This Week's Top 10 Models

Rank	Model	Provider	Weekly Tokens	WoW Change
1	MiMo-V2-Pro	Xiaomi	3.96T	+165%
2	Step 3.5 Flash (free)	Stepfun	1.49T	+1%
3	MiniMax M2.7	MiniMax	1.29T	+253%
4	DeepSeek V3.2	DeepSeek	1.24T	+9%
5	Claude Sonnet 4.6	Anthropic	1.04T	-0%
6	Claude Opus 4.6	Anthropic	995B	+2%
7	Gemini 3 Flash Preview	Google	972B	+3%
8	GLM 5 Turbo	Zhipu (z-ai)	968B	-6%
9	MiniMax M2.5	MiniMax	909B	-30%
10	Grok 4.1 Fast	x-ai	599B	+32%

Key Insight: Chinese providers hold 6 of the top 10 spots. Xiaomi's MiMo-V2-Pro leads by a wide margin at 3.96T tokens (+165%). MiniMax M2.7 posted the strongest growth at +253% WoW.

Provider Market Share Breakdown

Xiaomi leads at 25.9% — more than double Google's 11.8%

Combined Chinese share: 54.3% — exceeds half the market

OpenAI ranks 5th — at only 7.9%

Highly fragmented — no provider exceeds 30%

Chinese Providers Combined

Xiaomi + MiniMax + Stepfun + DeepSeek + Zhipu = 54.3% of total token volume

Shifts in the Market Landscape

1

Chinese Models Break Through

On OpenRouter, an international platform, Chinese provider models now account for over 54% of all usage. Xiaomi's MiMo series, DeepSeek V3, and MiniMax's M2 series hold a significant cost-performance advantage.

2

Anthropic Growth Has Stalled

Despite maintaining two models in the top 10 (Sonnet 4.6 and Opus 4.6), Anthropic's combined ~2T tokens show flat WoW growth (-0% and +2%). The competitive pressure from Chinese providers is intensifying.

3

Flash/Turbo > Flagship Models

Step 3.5 Flash, GLM 5 Turbo, Gemini 3 Flash, and Grok 4.1 Fast — "fast and affordable" variants see far higher usage than their flagship counterparts. Users vote with their feet: speed and cost often outweigh peak performance.

Market Growth Trajectory

Weekly token usage on OpenRouter has grown from ~2T to ~26T over the past year — a 13x increase. This explosive growth underscores the rapidly expanding LLM market and the fierce competition among providers to capture a share of this booming demand.

This Week's Rising Stars: Fastest-Growing Models

WoW Growth %

MiniMax M2.7 (+253%)

A major model upgrade drove massive adoption, propelling MiniMax into the top 3 by token volume.

MiMo-V2-Pro (+165%)

Xiaomi's cost-competitive flagship surged to #1 overall, suggesting strong product-market fit on the platform.

Cline (+128%)

This autonomous coding agent's growth reflects the broader trend of AI coding tools dominating LLM consumption.

Ampere (+576%)

The highest growth rate in the dataset — a newer entrant rapidly gaining traction.

App Ecosystem: Who's Calling These Models

Daily Tokens (B)

Coding Agents Dominate

- 5 of the top 10 apps are AI coding tools — the single largest LLM consumption scenario.
- OpenClaw alone consumes 829B tokens/day — nearly 3x the second-place app.
- The top 4 apps (OpenClaw, Kilo Code, Claude Code, Cline) are all AI coding assistants.
- Entertainment/roleplay apps (Janitor AI, ISEKAI ZERO) still hold a notable presence.

Key Insights and Industry Implications

01 Chinese Models Now Dominate the Global Market

Chinese providers hold 54.3% combined market share on an international platform, with 6 of the top 10 models. This signals a fundamental shift in the competitive landscape that R&D and investment strategies must account for.

02 AI Coding Agents Are the #1 LLM Consumption Scenario

5 of the top 10 apps are coding tools. The largest commercial value proposition for LLMs today is helping developers write code — product strategies should prioritize this use case.

03 The Model Market Is Highly Fragmented

No single model or provider monopolizes the market. The top 10 spans 8 different providers, with no provider exceeding 30% share. Competition remains fierce and the landscape is far from settled.

04 Fast & Affordable Beats Flagship

Flash/Turbo variants far outpace flagship models in real-world usage. Users are voting with their feet — speed and cost-effectiveness are stronger drivers of adoption than peak benchmark performance.
