

State of the Web 2020–2025

HTTP Archive Trends in Page Weight, Protocols, and Security

Data Source: HTTP Archive — State of the Web Report | Coverage: January 2020 – March 2026

Crawl Sample Size Tripled: From ~5M to 16M Desktop URLs Since 2020

Desktop

~5M → 16M URLs

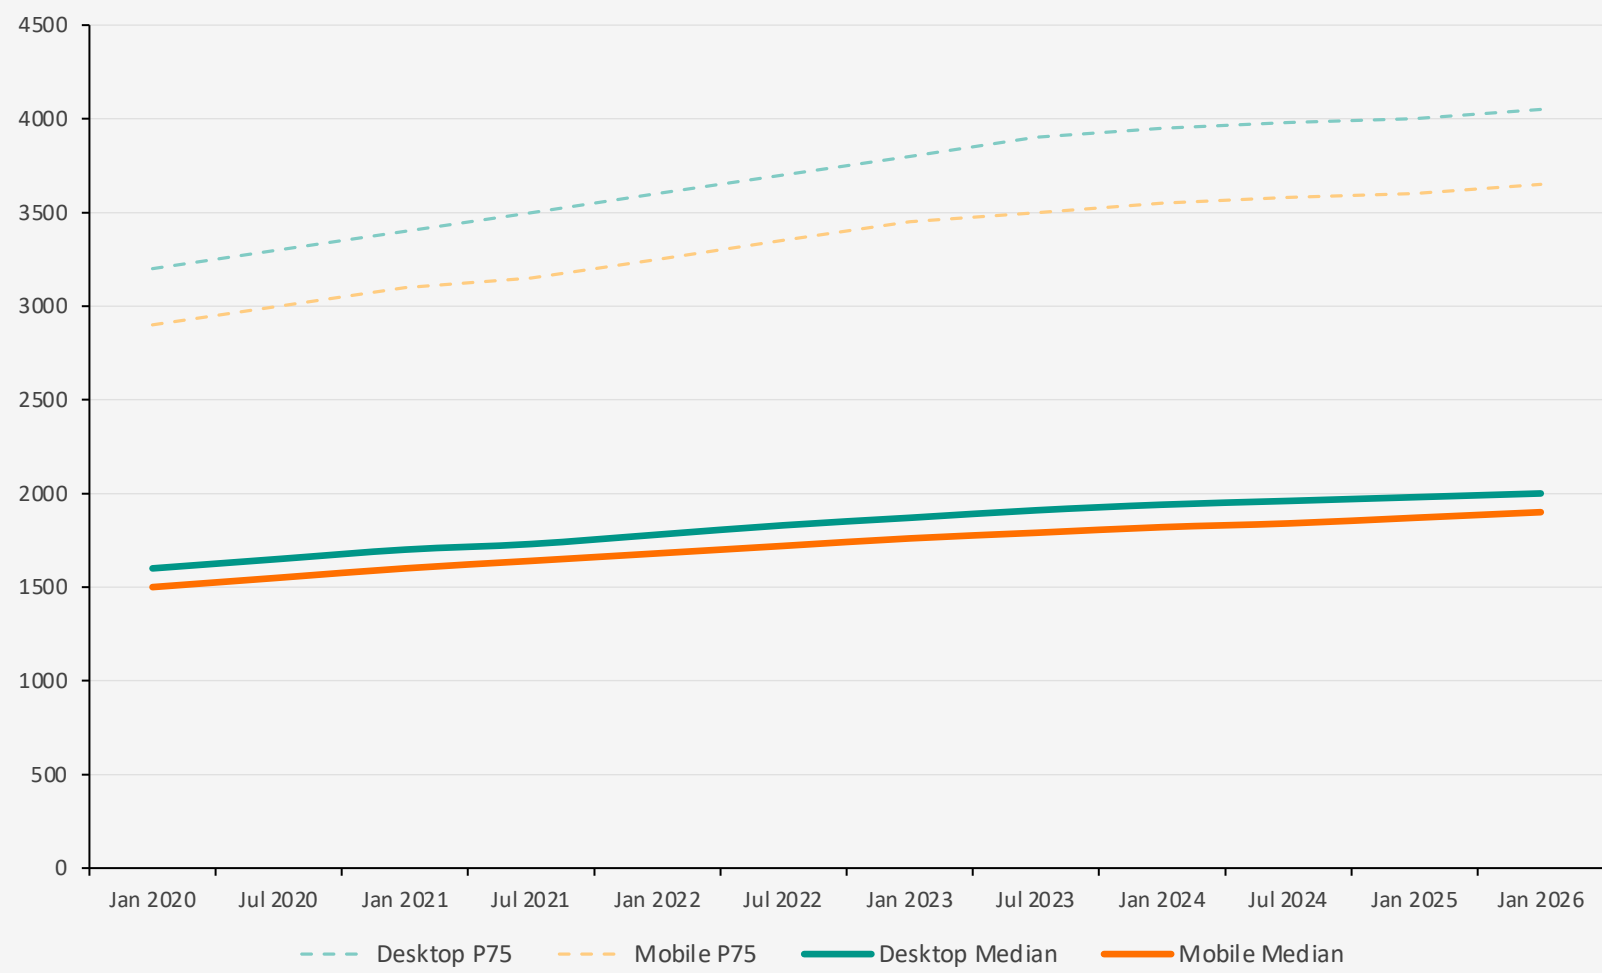

+220% growth

Mobile

~3.5M → 12.5M URLs

+257% growth

Median Page Weight Climbs Steadily to ~2,000 KB on Desktop

Desktop Median

~2,000 KB

▲ ~25% since 2020

Mobile Median

~1,900 KB

▲ ~25% since 2020

P75 Desktop

>4,000 KB

Source: HTTP Archive — State of the Web Report | Jan 2020 – Mar 2026

76 Requests per Desktop Page While TCP Connections Drop to 12

Total Requests per Page (Median)

76

Desktop

▲ 2.7% since 2020

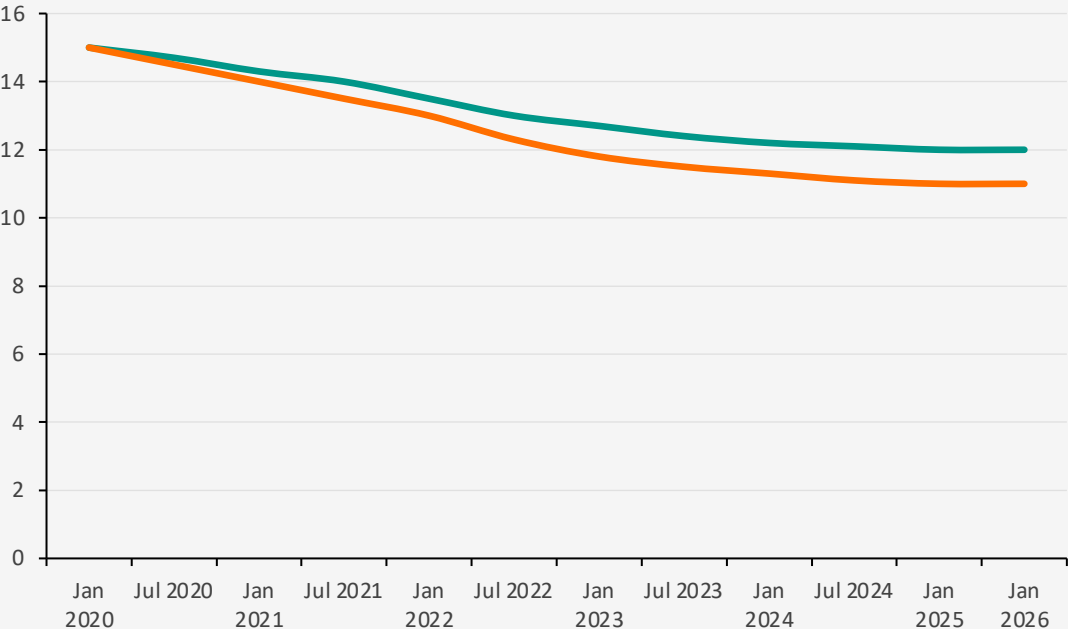

71

Mobile

▲ 2.9% since 2020

Request counts continue to rise modestly, driven by richer page compositions and third-party resources.

TCP Connections per Page (Median)

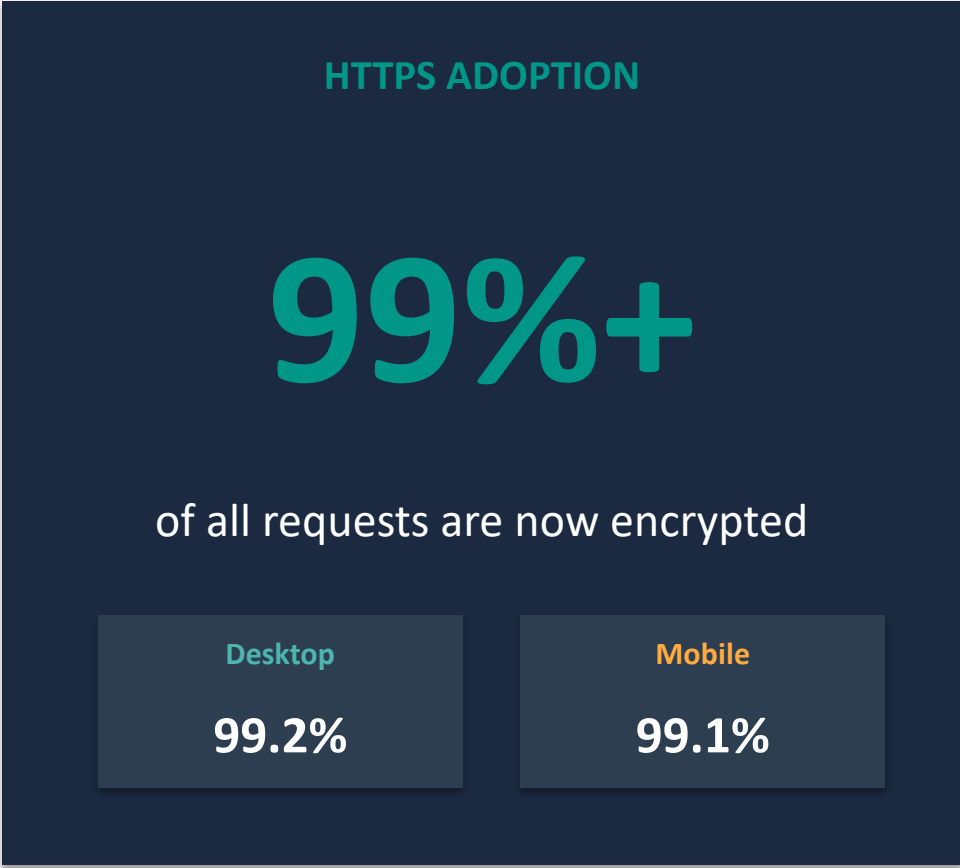

Multiplexing in HTTP/2 and HTTP/3 drives fewer connections despite more requests.

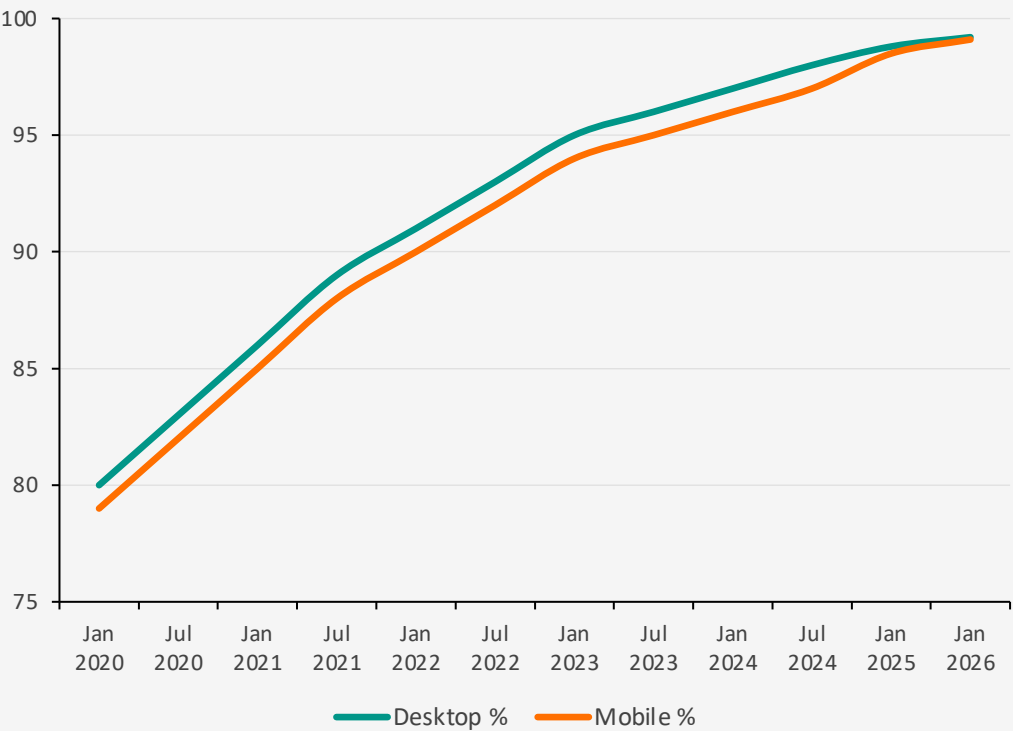

Desktop ▼ 14.3%

Mobile ▼ 26.7%

HTTPS Requests Reach 99%: Encryption Is Now the Default

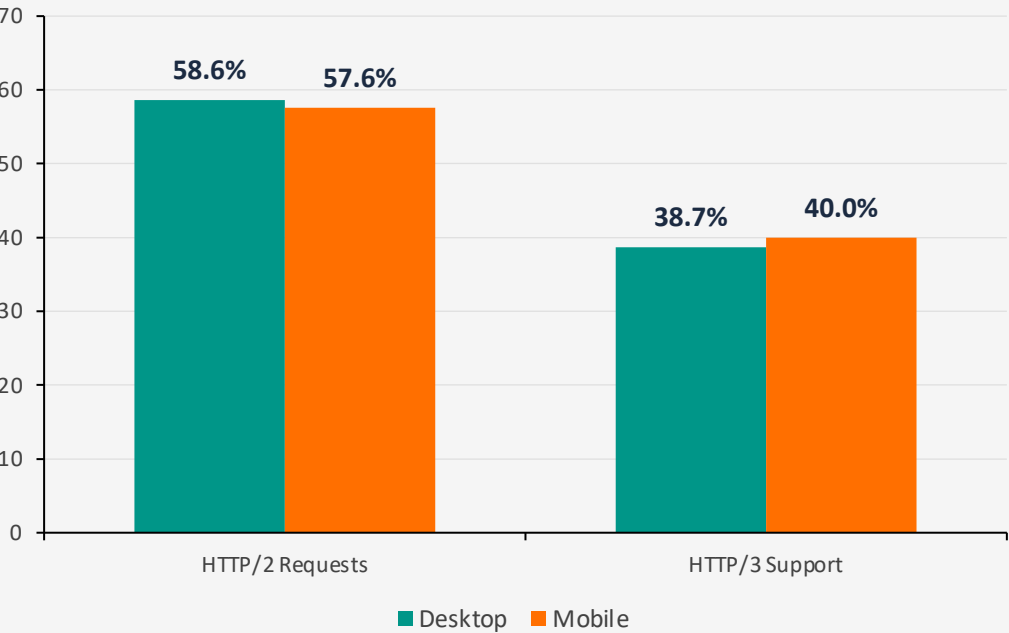

HTTPS Adoption Over Time

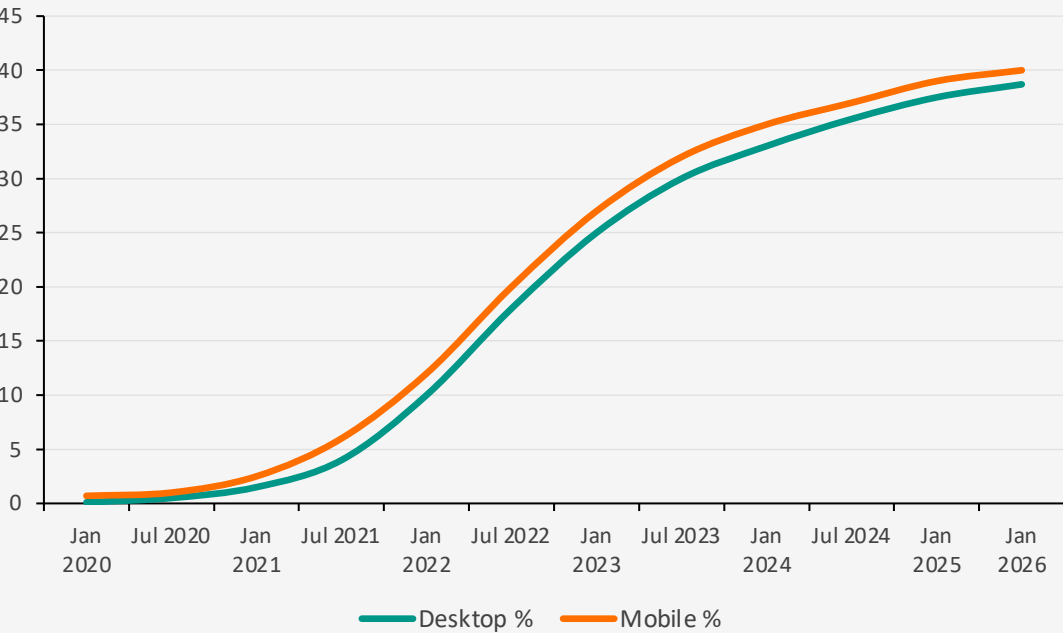

▲ ~19–20 percentage points from ~80% in early 2020 | Plaintext HTTP is effectively gone

HTTP/2 Holds at ~58% While HTTP/3 Support Surges to 40%

Protocol Adoption — Latest Snapshot

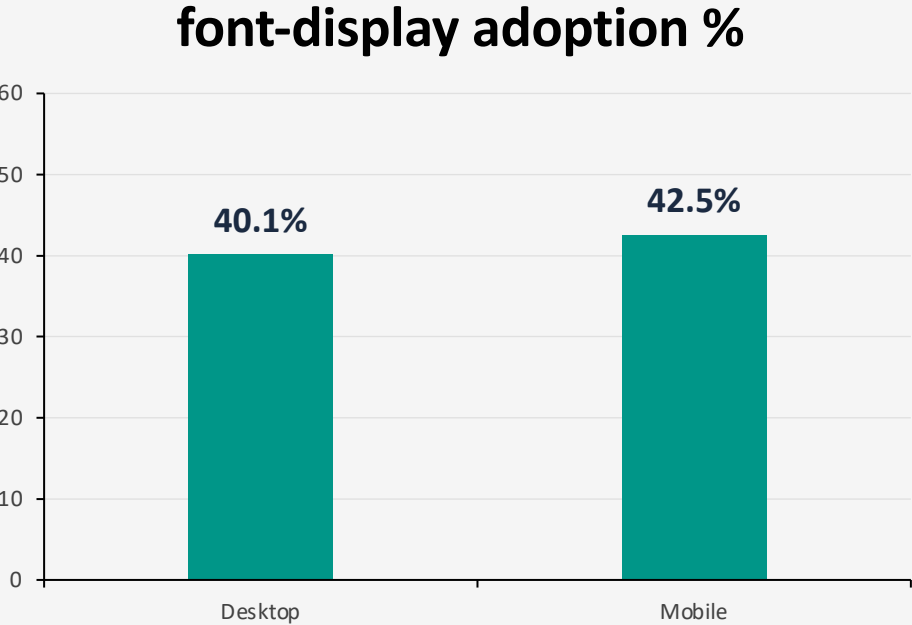

HTTP/3 Support Growth Over Time

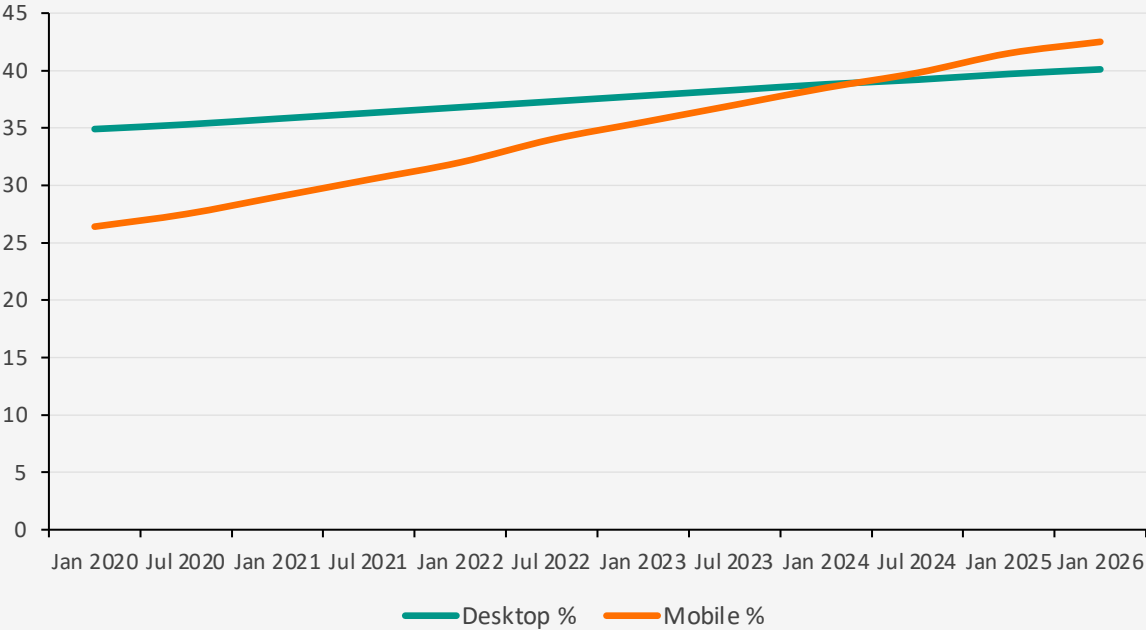

Measurement note: HTTP Archive measures HTTP/3 support rather than actual usage. Fresh Chrome instances default to HTTP/2 on first connection before discovering HTTP/3 capability via Alt-Svc headers. Desktop growth from near-zero is reported as +38,600%; mobile as +5,614%.

Font-Display Usage Reaches 42% on Mobile, Up 61% Since 2020

Current Adoption (Lighthouse)

Adoption Growth Trajectory

The font-display CSS property avoids the Flash of Invisible Text (FOIT) during web font loading. With >50% of pages still not using font-display, there is significant room for improvement. Desktop adoption grew ▲ 14.9%; mobile ▲ 61.0% since 2020.

Key Takeaways: Bigger Pages, Smarter Protocols, Stronger Security

Page Weight Keeps Climbing

Median desktop pages now transfer ~2,000 KB — roughly 25% heavier than 2020. The P75 exceeds 4,000 KB, driven by richer media and JavaScript.

HTTPS Is the New Baseline

At 99%+ of requests (99.2% desktop, 99.1% mobile), unencrypted HTTP is essentially extinct on the modern web.

HTTP/3 Is the Fastest-Growing Metric

From near-zero to ~39–40% support in under four years, HTTP/3 is rapidly becoming mainstream while HTTP/2 holds steady at ~58%.

Fewer TCP Connections Despite More Requests

Multiplexing in HTTP/2 and HTTP/3 has cut median connections per page by 15–27%, improving network efficiency even as request counts rise.

Font-Display Still Underused

At ~40–42% adoption, more than half of pages still risk FOIT. Mobile grew 61% since 2020, but significant headroom remains.
