

2024 JavaScript Rising Stars

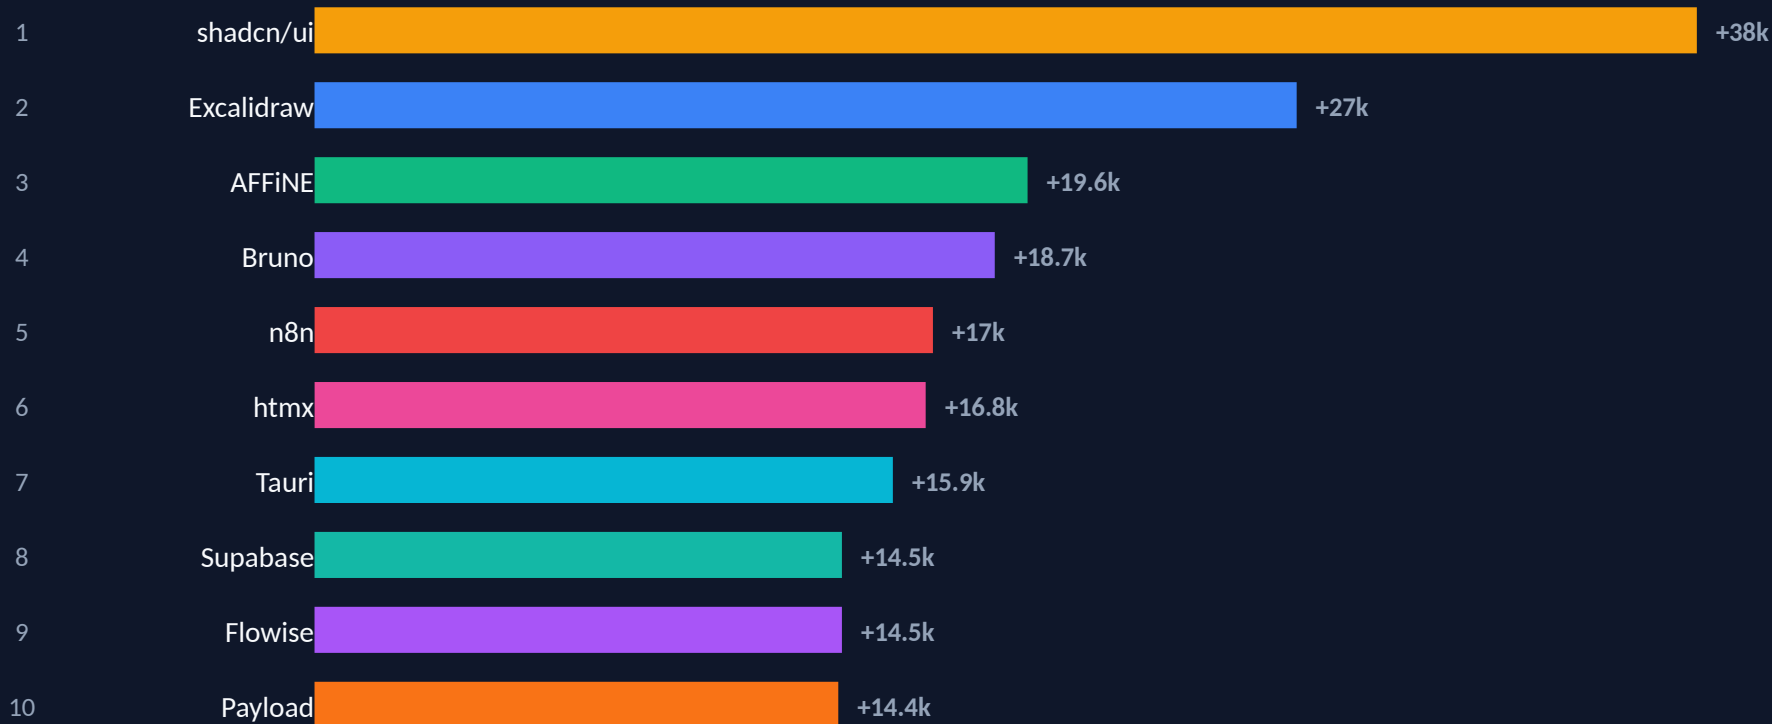

Top Projects and Ecosystem Shifts

9th Edition | Based on GitHub stars added in 2024 | Curated by Best of JS

For frontend engineers & engineering managers

Overall Top 10: Most GitHub Stars Added in 2024

shadcn/ui leads with +38k — nearly 10k ahead of #2

Source: JavaScript Rising Stars 2024 (risingstars.js.org)

shadcn/ui: Back-to-Back Champion

Copy-paste components win for the second consecutive year

Key 2024 Additions

-  **Charts** Powered by Recharts
-  **Themes** CSS variable generation
-  **Blocks** Layout collections for web apps
-  **Sidebar** New responsive component
-  **CLI** Multi-framework: Next.js, Remix, Vite, Laravel

Why It Works

Own Your Code

Copy-paste model gives developers full ownership and customization control over components.

Registry Ecosystem

CLI supports importing from any compatible registry, spawning libraries like Motion-Primitives and Magic UI.

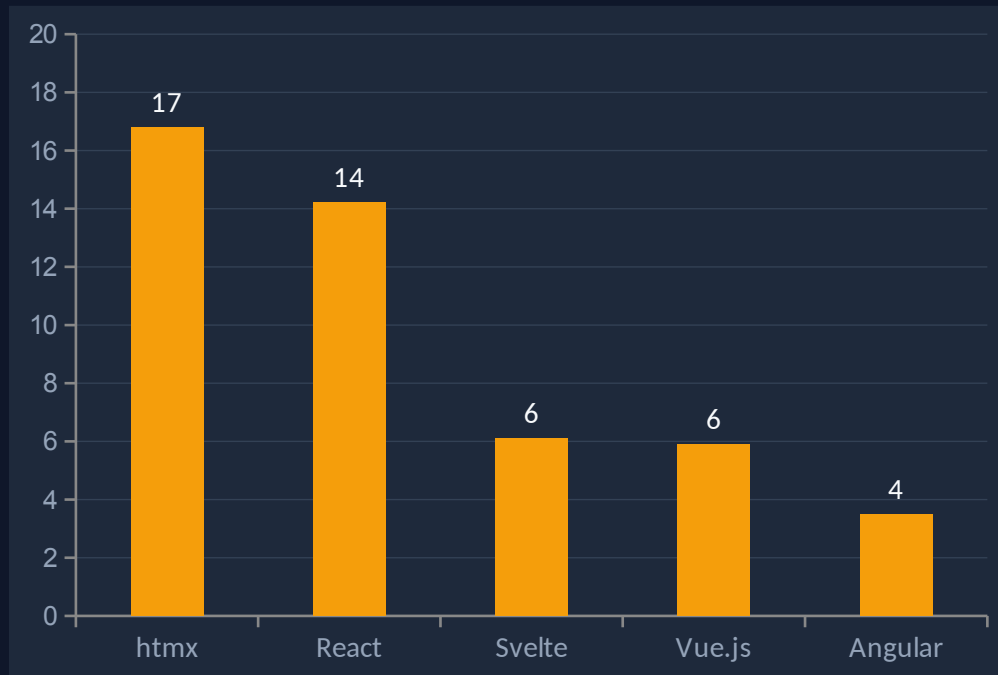

AI Integration

Vercel's v0 generates shadcn/ui components via AI, driving further adoption.

Frontend Frameworks: htmx Overtakes React

Stars added in 2024 — htmx rises from #2 to #1

htmx: HTML-First

Extends HTML with `hx-*` attributes for AJAX, WebSockets — no JavaScript needed. Ideal for server-driven apps.

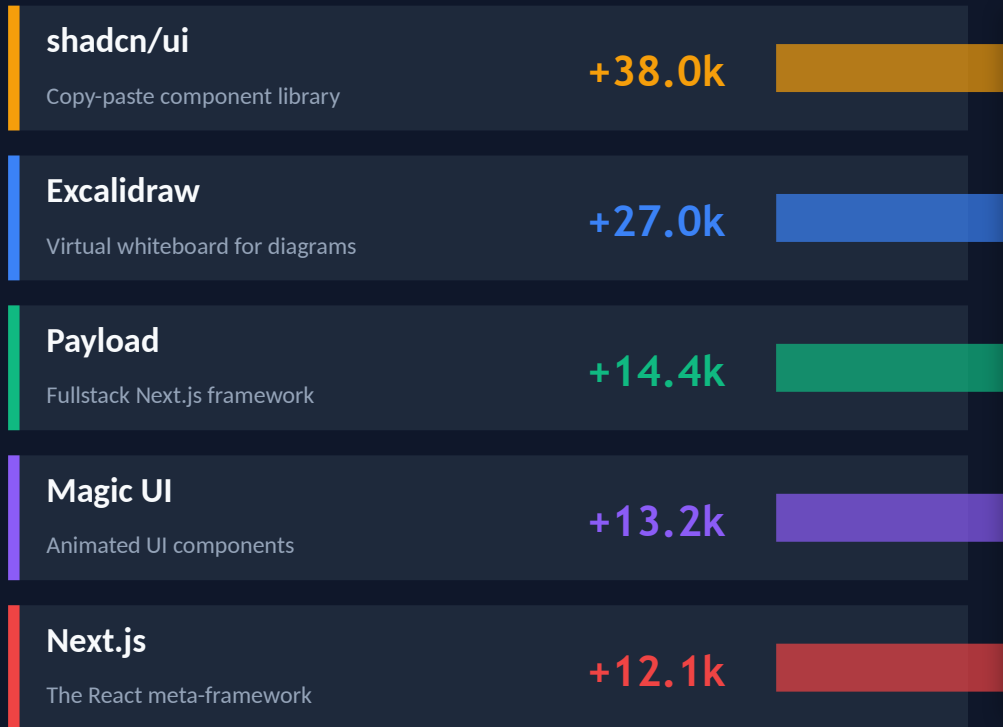

React 19

After 3 years: Server Components, Server Functions, Custom Elements, new hooks. React is evolving from a library into a specification for frameworks.

Svelte 5 introduced "runes" — highest positive opinion in State of JS survey

React Ecosystem: Top 5 by Stars Added

React's evolution toward a full-stack framework specification

React as a Specification

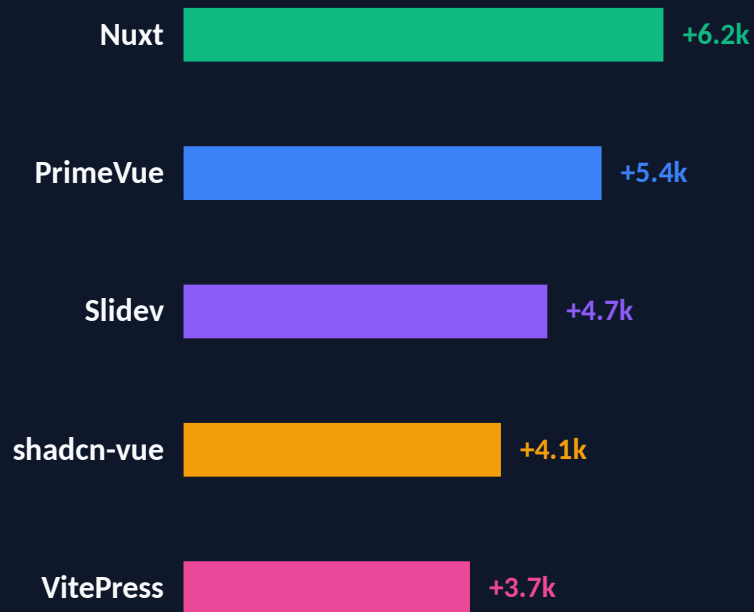

React 19 shipped Server Components and Server Functions, transforming React from a UI library into a specification that frameworks interpret differently.

Next.js, Remix, and others now implement React's primitives with distinct approaches — making React itself more of a protocol.

The React Compiler continues development to automatically optimize re-renders and improve DX.

Vue Ecosystem: Maturing with Confidence

A wave of UI libraries and Vue 3.5's reactivity overhaul signal ecosystem strength

Vue 3.5 Highlights

- Reworked reactivity system
 - alien-signals approach landed in main branch — lighter and faster
- UI library boom
 - PrimeVue, shadcn-vue signal growing ecosystem confidence
- Active release cycle
 - Regular performance improvements (Daniel Roe, Nuxt lead)

Emerging Themes Shaping 2024

AI tools, desktop apps, and browser-based innovation dominate

AI-Powered Tools

n8n +17.0k

Workflow automation with native AI

Flowise +14.5k

Visual LLM flow builder

Supabase +14.5k

Open-source BaaS with AI

AFFiNE +19.6k

AI-powered knowledge base

Desktop & Mobile

Tauri +15.9k

Lighter Electron alternative

Excalidraw +27.0k

Whiteboard app

Bruno +18.7k

API testing IDE

Browser Innovation

PGLite

Postgres via WebAssembly

WebVM

VM running in browser

htmx +16.8k

HTML-first interactivity

Key Takeaways: What 2024 Tells Us

Actionable insights for JavaScript in 2025 and beyond

1

Component ownership beats imports

shadcn/ui's copy-paste model proved its staying power for a second year, reaching 77.5k total stars. Consider adopting similar ownership patterns in your design systems.

2

HTML-first is serious

htmx overtook React as #1 framework by stars added, validating server-driven, low-JavaScript architectures. Evaluate htmx for content-heavy and progressive enhancement use cases.

3

React is becoming a framework spec

With Server Components and Server Functions in React 19, frameworks now interpret React's primitives differently. Choose your React framework deliberately — they're no longer interchangeable.

4

AI integration is table stakes

4 of the top 10 projects have significant AI capabilities. If your tooling doesn't have an AI story, you're falling behind.

5

Vue's ecosystem signals maturity

A wave of quality UI libraries and the Vue 3.5 reactivity overhaul show a confident ecosystem. Vue is a strong bet for new projects in 2025.
