Key Insights and Industry Implications

01 Chinese Models Hold Dominant Global Share

With 54%+ combined share on an international platform, Chinese providers (Xiaomi, MiniMax, Stepfun, DeepSeek, Zhipu) have achieved a decisive lead in real-world LLM usage, driven by aggressive cost-performance optimization.

02 AI Coding Agents Are the #1 LLM Use Case

5 of the top 10 apps by token consumption are coding tools. AI-assisted development represents the single largest commercial value proposition for LLMs today.

03 The Market Is Highly Fragmented

The top 10 models span 8 different providers, and no single provider exceeds 30% share. Competition remains fierce and the landscape is far from settled — there is no outright winner yet.

04 Fast & Affordable Beats Flagship

Flash/Turbo variants (Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash) consistently outpace flagship models in real-world usage. Users are voting with their feet: speed and cost matter more than peak benchmark performance.
