
State of the Web 2020–2025

Tracking Page Weight, Protocols & Security at Scale

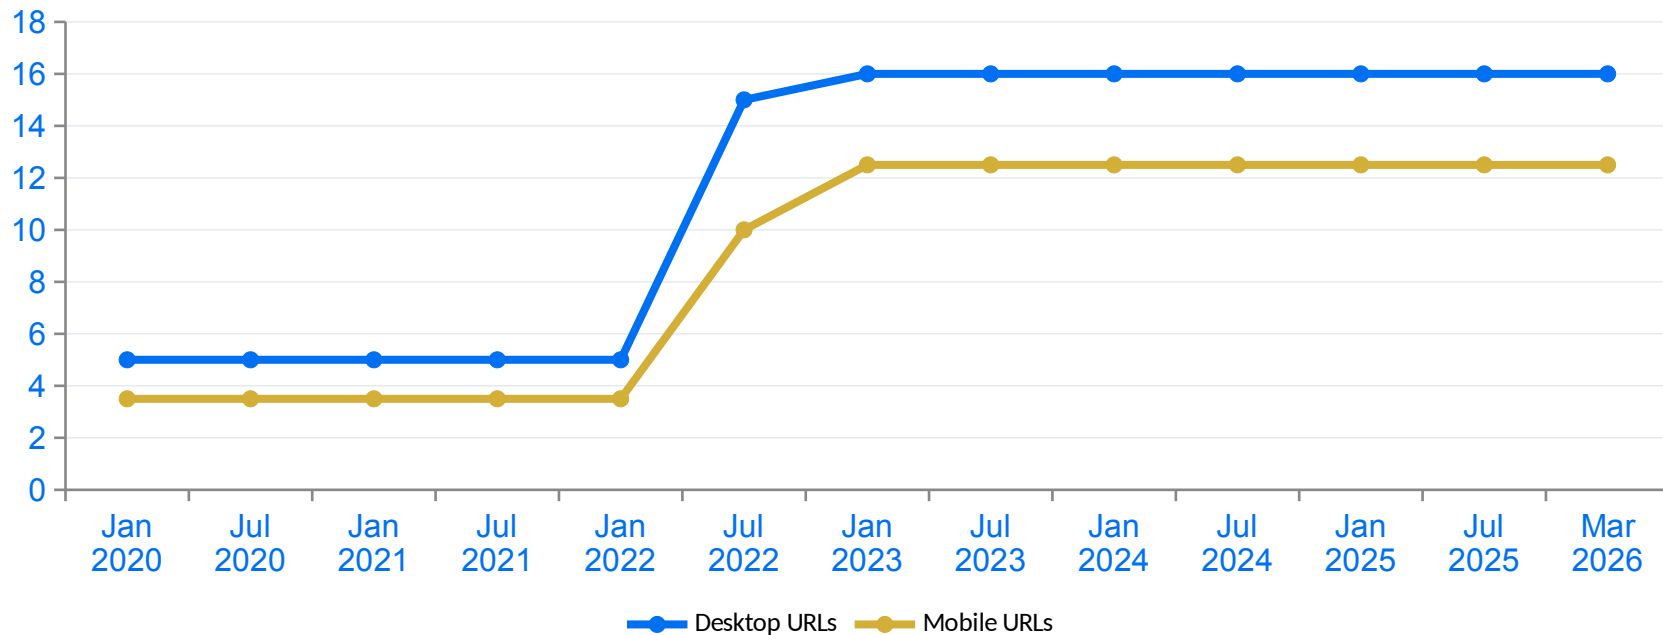

HTTP Archive — State of the Web Report

January 2020 – March 2026

Web Performance Engineers & Front-End
Architects

Crawl Sample Size Tripled: From ~5M to 16M Desktop URLs Since 2020

HTTP Archive continuously crawls millions of URLs. The sample expanded sharply in mid-2022 and has since stabilized.

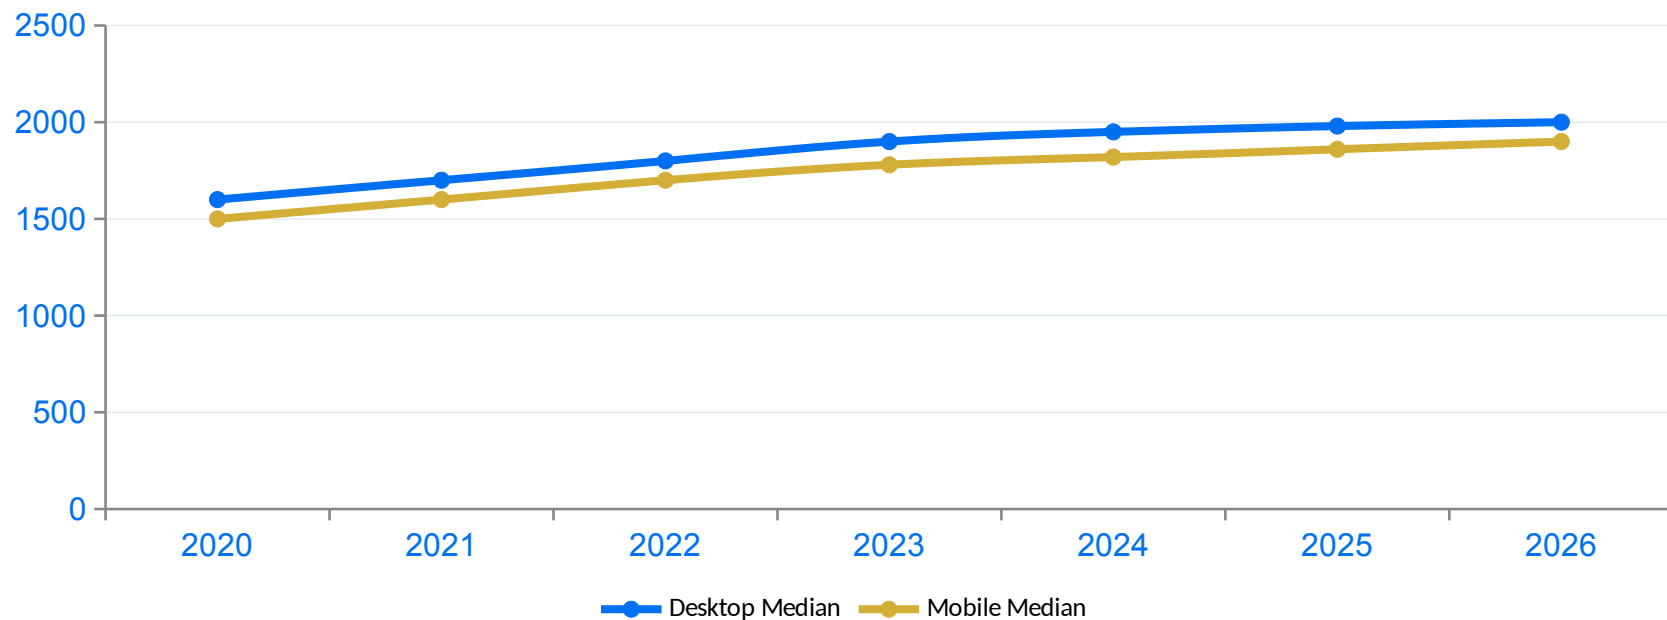

Desktop: ~16M

Mobile: ~12.5M

Median Page Weight Climbs Steadily to ~2,000 KB on Desktop

Median total transfer size has risen ~25% since 2020. The 75th-percentile desktop page now exceeds 4,000 KB.

Desktop ~2,000 KB

Mobile ~1,900 KB

+25% since 2020

76 Requests per Desktop Page While TCP Connections Drop to 12

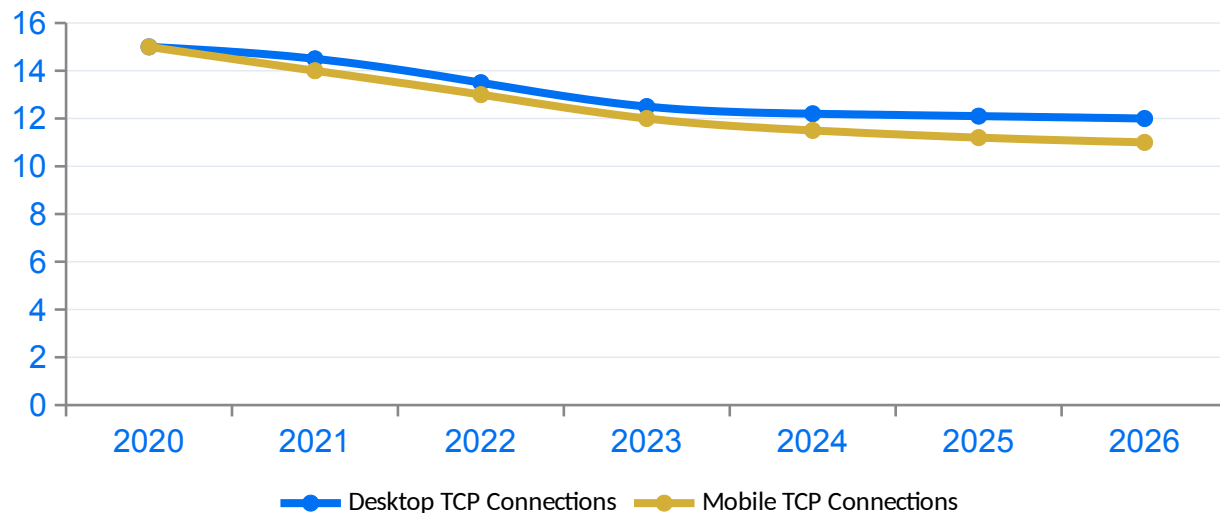

Request counts edge up ~3%, but multiplexing in HTTP/2 and HTTP/3 drives TCP connections down 15–27%.

HTTPS Requests Reach 99%: Encryption Is Now the Default

Unencrypted HTTP is effectively extinct on the modern web.

99.2%

Desktop HTTPS Requests

Mobile: 99.1%

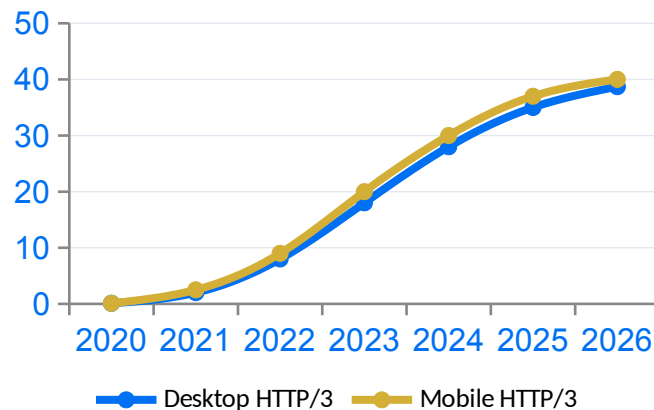

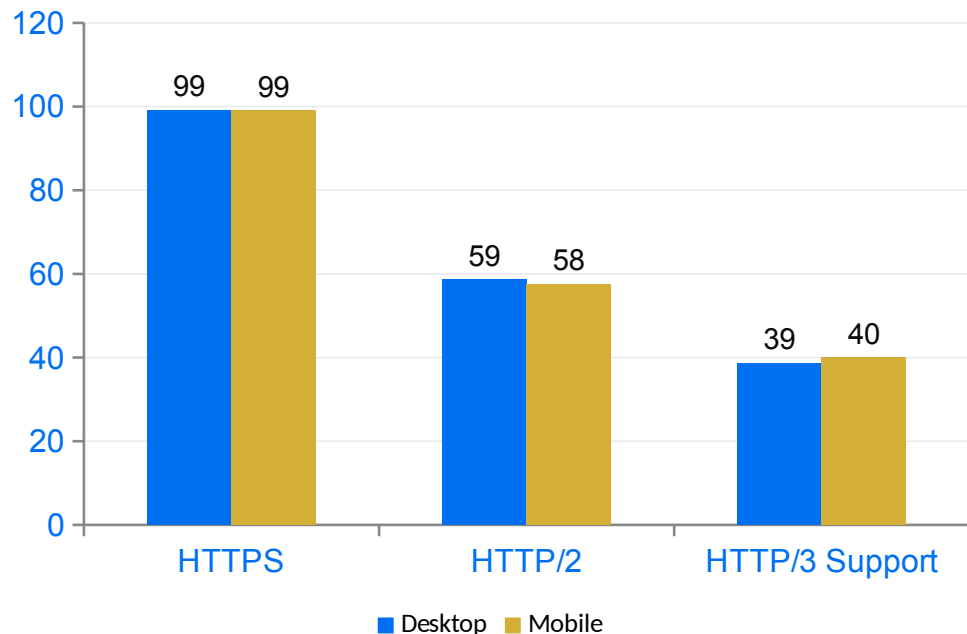

▲ ~19–20 percentage points since early 2020

HTTP/2 Holds at ~58% While HTTP/3 Support Surges to 40%

HTTP/3 support has exploded from near-zero to ~40% in under four years. Note: HTTP Archive measures support, not first-connection usage.

Font-Display Usage Reaches 42% on Mobile, Up 61% Since 2020

The font-display CSS property avoids Flash of Invisible Text (FOIT) during web font loading. More than half of pages still risk FOIT.

40.1%

▲ 14.9% since 2020

42.5%

Mobile
▲ 61.0% since 2020

Insight

With ~58–60% of pages not using font-display, there is significant room to improve perceived performance and eliminate FOIT.

Key Takeaways: Bigger Pages, Smarter Protocols, Stronger Security

01

Page weight keeps climbing

Median desktop pages now transfer ~2,000 KB, roughly 25% heavier than in 2020.

02

HTTPS is the new baseline

At 99%+ of requests, unencrypted HTTP is essentially extinct on the modern web.

03

HTTP/3 is the fastest-growing protocol metric

From near-zero to ~40% support in under four years, rapidly becoming mainstream.

04

Fewer TCP connections despite more requests

Multiplexing in HTTP/2 and HTTP/3 has cut median connections per page by 15–27%.

05

Font-display still underused

At ~40–42% adoption, significant room remains to improve FOIT avoidance.

Call to Action: Benchmark your own sites against these baselines and prioritize protocol and font-loading optimizations
