

The 2025 LLM Usage Landscape: Real World Data from OpenRouter

Based on real usage data from millions of OpenRouter users, this deck reveals the competition

~26T

weekly token usage

Up from ~2T in the trend chart

Top 10

models span 8 providers

Competition remains fragmented

54.3%

Chinese provider share

Xiaomi + MiniMax + Stepfun + DeepSeek + Zhipu

Weekly token usage trend: ~2T → ~26T

This Week's Top 10 Models

Top models by weekly token usage; growth shown as week-over-week change

Rank	Model / Provider	Tokens	WoW
1	MiMo-V2-Pro Xiaomi	3.96T	+165%
2	Step 3.5 Flash (free) Stepfun	1.49T	+1%
3	MiniMax M2.7 MiniMax	1.29T	+253%
4	DeepSeek V3.2 DeepSeek	1.24T	+9%
5	Claude Sonnet 4.6 Anthropic	1.04T	-0%
6	Claude Opus 4.6 Anthropic	995B	+2%
7	Gemini 3 Flash Preview Google	972B	+3%
8	GLM 5 Turbo Zhipu (z-ai)	968B	-6%
9	MiniMax M2.5 MiniMax	909B	-30%
10	Grok 4.1 Fast x-ai	599B	+32%

Readout

MiMo-V2-Pro leads at 3.96T tokens (+165% WoW); MiniMax M2.7 posts the strongest top-10 growth at +253%.

Chinese providers hold 6 of the top 10 model slots.

Shifts in the Market Landscape

Usage growth, regional competition, and practical model selection are reshaping the market

1. Chinese providers break through

Xiaomi, MiniMax, Stepfun, DeepSeek, and Zhipu combine for 54.3% market share on OpenRouter.

2. Fast / affordable wins usage

Step 3.5 Flash, GLM 5 Turbo, and Gemini 3 Flash show that speed and cost often matter more than peak performance.

3. Incumbent growth pressure

Anthropic maintains two top-10 models, yet combined Sonnet 4.6 + Opus 4.6 growth is essentially stalled (+0% / +2%).

Cline

coding-agent demand signal

Likely demand drivers

Cost-performance advantage for Chinese models

Agentic coding workflows expanding token demand

Fast variants matching production latency needs

Investor / product signal

Growth is concentrated in practical workloads, not only flagship model benchmarks.

App Ecosystem: Who's Calling These Models

Top applications reveal that AI coding tools are the largest real-world consumption scenario

829B

OpenClaw tokens/day

Nearly 3× Kilo Code

Top 4

are AI coding tools

OpenClaw, Kilo Code, Claude Code, Cline

#	App	Category / description	B/day
1	OpenClaw	AI productivity assistant	829
2	Kilo Code	VS Code AI coding assistant	271
3	Claude Code	Anthropic's CLI coding tool	78
4	Cline	VS Code autonomous coding agent	69.1
5	Janitor AI	Character roleplay chat	29.2

Usage implication

Coding agents now combine high frequency, long context, tool calls, and iterative loops—the recipe for heavy token consumption.

Key Insights and Industry Implications

What the OpenRouter usage data implies for R&D, product, and investment decisions

1

Chinese models are mainstream

Chinese providers combine for 54.3% share; Xiaomi leads at 25.9%.

2

Coding agents drive consumption

The top 4 apps are AI coding tools; OpenClaw alone uses 829B tokens/day.

3

No outright winner yet

The top 10 models span 8 providers, and no provider exceeds 30% share.

4

Fast and affordable beats flagship

Flash/Turbo variants outpace flagship models in real-world usage.

Strategic lens: optimize for production economics, agent workloads, and multi-provider optionality.
