10	Grok 4.1 Fast	x-ai	599B	+32%	

● Orange chip = Chinese provider ● Chinese providers hold 6/10 spots ● Anthropic holds 2 spots but growth stalled

Provider Market Share Breakdown

BY TOKEN VOLUME

25.9% — Xiaomi leads decisively

MIMo-V2-Pro's explosive growth propelled Xiaomi to more than double second-place Google's share in a single week.

54.3% — Chinese providers combined

Xiaomi + MiniMax + Stepfun + DeepSeek + Zhipu control the majority of token consumption on this international platform.

7.9% — OpenAI ranks only 5th

The market is highly fragmented — no provider exceeds 30%. OpenAI, once dominant, trails three Chinese providers in actual usage.

Shifts in the Market Landscape

Chinese Models Break Through Globally

On an international platform, Chinese providers now account for over half of all usage. Xiaomi's MiMo series, DeepSeek V3, and MiniMax M2 have a decisive cost-performance advantage.

6 / 10 spots

Flash / Turbo Beats Flagship

Step 3.5 Flash, GLM 5 Turbo, and Gemini 3 Flash see far higher usage than their flagship counterparts. Users vote with tokens — speed and cost matter more than peak benchmark scores.

"Fast & Cheap" wins

Anthropic Growth Has Stalled

Anthropic holds two models in the top 10, combining for ~2T tokens — respectable, but WoW growth is near zero. New Chinese entrants are eating relative share.

~0% WoW growth

Total market trajectory: from ~2T tokens/week in March 2025 to ~26T tokens/week — the pie is expanding rapidly, making relative share gains even more consequential.

App Ecosystem: Who's Calling These Models

#	APP	DAILY TOKENS
1	OpenClaw AI AI productivity assistant	829B
2	Kilo Code CODE VS Code AI coding assistant	271B
3	Claude Code CODE Anthropic's CLI coding tool	78B
4	Cline CODE VS Code autonomous coding agent	69.1B
5	Janitor AI Character roleplay chat	29.2B
6	ISEKAI ZERO AI adventure game	28.8B
7	Descript AI video/podcast editor	27B
8	Hermes Agent Nous Research AI agent	19.2B
9	Roo Code CODE VS Code AI coding assistant	11.8B
10	Scripty Newly launched tool	9.95B

OpenClaw dominates

829B

tokens/day — nearly 3× #2 Kilo Code. AI productivity tools set the consumption ceiling.

4 of the top 4 apps are AI coding tools.

OpenClaw, Kilo Code, Claude Code, and Cline combined represent the single largest usage category. AI coding agents have become the dominant LLM consumption scenario.

Entertainment apps (Janitor AI, ISEKAI ZERO) retain a notable footprint at #5 and #6 — a reminder that consumer roleplay remains a significant, if lower-profile, demand driver.

Key Insights and Industry Implications

01

Chinese Models Now Dominate Global Usage

On OpenRouter — an international platform — Chinese providers hold 54.3% combined share. Xiaomi, DeepSeek, MiniMax, Stepfun, and Zhipu have built a structural cost-performance advantage that is driving real-world adoption, not just benchmark wins.

54.3% combined share

02

AI Coding Agents Are the #1 Use Case

5 of the top 10 apps and 4 of the top 4 apps by daily volume are coding tools. This is now the largest commercial value proposition for LLMs — helping developers write code. R&D and product investment should follow this signal.

4/4 top apps = coding
