Trending ranking method

Total Score = Stars score + Forks score + Base score

The brief ranks the top 20 repositories by this composite score.

This deck preserves the source ranking and only visualizes metrics explicitly provided: stars, forks, pushes, PRs, languages, and categories.

Key Takeaways: AI Coding Agents Are GitHub's Hottest Category

Strategic implications for developer tooling teams and open-source community leaders

AI agent dominance

14 of the top 20 repos (70%) are AI coding agent tools, skills, or related resources

Claude Code ecosystem explosion

At least 7 repos serve as skills, guides, best-practice collections, or multi-tool switchers.

Python leads; TypeScript follows

Python powers 35% of trending repos; TypeScript contributes 20% across top 20 repos

Engagement is concentrated

hermes-agent attracted 78 PRs in 24 hours; 8 of 20 repos have zero PRs.

Token efficiency is a sub-theme

caveman cuts 75% of tokens; rtk reduces LLM token consumption by 60–90%.

Strategic readout: AI coding assistance has moved from isolated tools to an ecosystem race across agents, skills, guides, and cost controls.
