

The 2025 LLM Usage Landscape

Real-World Data from OpenRouter

Over 26T tokens processed this week

This Week's Top 10 Models

Chinese providers hold 6 of top 10 spots; Xiaomi leads by wide margin at 3.96T tokens

Provider Market Share Breakdown

Combined Chinese provider share exceeds 54% — no single provider dominates

Key: Chinese providers (Xiaomi+MiniMax+Stepfun+DeepSeek+Zhipu) = 54.3%

Shifts in the Market Landscape

This Week's Rising Stars: Fastest-Growing Models

MiniMax M2.7 leads at +253% WoW; AI coding agents are driving new demand surges

MiniMax M2.7: +253%
Surging on cost-performance advantage. M2.5 declining (-30%) as users shift to the newer M2.7 model.

MiMo-V2-Pro: +165%
New entry dominating both volume (3.96T tokens) and growth rate. Xiaomi's cost-efficiency strategy pays off.

Cline: +128%
AI coding agents are driving LLM consumption growth. Cline, an autonomous coding agent, leads demand.

App Ecosystem: Who's Calling These Models

AI coding assistants dominate LLM consumption — top 4 apps are all developer tools

AI Coding Agents Dominate

The top 4 apps are all AI coding tools: OpenClaw, Kilo Code, Claude Code, and Cline — signaling that developer productivity is the #1 use case for LLMs.

OpenClaw: 829B Tokens/Day

Nearly 3x the second-place app.
AI productivity assistant — "The AI that actually does things" — massive adoption.

Entertainment Still Notable

Janitor AI (roleplay chat) and ISEKAI ZERO (AI adventure game) hold notable positions at 29.2B and 28.8B/day.

Key Insights and Industry Implications

01 Chinese Models Hold Dominant Global Share

Chinese providers now command over 54% of token volume on OpenRouter, an international platform — signaling a fundamental shift in the competitive landscape.

54.3% combined share

02 AI Coding Agents Are the Largest Consumption Scenario

The top 4 apps by token volume are all coding tools. Developer productivity has emerged as the single largest commercial value proposition for LLMs.

5 of top 10 apps are coding tools

03 Highly Fragmented Market With No Outright Winner

The top 10 models span 8 different providers. No single provider exceeds 30% market share. Competition remains fierce and the landscape is far from settled.

8 providers in top 10, no monopoly

04 Affordable Models Far Outpace Flagships in Usage

Flash and Turbo variants consistently see higher usage than flagship models. In real-world applications, speed and cost often matter more than peak performance.

Users vote for speed + affordability
