Shifts in the Market Landscape

What changed (and why it matters)

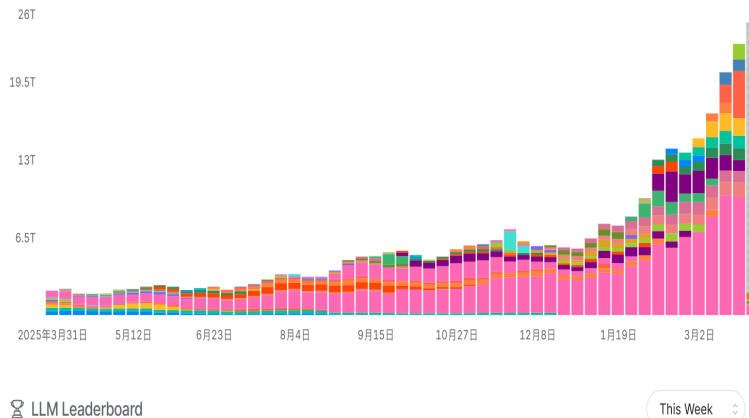

- Chinese providers now hold over 54% combined share on OpenRouter.
- Anthropic holds two models in the top 10, but growth has stalled.
- Flash/Turbo variants (fast + affordable) far outpace flagships in real-world usage.
- Overall weekly tokens grew from ~2T to ~26T (Mar 2025 → Mar 2026).

Weekly usage of models across OpenRouter

Interpretation: In production workloads, speed + cost dominate; competition remains fragmented across providers and model tiers.

This Week's Rising Stars: Fastest-Growing Models

Week-over-week growth leaders (OpenRouter)

Top growth this week

MiniMax M2.7 — MiniMax

+253%

MiMo-V2-Pro — Xiaomi

+165%

Cline (coding agent) — Independent developer

+128%

Possible drivers (interpretive, consistent with observed patterns)

- Cost-performance focus (fast/affordable variants over flagships)
- Developer tooling adoption (coding agents increasingly dominant)
- Rapid experimentation on an aggregator platform (low switching costs)

So what?

- Top 4 apps are AI coding tools (OpenClaw, Kilo Code, Claude Code, Cline).
- AI coding agents are the single largest LLM consumption scenario.
- Entertainment/roleplay apps still have notable usage.
- OpenClaw: 829B tokens/day (~3× #2).

Key Insights and Industry Implications

Condensed from OpenRouter usage signals (latest week of March 2025)

1) China-led usage shift

Chinese providers exceed ~54% combined share on an international aggregator platform.

2) Coding agents dominate demand

AI coding assistants are the single largest consumption scenario (top apps are coding tools).

3) Fragmentation persists

Market is highly fragmented: no provider exceeds 30% share; top 10 spans many providers.

4) Fast/affordable wins

Flash/Turbo variants see much higher real-world usage than flagship models.
