

The 2025 LLM Usage Landscape: Real-World Data from OpenRouter

Latest week of March 2025 · OpenRouter Rankings

Weekly Tokens Processed

26T+

from ~2T to ~26T over Mar 2025–Mar 2026 trend window

What this report covers

- Top 10 models and weekly momentum
- Provider-level market share distribution
- Fastest-growing models and app demand
- Strategic implications for R&D, product, and investment

This Week's Top 10 Models

Rank	Model	Provider	Weekly Token Usage	WoW Change
1	MiMo-V2-Pro	Xiaomi	3.96T	+165%
2	Step 3.5 Flash (free)	Stepfun	1.49T	+1%
3	MiniMax M2.7	MiniMax	1.29T	+253%
4	DeepSeek V3.2	DeepSeek	1.24T	+9%
5	Claude Sonnet 4.6	Anthropic	1.04T	-0%
6	Claude Opus 4.6	Anthropic	995B	+2%
7	Gemini 3 Flash Preview	Google	972B	+3%
8	GLM 5 Turbo	Zhipu (z-ai)	968B	-6%
9	MiniMax M2.5	MiniMax	909B	-30%
10	Grok 4.1 Fast	x-ai	599B	+32%

MiMo-V2-Pro leads at 3.96T tokens (+165% WoW); MiniMax M2.7 shows strongest growth (+253%).

Provider Market Share Breakdown

Key Readouts

- Xiaomi leads at 25.9%, over 2× Google (11.8%).
- Chinese providers (Xiaomi, MiniMax, Stepfun, DeepSeek, Zhipu) total ~54.3%.
- OpenAI ranks 5th at 7.9%.
- No single provider exceeds 30% share.

Provider market share represents total market across all models/apps, not only top-10 models.

Shifts in the Market Landscape

Weekly total token usage expanded from ~2T to ~26T (Mar 2025–Mar 2026), indicating a rapidly scaling demand environment.

Chinese models now hold >54% combined share

Xiaomi, Stepfun, DeepSeek, MiniMax, and Zhipu together account for over half of usage on this international platform.

Anthropic holds two top-10 models, but growth has flattened

Claude Sonnet 4.6 and Opus 4.6 combine for roughly 2T tokens, yet week-over-week momentum is limited.

Fast and affordable variants outperform flagships

Flash/Turbo variants (Step Flash, Gemini Flash, GLM Turbo, Grok Fast) dominate real-world consumption patterns.

This Week's Rising Stars: Fastest-Growing Models

Why they surged

- MiniMax M2.7 (+253%): rapid adoption as a high-throughput alternative.
- MiMo-V2-Pro (+165%): strong cost-performance and first-place visibility.
- Cline (+128%): expanding usage of autonomous coding-agent workflows.

App Ecosystem: Who's Calling These Models

App	Daily Token Volume
OpenClaw	829B
Kilo Code	271B
Claude Code	78B
Cline	69.1B

OpenClaw at 829B/day consumes nearly 3× the second-place app (Kilo Code at 271B/day).

Category Insight

The top 4 apps by daily token usage are all AI coding tools: OpenClaw, Kilo Code, Claude Code, and Cline. This indicates that coding assistants and agents are now the largest LLM demand center in production usage.

Other categories (roleplay, gaming, media editing) remain meaningful but secondary in aggregate consumption.

Key Insights and Industry Implications

Chinese model providers now hold a dominant global share on OpenRouter (>54% combined).

AI coding agents have become the single largest LLM consumption scenario.

The market remains highly fragmented: no provider has an outright monopoly.

Fast, affordable Flash/Turbo variants materially outpace flagship models in usage.

Implication: Product strategy should optimize for cost/latency fit and workflow embedding, not just benchmark leadership.
