Provider Market Share Breakdown

Key Insights

- Xiaomi leads decisively at 25.9%, more than double second-place Google (11.8%)
- Combined Chinese provider share exceeds 54% of total market
- OpenAI ranks only fifth at 7.9%
- Market is highly fragmented — no single provider exceeds 30%

Shifts in the Market Landscape

Chinese models now hold over 54% combined market share on this international platform — Xiaomi, Stepfun, DeepSeek, MiniMax, and Zhipu together dominate usage.

Anthropic's growth has stalled despite maintaining two models in the top 10 (Sonnet 4.6 and Opus 4.6), with near-flat week-over-week change.

Flash/Turbo 'fast and affordable' variants far outpace flagship models in real-world usage — users prioritize speed and cost over peak performance.

Weekly token usage has grown from ~2T to ~26T, underscoring a rapidly expanding market with massive scale-up.

Key Insights and Industry Implications

1. Chinese models now hold a dominant share in the global market

Xiaomi, MiniMax, Stepfun, DeepSeek, and Zhipu together exceed 54% of token volume on an international platform — a historic shift in global LLM competitiveness.

2. AI coding agents are the single largest LLM consumption scenario

5 of the top 10 apps are coding tools. OpenClaw alone consumes 829B tokens/day — nearly 3× the second-place app — confirming developer productivity as the killer use case.

3. The model market is highly fragmented with no outright winner

The top 10 models span 8 different providers. No single provider exceeds 30% share, signaling fierce competition and a landscape far from settled.

4. Affordable and fast models (Flash/Turbo variants) far outpace flagships in usage

Step 3.5 Flash, GLM 5 Turbo, and Gemini 3 Flash all rank above their flagship counterparts. Users vote with tokens: speed and cost often trump peak benchmark performance.
