Takeaways: What These Trends Mean for Hiring & Retention

- **Full-time employment softening:** Plan for more contractors and freelancers as full-time roles dip, especially in the U.S.
- **In-person mandates growing but hybrid still dominant:** Hybrid (42%) is the norm, though in-person has reached 20%.
- **DevRel and SRE roles command premium pay:** Highly technical ops and leadership roles require premium compensation (\$99K-127K+).
- **Language choice correlates with pay:** Niche functional languages (Erlang, Clojure) pay significantly more than mainstream ones (JS, PHP).
- **Most developers influence purchasing:** 62% have a say in tech buying. Engage individual contributors directly, not just management.
