# Provider Market Share Breakdown

Provider-level share covers the total OpenRouter market across all models and apps; it will not equal a sum of top-10 model rows.

## Market Share by Provider

|    |              |                        |       |       |
|----|--------------|------------------------|-------|-------|
| 1  | Xiaomi       | <div><div></div></div> | 25.9% | 1.31T |
| 2  | Google       | <div><div></div></div> | 11.8% | 594B  |
| 3  | Anthropic    | <div><div></div></div> | 11.0% | 555B  |
| 4  | MiniMax      | <div><div></div></div> | 8.5%  | 429B  |
| 5  | OpenAI       | <div><div></div></div> | 7.9%  | 400B  |
| 6  | Stepfun      | <div><div></div></div> | 6.8%  | 341B  |
| 7  | DeepSeek     | <div><div></div></div> | 6.6%  | 334B  |
| 8  | Zhipu (z-ai) | <div><div></div></div> | 6.5%  | 326B  |
| 9  | x-ai         | <div><div></div></div> | 3.9%  | 195B  |
| 10 | Others       | <div><div></div></div> | 11.2% | 563B  |

**No monopoly**  
No provider exceeds 30%.

**OpenAI at #5**  
7.9% provider share.

**Xiaomi #1**  
25.9%.

# Shifts in the Market Landscape

Competitive dynamics are moving on two axes: geographic supply and product-performance trade-offs.

**54%+**

**Chinese models break through globally**

Xiaomi, Stepfun, DeepSeek, MiniMax and Zhipu together exceed half of market usage on an international platform.

**Flash**

**Fast / affordable beats flagship pull**

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash and other speed-cost variants outpace flagship counterparts in usage.

**~2T**

**Anthropic remains visible, growth stalls**

Sonnet 4.6 and Opus 4.6 both sit in the top 10, combining for roughly 2T tokens while showing little growth.

**8**

**Fragmentation keeps competition open**

Top 10 models span 8 providers; no single model or provider monopolizes the market.

**Market expansion amplifies substitution: as workloads scale, buyers appear to reward throughput, cost, and fit-for-purpose deployment over peak benchmark prestige.**

# This Week's Rising Stars: Fastest-Growing Models

Week-over-week growth highlights where traffic is newly concentrating.

## What is driving the surge?

### Cost-performance pressure

MiniMax M2.7 and MiMo-V2-Pro point to demand for high-throughput, lower-cost alternatives.

### Agentic workflows are visible

Cline (+128%), Hermes Agent (+92%) and Codex (+112%) show coding/agent tools feeding model traffic.

### Volatility remains high

Ampere shows +576% WoW growth, reinforcing that the leaderboard can shift quickly.

### Rising stars are not all frontier labs

Independent developers and specialized teams appear alongside established model providers.

# App Ecosystem: Who's Calling These Models

Top apps by daily token consumption show where real production demand is coming from.

## Top Apps by Daily Token Volume

|    |              |       |
|----|--------------|-------|
| 1  | OpenClaw     | 829B  |
| 2  | Kilo Code    | 271B  |
| 3  | Claude Code  | 78B   |
| 4  | Cline        | 69.1B |
| 5  | Janitor AI   | 29.2B |
| 6  | ISEKAI ZERO  | 28.8B |
| 7  | Descript     | 27B   |
| 8  | Hermes Agent | 19.2B |
| 9  | Roo Code     | 11.8B |
| 10 | Scripty      | 9.95B |

## Coding assistants dominate usage

The top 4 apps are all AI coding tools: OpenClaw, Kilo Code, Claude Code and Cline. Five of the top 10 are coding tools when Roo Code is included.

top 10

### Not only developer tools

Entertainment/roleplay apps (Janitor AI, ISEKAI ZERO) and creator tools like Descript still hold notable positions.

# Key Insights and Industry Implications

**54.3%**

**Chinese models now hold a dominant global share**

Xiaomi, MiniMax, Stepfun, DeepSeek and Zhipu combine for roughly 54.3% market share on OpenRouter.

**Top 4**

**AI coding agents are the largest consumption scenario**

Top apps are led by OpenClaw, Kilo Code, Claude Code and Cline; coding tools occupy the top 4 app ranks.

**8**

**The model market remains highly fragmented**

Top 10 models span 8 different providers; no single provider exceeds 30% share.

**Fast**

**Fast and affordable models beat flagship-only positioning**

Flash/Turbo variants such as Step 3.5 Flash, GLM 5 Turbo and Gemini 3 Flash show high real-world adoption.

**Implication: winners are likely to be decided by applied workload fit — speed, cost, developer utility, and distribution — not benchmark reputation alone.**
