Shifts in the Market Landscape

✓ Usage is scaling rapidly (~2T → ~26T weekly tokens) while fast variants and China-led providers take share.

- ### Three competitive shifts
- 1. China breakout**
Chinese providers (Xiaomi, Stepfun, DeepSeek, MiniMax, Zhipu) exceed
 - 2. Anthropic plateau**
Two models remain in the top 10, but overall growth is ~flat this week.
 - 3. Fast variants win**
Flash/Turbo “fast & affordable” variants far outpace flagship models

Implication: real-world demand prioritizes cost/speed and workflow fit (especially coding), not just peak benchmarks.

This Week's Rising Stars: Fastest-Growing Models

✓ MiniMax M2.7 (+253%) and Xiaomi MiMo-V2-Pro (+165%) lead WoW growth.

WoW growth

⚡ Why they surged

- Cost/performance advantages are translating into real token volume
- “Fast” variants (Flash/Turbo) align with production constraints
- Coding agents (e.g., Cline) are a major demand driver.

App Ecosystem: Who's Calling These Models

✓ AI coding tools dominate: OpenClaw (829B/day) leads, followed by Kilo Code and Claude Code.
