Provider Market Share Breakdown

By token volume · Latest week of March 2025

Provider Share by Token Volume (%)

25.9% Xiaomi — #1 provider

>54% Combined Chinese providers

11.0% Anthropic — 3rd place

7.9% OpenAI — ranked 5th only

Shifts in the Market Landscape

Key competitive dynamics emerging in 2025

Chinese Providers Dominate Globally

On OpenRouter — an international platform — Chinese providers (Xiaomi, MiniMax, Stepfun, DeepSeek, Zhipu) now hold >54% combined market share. Xiaomi alone leads with 25.9%.

Flash / Turbo Variants Outpace Flagships

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash, and similar 'fast & affordable' models far outpace their flagship counterparts in real-world usage. Users optimise for speed and cost over peak benchmark performance.

Anthropic Growth Has Stalled

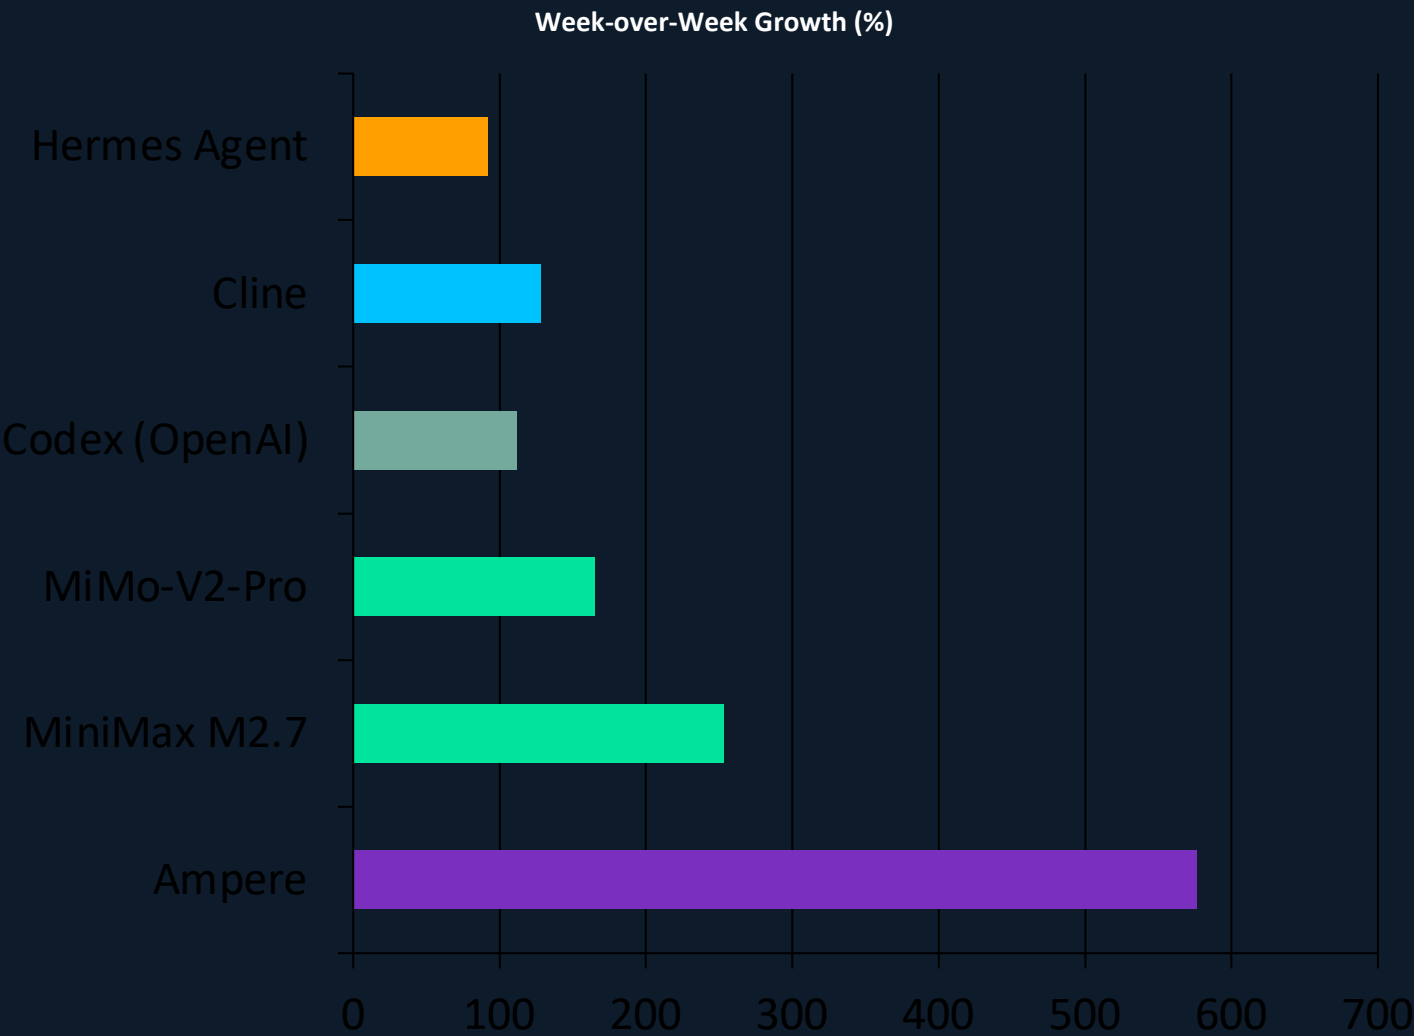

Anthropic holds two models in the top 10 (Sonnet 4.6 + Opus 4.6, ~2T combined), but WoW growth is flat (~0–2%). Market share is being eroded by aggressively priced Chinese models.

The Market Is Rapidly Expanding

Total weekly token volume on OpenRouter has grown from ~2T (March 2025) to ~26T — a 13× increase in 12 months — with no single provider exceeding 30%.

Key Insights and Industry Implications

Synthesised from OpenRouter usage data · March 2025

01

Chinese Models Now Lead the Global Market

Chinese providers hold >54% combined market share on the international OpenRouter platform. Xiaomi, MiniMax, Stepfun, DeepSeek, and Zhipu are rewriting competitive dynamics with strong cost-performance advantages.

02

AI Coding Agents Are the #1 LLM Use Case

5 of the top 10 apps are coding tools (OpenClaw, Kilo Code, Claude Code, Cline, Roo Code). AI-assisted development is the single largest commercial consumption scenario for LLMs today.

03

Highly Fragmented — No Outright Winner

No single model or provider exceeds 30% market share. The top 10 spans 8 providers. Competition is fierce and the landscape is far from settled — creating both opportunity and risk.

04

Affordable Speed Beats Benchmark Peaks

Flash / Turbo variants (Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash) far outpace flagship models in real-world usage volume. Users are voting with usage: speed and cost beat raw capability scores.
