Shifts in the Market Landscape

Key competitive dynamics reshaping the LLM market

01

Chinese Models Break Through

On OpenRouter, an international platform, Chinese provider models now account for **over 54%** of all usage. Xiaomi's MiMo series, DeepSeek V3, and MiniMax's M2 series hold a significant cost-performance advantage.

02

Anthropic Growth Stalls

Despite maintaining two models in the top 10 (Sonnet 4.6 + Opus 4.6), Anthropic's combined ~2T tokens show **near-zero growth**. The gap to leaders is widening rapidly.

03

Flash/Turbo Outpace Flagships

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash — "fast and affordable" models see **far higher usage** than flagship counterparts. Speed and cost often matter more than peak performance.

Key Insights and Industry Implications

What the data tells us about where the LLM market is heading

- 1

Chinese models now hold a dominant share in the global market. Combined Chinese provider share exceeds 54% on OpenRouter, an international platform — signaling a fundamental shift in competitive dynamics.
- 2

AI coding agents are the single largest LLM consumption scenario. 5 of the top 10 apps are coding tools, reflecting the largest commercial value proposition for LLMs today.
- 3

The model market is highly fragmented with no outright winner. The top 10 spans 8 different providers. No single provider exceeds 30% share — competition remains fierce.
- 4

Affordable and fast models (Flash/Turbo variants) far outpace flagship models in usage. Users vote with their feet — in real-world applications, speed and cost often matter more than peak performance.
