are encrypted (99.2% desktop / 99.1% mobile).

HTTP/3 is the fastest mover: ~39–40% support from near-zero baseline.

Network efficiency improves: median TCP connections/page fell to 12 (desktop) / 11 (mobile) despite 76/71 requests.

Font-display is growing but underused: 40.1% desktop / 42.5% mobile — room to reduce FOIT risk.

Call to action: Benchmark your own pages against these baselines (size, requests, protocols, HTTPS) and track deltas release-to
