# This Week's Top 10 Models

Ranked by weekly token usage | Week of March 2025

| Rank | Model                  | Provider  | Weekly Token Usage | KEY INSIGHT |
|------|------------------------|-----------|--------------------|-------------|
| 1    | MiMo-V2-Pro            | Xiaomi    | 3.96T              |             |
| 2    | Step 3.5 Flash (free)  | Stepfun   | 1.49T              |             |
| 3    | MiniMax M2.7           | MiniMax   | 1.29T              |             |
| 4    | DeepSeek V3.2          | DeepSeek  | 1.24T              |             |
| 5    | Claude Sonnet 4.6      | Anthropic | 1.04T              |             |
| 6    | Claude Opus 4.6        | Anthropic | 995B               |             |
| 7    | Gemini 3 Flash Preview | Google    | 972B               |             |
| 8    | GLM 5 Turbo            | Zhipu     | 968B               |             |
| 9    | MiniMax M2.5           | MiniMax   | 909B               |             |
| 10   | Grok 4.1 Fast          | x-ai      | 599B               |             |

- Xiaomi's MiMo-V2-Pro dominates at 3.96T tokens — more than 2.5× the #2 model.
- Chinese providers hold 6 of the top 10 spots.
- MiniMax M2.7 posted the strongest growth at +253% WoW.
- Anthropic's two models combine for ~2T tokens, but growth is flat.
- Flash/Turbo variants far outpace flagship models in real-world usage.

# Provider Market Share Breakdown

Share of total weekly token volume across all providers

Market Share

## MARKET BREAKDOWN

|           |       |
|-----------|-------|
| Xiaomi    | 25.9% |
| Google    | 11.8% |
| Anthropic | 11.0% |
| MiniMax   | 8.5%  |
| OpenAI    | 7.9%  |
| Stepfun   | 6.8%  |
| DeepSeek  | 6.6%  |
| Zhipu     | 6.5%  |
| x-ai      | 3.9%  |
| Others    | 11.2% |

Combined Chinese share: 54.3% (Xiaomi + MiniMax + Stepfun + DeepSeek + Zhipu)

# Shifts in the Market Landscape

*Key competitive dynamics and emerging patterns*

## Chinese Models Break Through

Chinese providers (Xiaomi, Stepfun, DeepSeek, MiniMax, Zhipu) now hold 54%+ of the market on this international platform. Xiaomi's MiMo-V2-Pro alone commands nearly 4T tokens/week — a decisive cost-performance advantage.

## Flash/Turbo Variants Outpace Flagships

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash, and similar 'fast and affordable' models see far higher real-world usage than their flagship counterparts. Speed and cost trump peak performance in production.

## AI Coding Agents Dominate Usage

5 of the top 10 apps are coding tools. OpenClaw alone consumes 829B tokens/day — nearly 3× the second-place app. The largest commercial value proposition for LLMs today is helping developers write code.

## A Highly Fragmented Market

No single provider exceeds 30% share. The top 10 spans 8 different providers — competition remains fierce and the landscape is far from settled. Weekly token volume grew from ~2T to ~26T in just one year, signaling a rapidly expanding market.

# This Week's Rising Stars: Fastest-Growing Models

Week-over-week token usage growth | Top gainers across all providers

## DRIVERS OF SURGE

### MiniMax M2.7 +253%

Aggressive pricing with strong benchmark performance; strong adoption in Asian markets.

### MiMo-V2-Pro +165%

Xiaomi's flagship with best-in-class cost-efficiency; bundled in Xiaomi's device ecosystem.

### Cline +128%

Open-source VS Code autonomous coding agent; viral adoption among developers.

### Codex +112%

OpenAI's latest coding model; integrated into GitHub Copilot pipeline.

### Hermes Agent +92%

Nous Research's open-weight agent framework; popular in self-hosted deployments.

### Ampere +576%

New entrant with aggressive launch promotion; low base makes growth percentage dramatic.

# App Ecosystem: Who's Calling These Models

Top 10 apps by daily token consumption | AI coding tools dominate

| Rank                                                                          | App          | Category                  | Daily Token Volume | KEY TAKEAWAY |
|-------------------------------------------------------------------------------|--------------|---------------------------|--------------------|--------------|
| 1                                                                             | OpenClaw     | AI Productivity / Coding  | 829B               |              |

# Key Insights and Industry Implications

*What the data tells us about where the LLM market is heading*

## 01 Chinese Models Now Lead the Global Market

Xiaomi, DeepSeek, MiniMax, Stepfun, and Zhipu together hold 54%+ of an international platform. Xiaomi alone (25.9%) outpaces Google (11.8%) and Anthropic (11.0%). Cost-performance advantage is the key driver — these providers are not just competing domestically.

## 02 AI Coding Agents Are the Largest LLM Use Case

OpenClaw, Kilo Code, Claude Code, and Cline dominate the top apps ranking. The commercial value proposition is clear: LLMs help developers write code faster. This category now consumes more tokens than chat, search, or content generation.

## 03 The Market Is Highly Fragmented — No Outright Winner

No provider exceeds 30% share. The top 10 models span 8 different providers. This signals fierce ongoing competition and suggests the landscape will continue shifting. Diversified API strategies (multi-provider routing) are now a industry norm.

## 04 Affordable & Fast Beats Flagship in Real-World Usage

Flash, Turbo, and Lite variants consistently outperform flagship models in token volume. Step 3.5 Flash, GLM 5 Turbo, and Gemini 3 Flash Preview outpace their premium counterparts. For production workloads, latency and cost matter more than benchmark supremacy.
