Shifts in the Market Landscape

Market Growth: ~2T → 26T tokens/week

March 2025 – March 2026 (OpenRouter weekly data)

Chinese Models Break Through Globally

6 of top 10 models are from Chinese providers.

Combined share: 54.3% on an international platform.

Xiaomi, DeepSeek, MiniMax, Stepfun, Zhipu all rank.

Flash/Turbo Variants Outpace Flagships

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash — "fast & affordable" models dominate real-world usage.

Users prioritize speed and cost over peak benchmark scores.

Anthropic Growth Has Stalled

Claude Sonnet 4.6 and Opus 4.6 combine for ~2T tokens.

Both showing near-zero WoW growth despite ranking #5 and #6.

Faced with accelerating competition from Chinese providers.

Token usage growth from ~2T to ~26T/week signals a rapidly expanding market with room for new entrants.

This Week's Rising Stars: Fastest-Growing Models

MiniMax M2.7

+253%

WoW

New cost-optimized release gaining rapid developer adoption as a DeepSeek alternative

Remaining Top 10 Apps

Rank	App	Category	Daily Tokens
#5	Janitor AI	Character roleplay	29.2B
#6	ISEKAI ZERO	AI adventure game	28.8B
#7	Descript	AI video/podcast editor	27B
#8	Hermes Agent	AI agent	19.2B

OpenClaw at 829B/day is nearly 3× the next app · Top 4 apps are all AI coding tools

Key Insights and Industry Implications

01 Chinese Models Now Lead the Global Market

Chinese providers (Xiaomi, MiniMax, Stepfun, DeepSeek, Zhipu) hold 54.3% of OpenRouter token volume — on an international platform. This is not a local phenomenon; it reflects a global cost-performance shift.

02 AI Coding Agents Are the #1 LLM Use Case

5 of the top 10 apps by daily usage are coding tools. OpenClaw leads at 829B tokens/day. For investors and builders: coding assistance is where real demand lives today.

03 The Market Is Highly Fragmented — No Winner Yet

No provider holds more than 26% share. The top 10 spans 8 different providers. Fragmentation signals opportunity: the right model, price, or capability could still capture significant share.

04 Affordable & Fast Models Win in Production

Flash/Turbo variants (Step Flash, GLM Turbo, Gemini Flash) dramatically outperform flagship models in real usage. Benchmark performance $\neq$ production adoption. Speed and cost win.
