AUDIENCE

Web Performance Engineers

DATE

April 2026

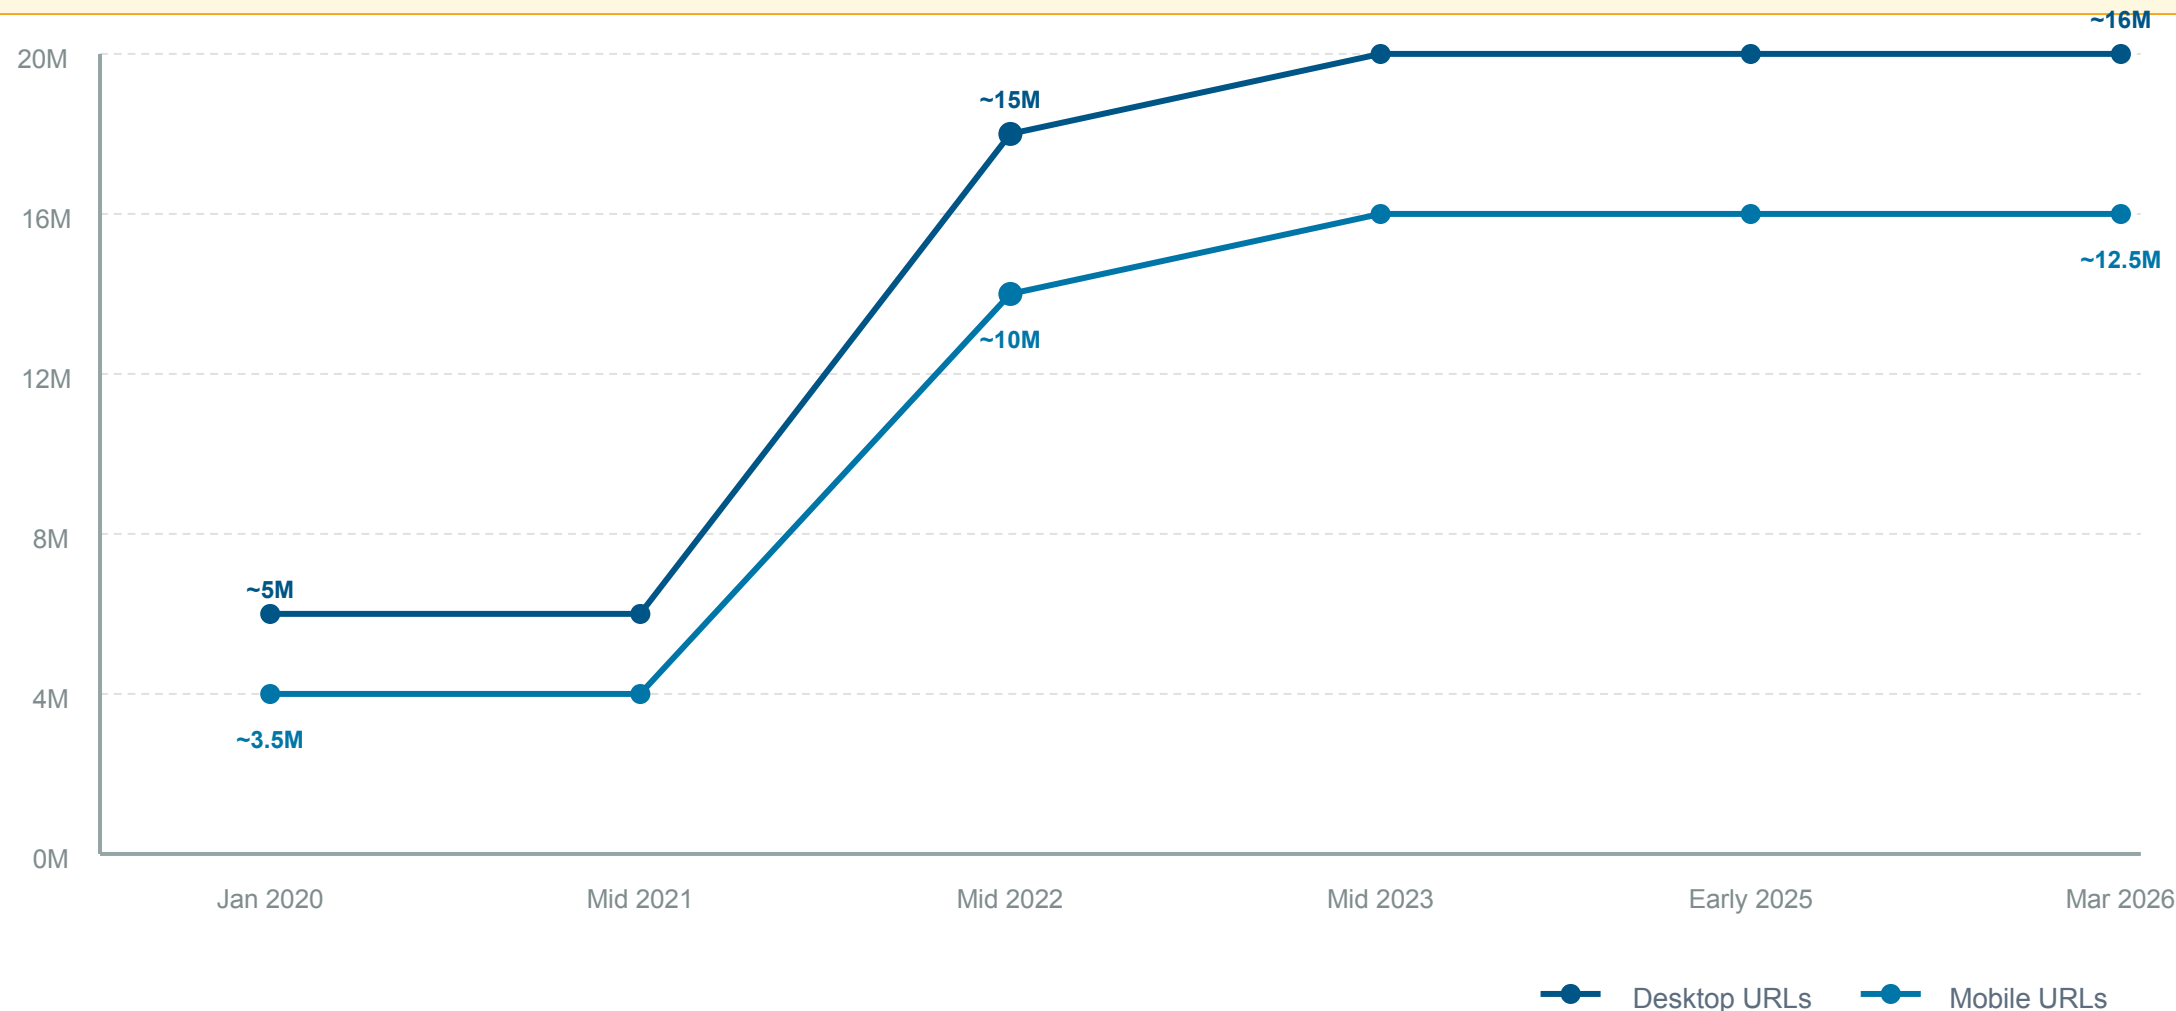

CONFIDENTIAL

Crawl Sample Size Tripled: From ~5M to 16M Desktop URLs Since 2020

Sample Size

KEY INSIGHT

HTTP Archive now crawls ~28.5M URLs combined, up from ~8.5M in early 2020 — a 3.3× expansion in coverage.

Median Page Weight Climbs Steadily to ~2,000 KB on Desktop

Page Weight

KEY INSIGHT

Desktop pages are ~25% heavier than in 2020. The 75th-percentile page now exceeds 4,000 KB.

Source: HTTP Archive — State of the Web Report (<https://httparchive.org/reports/state-of-the-web>)

KEY INSIGHT

Multiplexing in HTTP/2 and HTTP/3 has cut median TCP connections per page by 15–27% despite rising request counts.

Total Requests per Page (Median)

Desktop

76

▲ 2.7%

Mobile

71

▲ 2.9%

TCP Connections per Page (Median)

Desktop

12.0

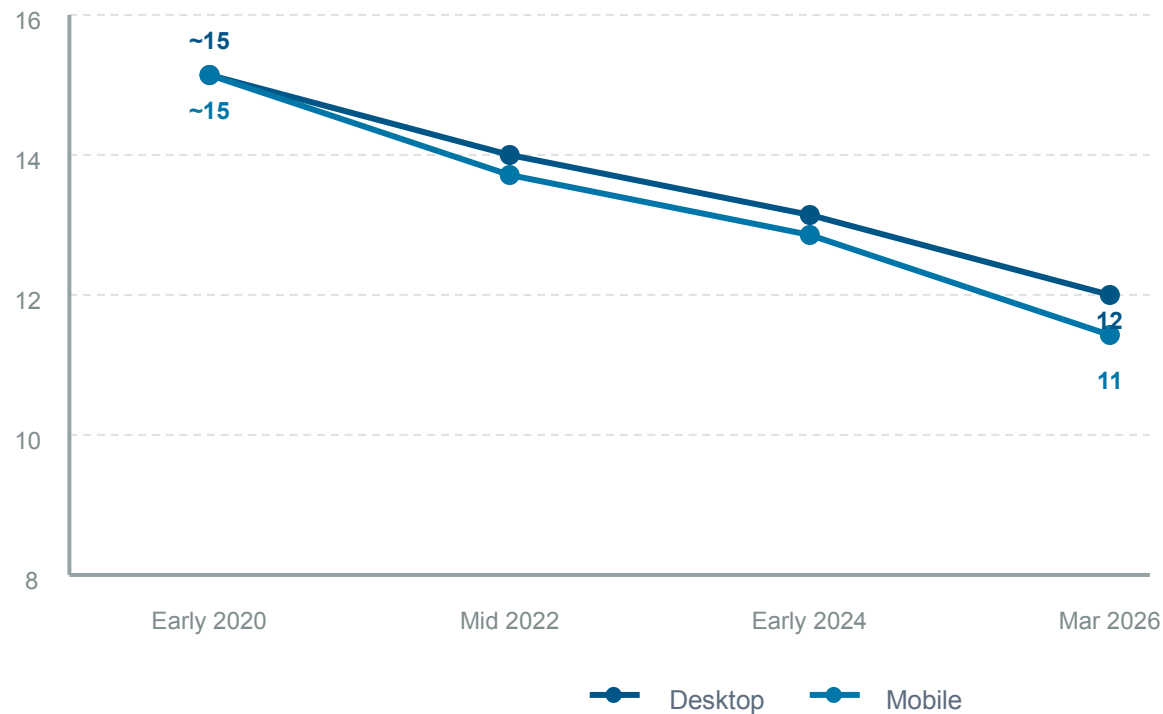

▼ 14.3%

Mobile

11.0

▼ 26.7%

TCP Connections Trend (Declining)

KEY INSIGHT

From ~80% in early 2020 to 99.2% desktop / 99.1% mobile — the web has achieved near-total encryption.

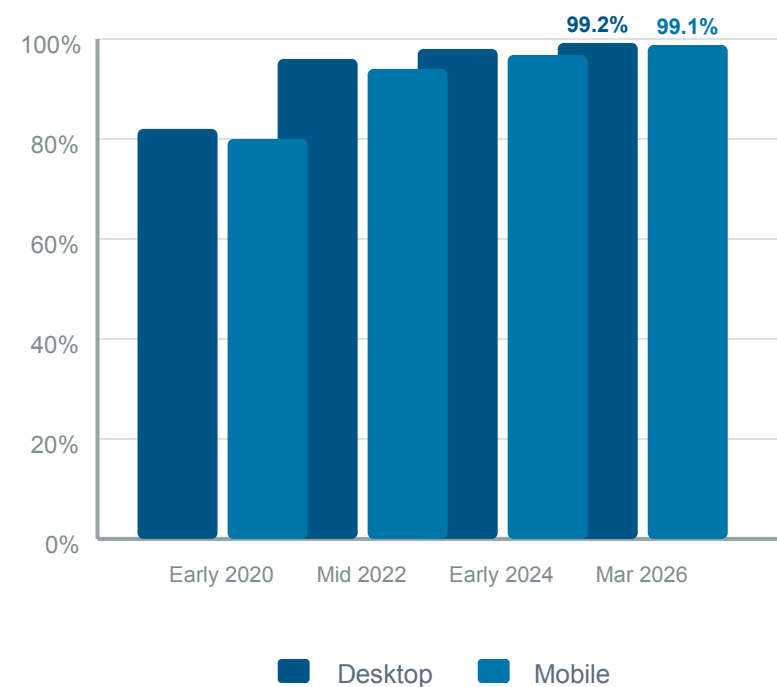

Desktop Pages on HTTPS

99.2%

Mobile Pages on HTTPS

99.1%

HTTPS Adoption Timeline

KEY INSIGHT

HTTP/3 is now the fastest-growing protocol, reaching 38.7% desktop / 40.0% mobile adoption — a remarkable rise from near-zero in 2020.

HTTP/2 — Desktop

58.6%

HTTP/2 — Mobile

57.6%

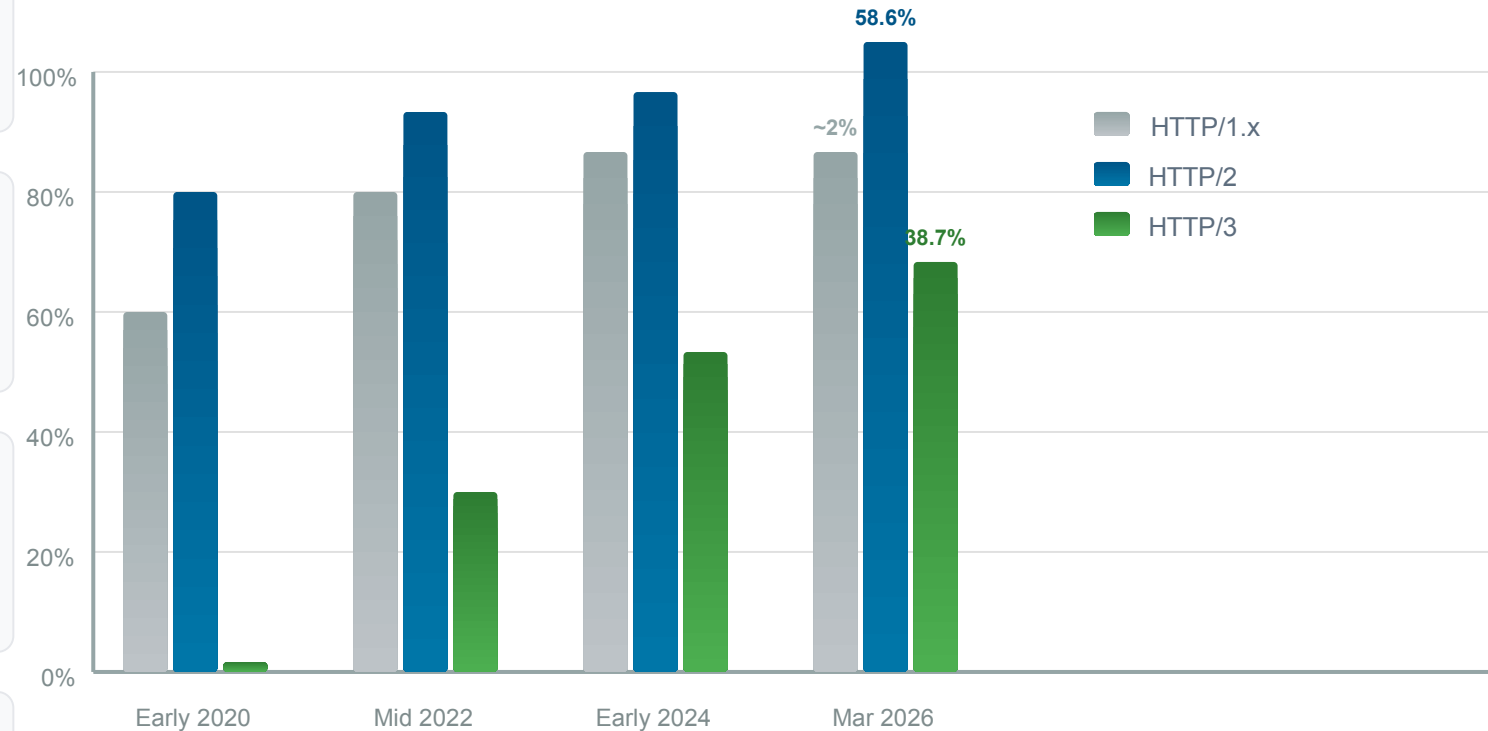

HTTP/3 — Desktop

38.7%

HTTP/3 — Mobile

40.0%

Protocol Adoption by Year (% of Pages)

KEY INSIGHT

Mobile adoption grew 61.0% since 2020 — faster than desktop at 14.9% — as developers prioritize perceived performance on constrained devices.

Desktop font-display

40.1%

Mobile font-display

42.5%

Growth Since 2020

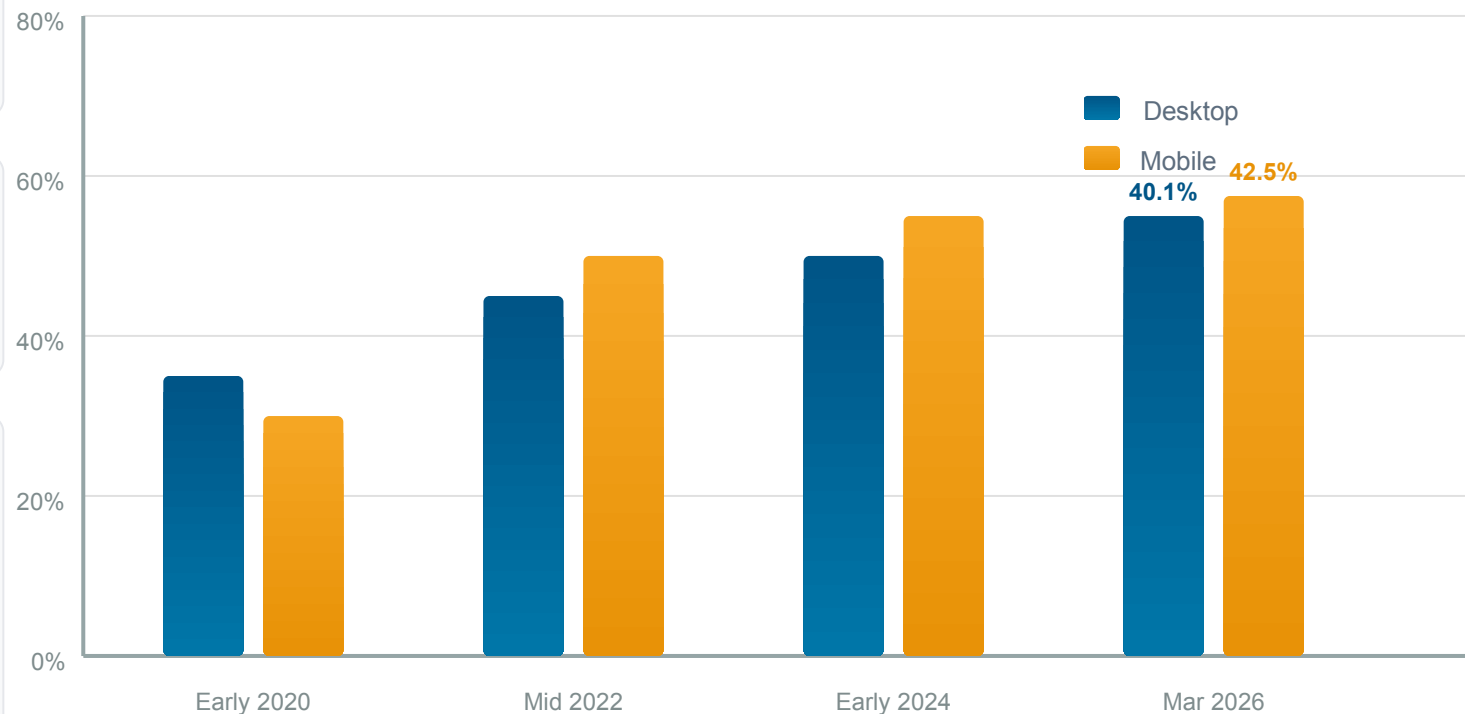

Desktop

Mobile

font-display Adoption Over Time

KEY INSIGHT

Six years of data reveal a web that is larger, heavier, more secure, and more efficient — but performance remains a challenge.

Crawl Sample Has Tripled

Desktop URLs grew from 5M to 16M; mobile from 3.5M to 12.5M.
The dataset is now 3× richer, enabling more reliable trend analysis.

Pages Are Getting Heavier

Median desktop page weight rose ~25% to ~2,000 KB.
The 75th-percentile page now exceeds 4,000 KB — a performance risk.

Security Is Near-Universal

HTTPS adoption reached 99.2% (desktop) and 99.1% (mobile).
HTTP/3 rose from near-zero to ~39%, complementing HTTP/2 at ~58%.

Efficiency Gains Offset Growth

TCP connections dropped 14–27% thanks to HTTP/2 and HTTP/3 multiplexing.
font-display adoption surged 15–61%, improving perceived font loading.

Implications for Web Developers

- Monitor page weight budgets — median pages are approaching 2 MB and growing
- Adopt HTTP/3 and font-display to improve delivery efficiency and perceived performance
