Key Takeaways: What 2024 Tells Us About JavaScript's Future

Actionable insights heading into 2025

01

Component ownership beats imports

shadcn/ui's copy-paste model reached 77.5k total stars — developers want control, not black-box dependencies.

02

HTML-first is serious

htmx overtook React in stars added, validating server-driven, low-JavaScript architectures for production apps.

03

React is becoming a framework spec

With Server Components and Server Functions in React 19, frameworks (Next.js, Remix) now interpret React differently.

04

AI integration is table stakes

Four of the top 10 projects embed AI deeply. Expect AI-native features as baseline for new developer tools.

05

Vue's UI library wave signals maturity

PrimeVue, shadcn-vue, and the Vue 3.5 reactivity overhaul show a confident, growing ecosystem.
