

State of the Web 2020–2025

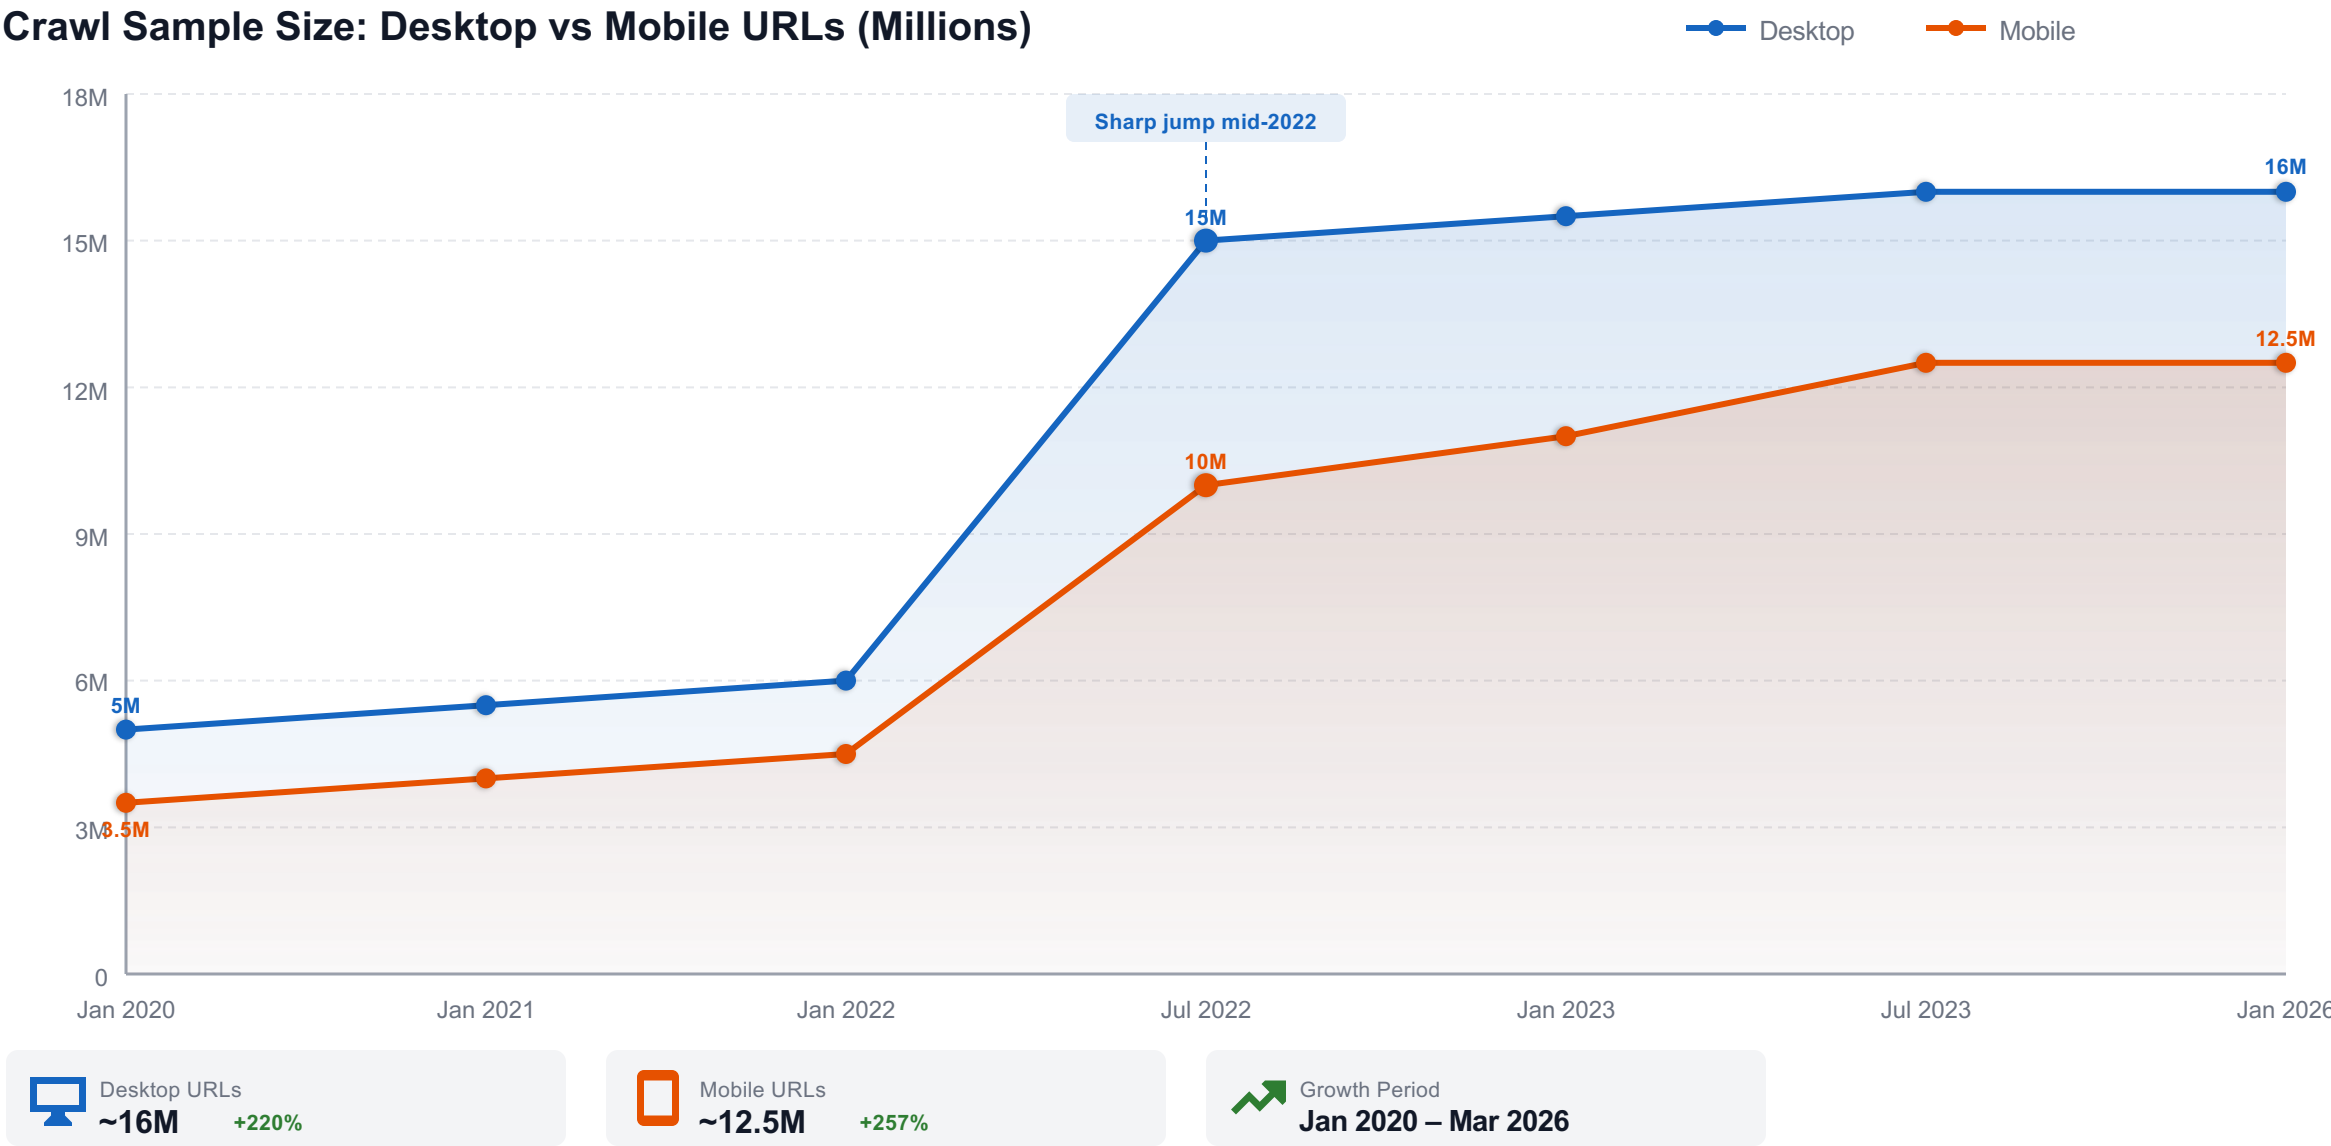

HTTP Archive Trends in Page Weight, Protocols, and Security

DATA SOURCE: HTTP Archive | Jan 2020 – Mar 2026

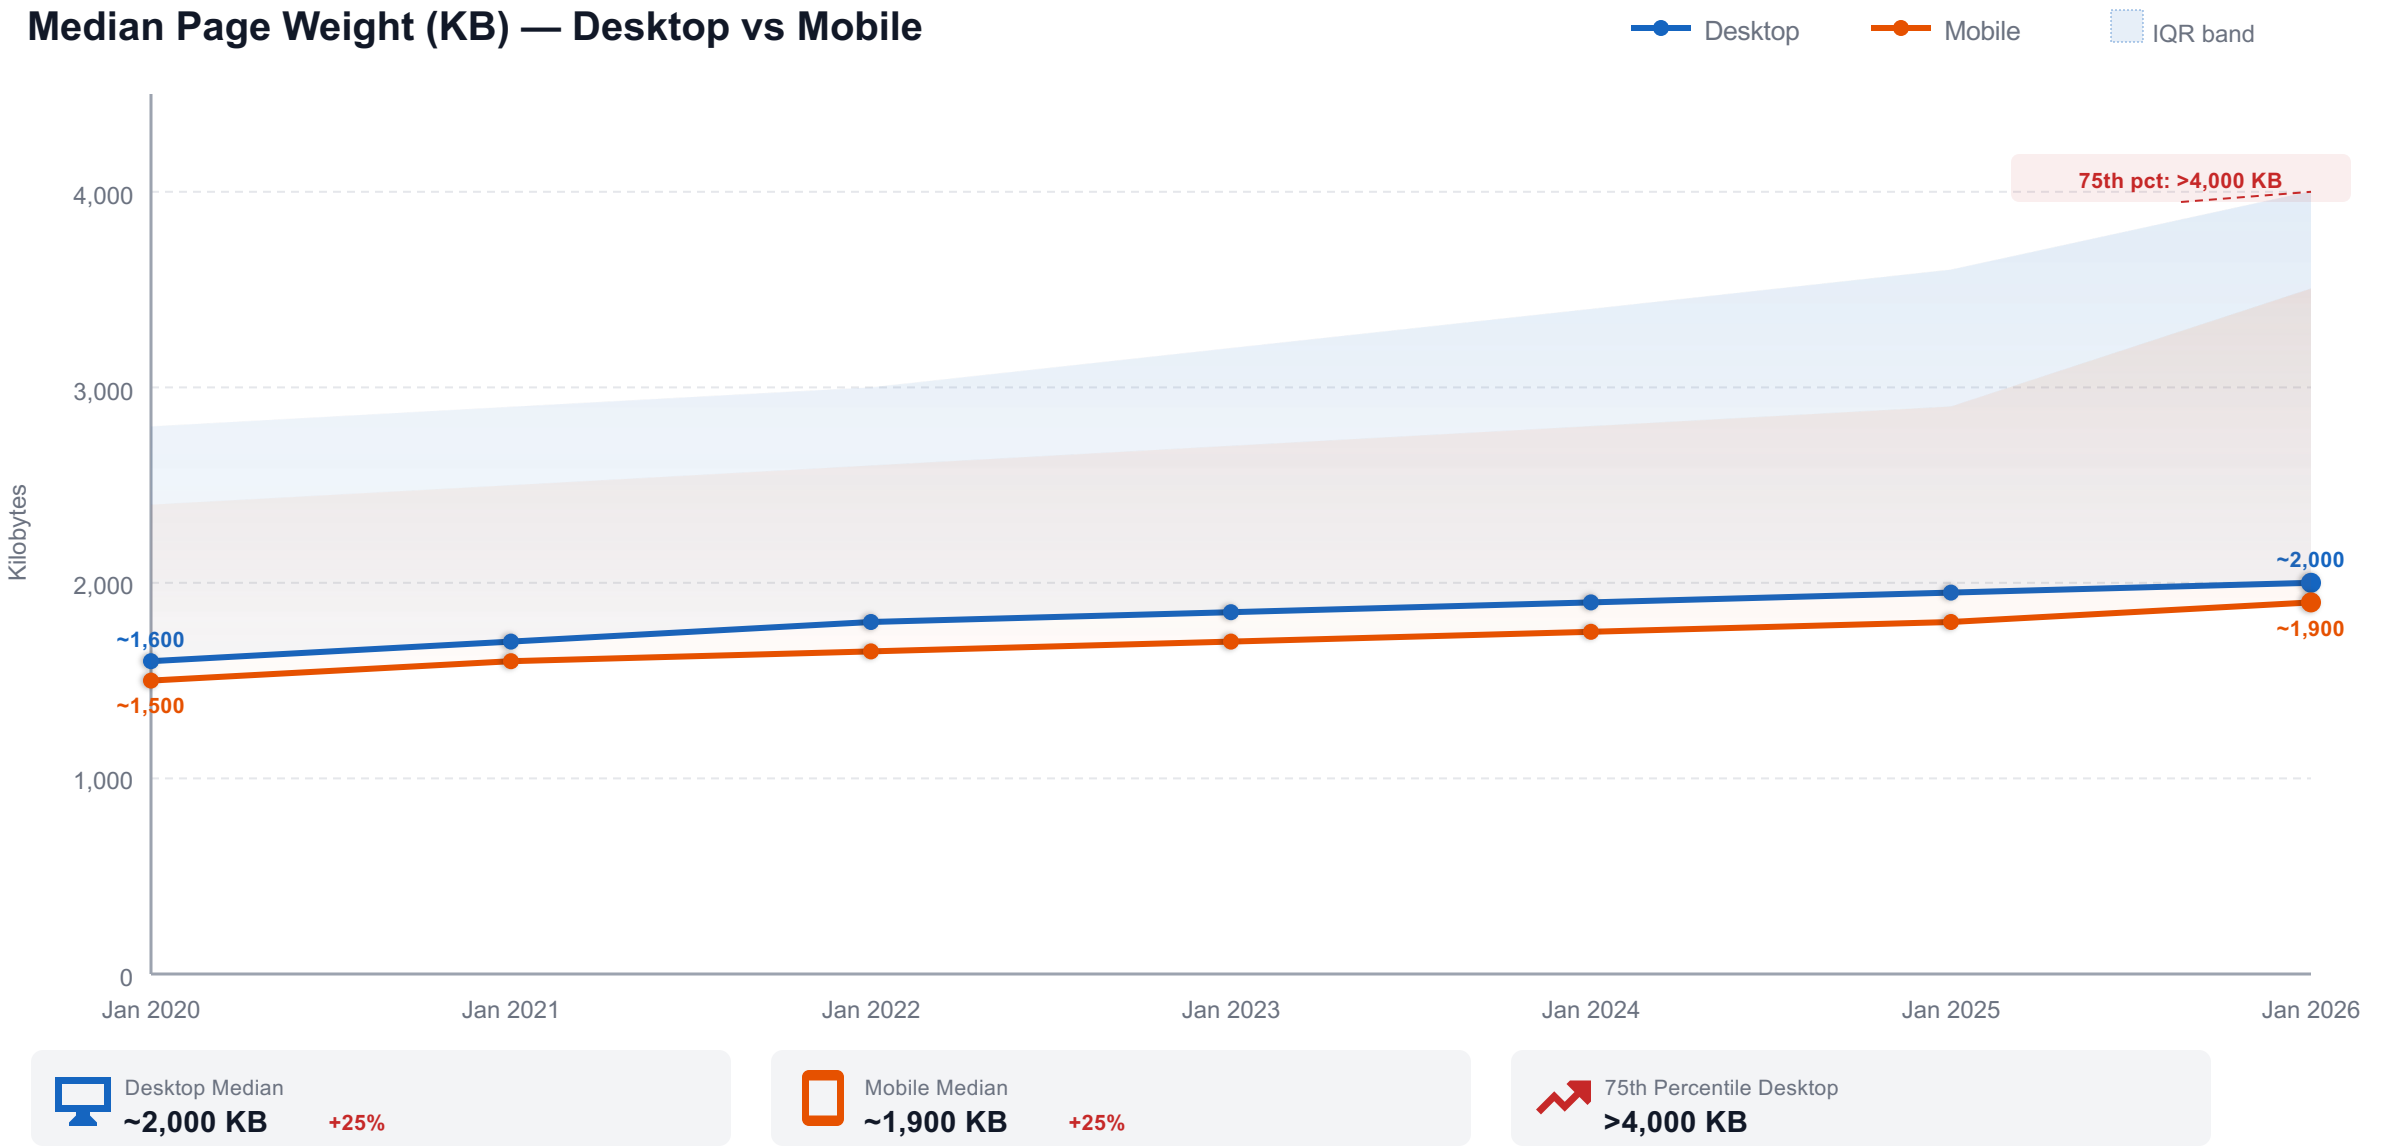

Sample size tripled for desktop and grew 3.5x for mobile, providing more representative data

Crawl Sample Size: Desktop vs Mobile URLs (Millions)

Desktop median page weight grew ~25% over five years, with the heaviest quartile exceeding 4,000 KB

Median Page Weight (KB) — Desktop vs Mobile

More requests, fewer connections — multiplexing efficiency gains from HTTP/2 and HTTP/3

Desktop

76

requests per page (median)

▼ +2.7%

vs. 2020 baseline

Mobile

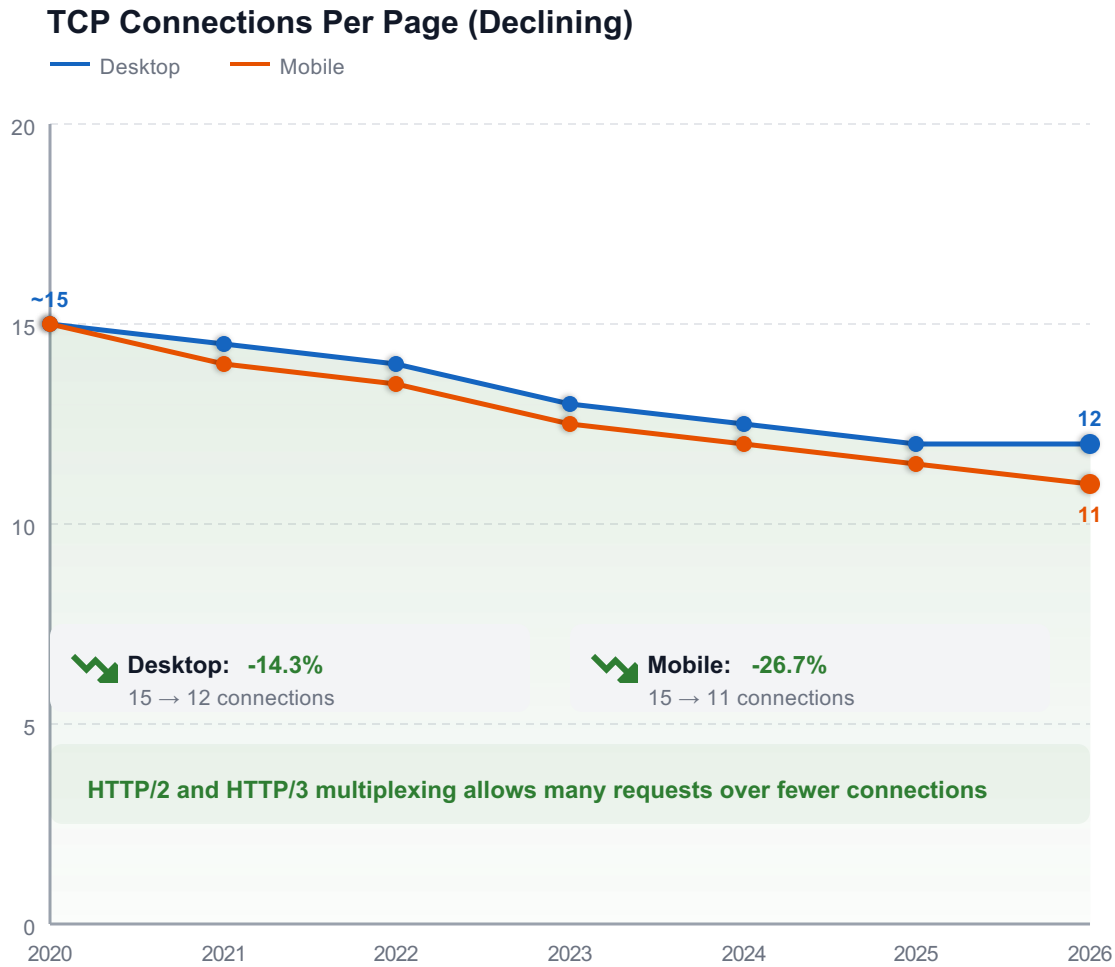

71

requests per page (median)

▼ +2.9%

vs. 2020 baseline

Request counts are up ~3%
on both desktop and mobile since 2020

Plaintext HTTP is effectively extinct — 99%+ of requests now encrypted

99%+
HTTPS Requests

 Desktop
99.2%

 Mobile
99.1%

▼ +19–20 pp since 2020 (~80% → 99%+)

 **Unencrypted HTTP is effectively gone**
From ~80% HTTPS in 2020 to 99%+ in 2026

HTTPS Adoption Over Time

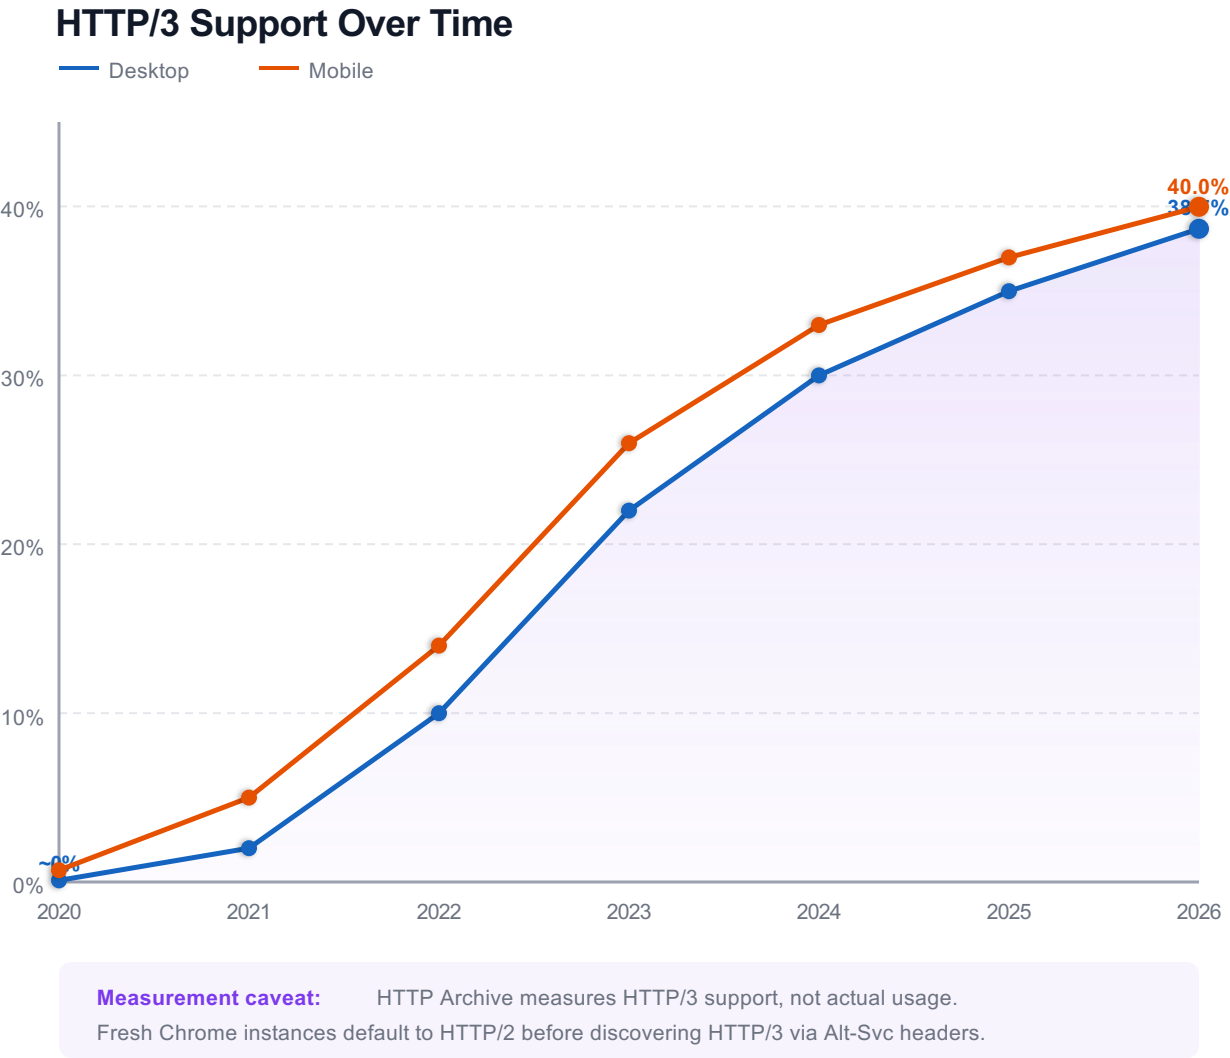

HTTP/3 is the fastest-growing protocol metric, from near-zero to ~40% support

Current Protocol Adoption

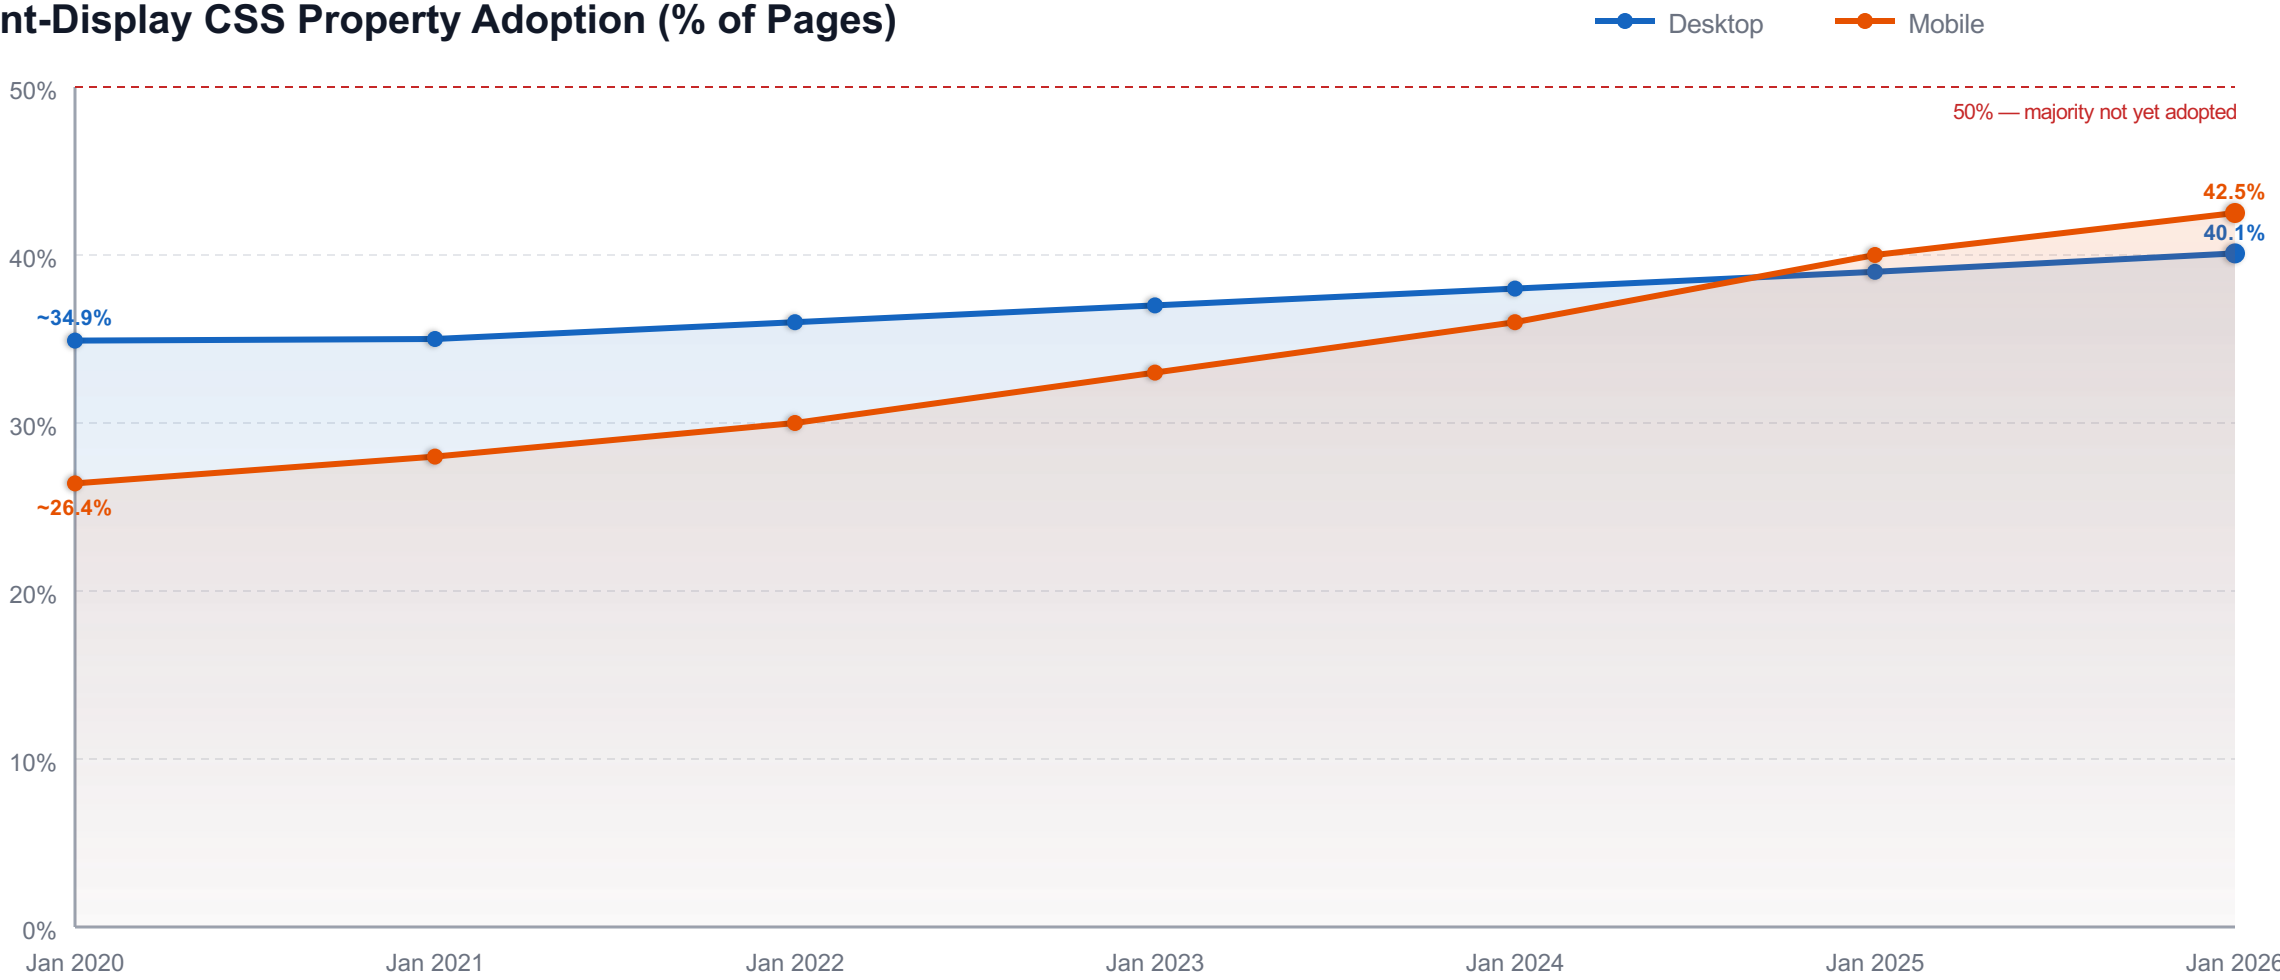

HTTP/3 Support Over Time

Over half of pages still risk FOIT — font-display adoption has room to grow

Font-Display CSS Property Adoption (% of Pages)

FOIT = Flash of Invisible Text
font-display CSS property prevents invisible text during web font loading

Desktop Growth
+14.9% since 2020

Mobile Growth
+61.0% since 2020

~58% of pages
still risk FOIT

Key Takeaways

Page weight keeps climbing

Median desktop pages now transfer ~2,000 KB — roughly 25% heavier than in 2020, driven by richer media and JavaScript.

HTTPS is the new baseline

At 99%+ of requests, unencrypted HTTP is essentially extinct on the modern web. Desktop: 99.2%, Mobile: 99.1%.

HTTP/3 is the fastest-growing protocol metric

From near-zero to ~40% support in under four years, HTTP/3 is rapidly becoming mainstream. Desktop: 38.7%, Mobile: 40.0%.

Fewer TCP connections despite more requests

Multiplexing in HTTP/2 and HTTP/3 has cut median connections per page by 15–27%, improving network efficiency.

Font-display still underused

At ~40–42% adoption, there is significant room for improvement. Over half of pages still risk Flash of Invisible Text.
