Shifts in the Market Landscape

Key competitive dynamics reshaping the LLM market

Chinese Models Break Through

On OpenRouter, an international platform, Chinese provider models now account for over half of all usage. Xiaomi's MiMo series, DeepSeek V3, and MiniMax's M2 series hold a significant cost-performance advantage.

Anthropic Growth Has Stalled

Despite maintaining two models in the top 10 (Sonnet 4.6 + Opus 4.6), combined growth is flat. The two models together total ~2T tokens, but neither is gaining momentum.

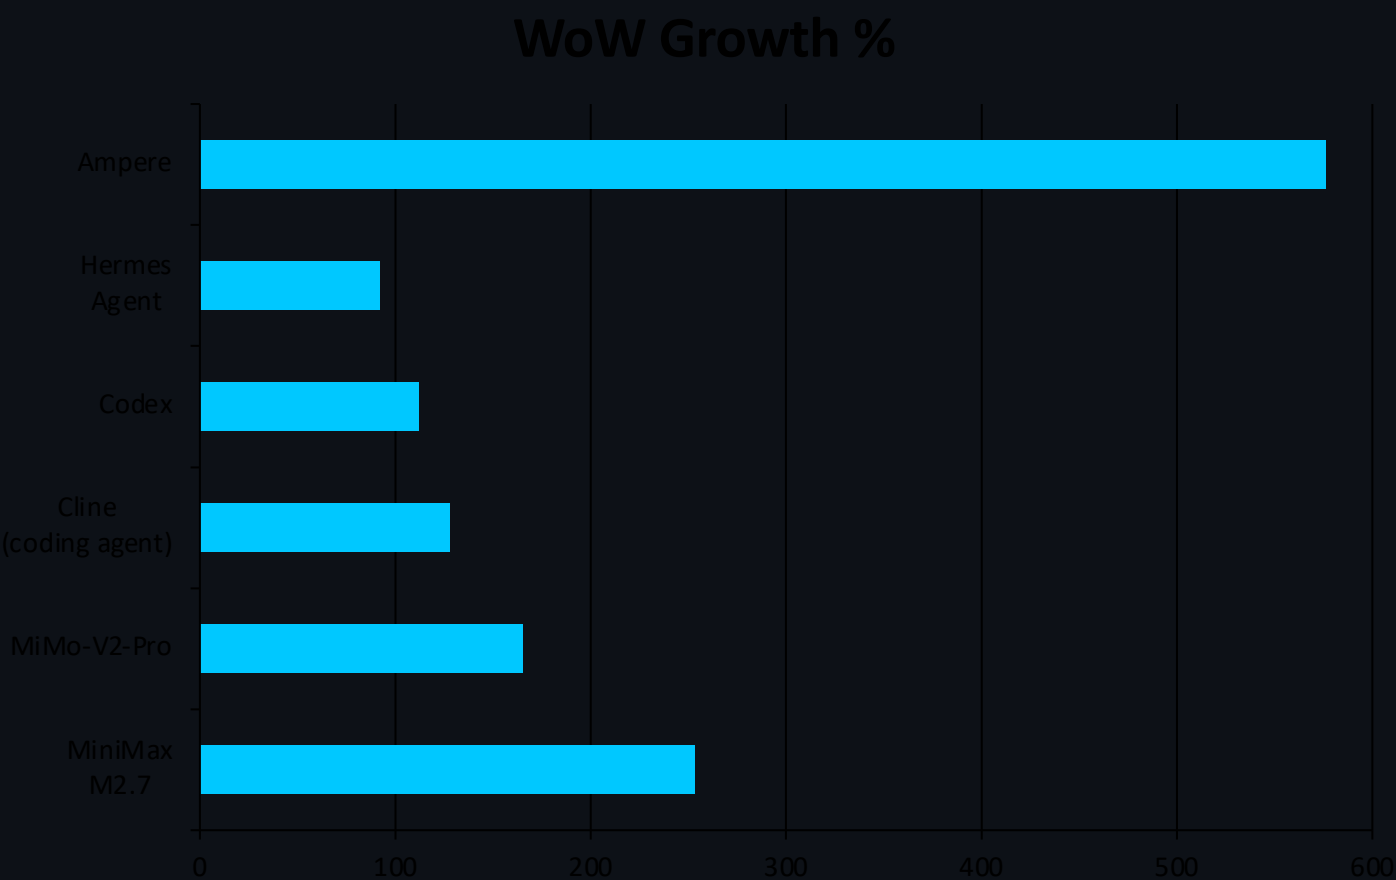

Flash/Turbo Variants Outpace Flagships

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash, and other 'fast and affordable' models see far higher usage than their flagship counterparts. Speed and cost often matter more than peak performance.

Weekly token usage grew from ~2T to ~26T over the past year — a 13× expansion signaling rapidly accelerating demand.

Key Insights and Industry Implications

What the data means for R&D, product, and investment decisions

01

Chinese Models Now Hold Dominant Global Share

On an international platform, Chinese providers (Xiaomi, MiniMax, Stepfun, DeepSeek, Zhipu) command >54% of total token volume. Cost-performance is their decisive edge.

02

AI Coding Agents Are the #1 Usage Category

5 of the top 10 apps are developer tools. OpenClaw alone consumes 829B tokens/day. For infrastructure and API providers, this is the highest-ROI segment to optimize.

03

The Market Is Highly Fragmented — No Outright Winner

The top 10 models span 8 different providers. No single provider exceeds 30% share. Competition remains fierce and the landscape is far from settled.

04

Affordable & Fast Models Outpace Flagships in Usage

Flash/Turbo variants (Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash) see far higher real-world adoption than flagship models. Users prioritize speed and cost over peak benchmark scores.
