

2024 JavaScript Rising Stars

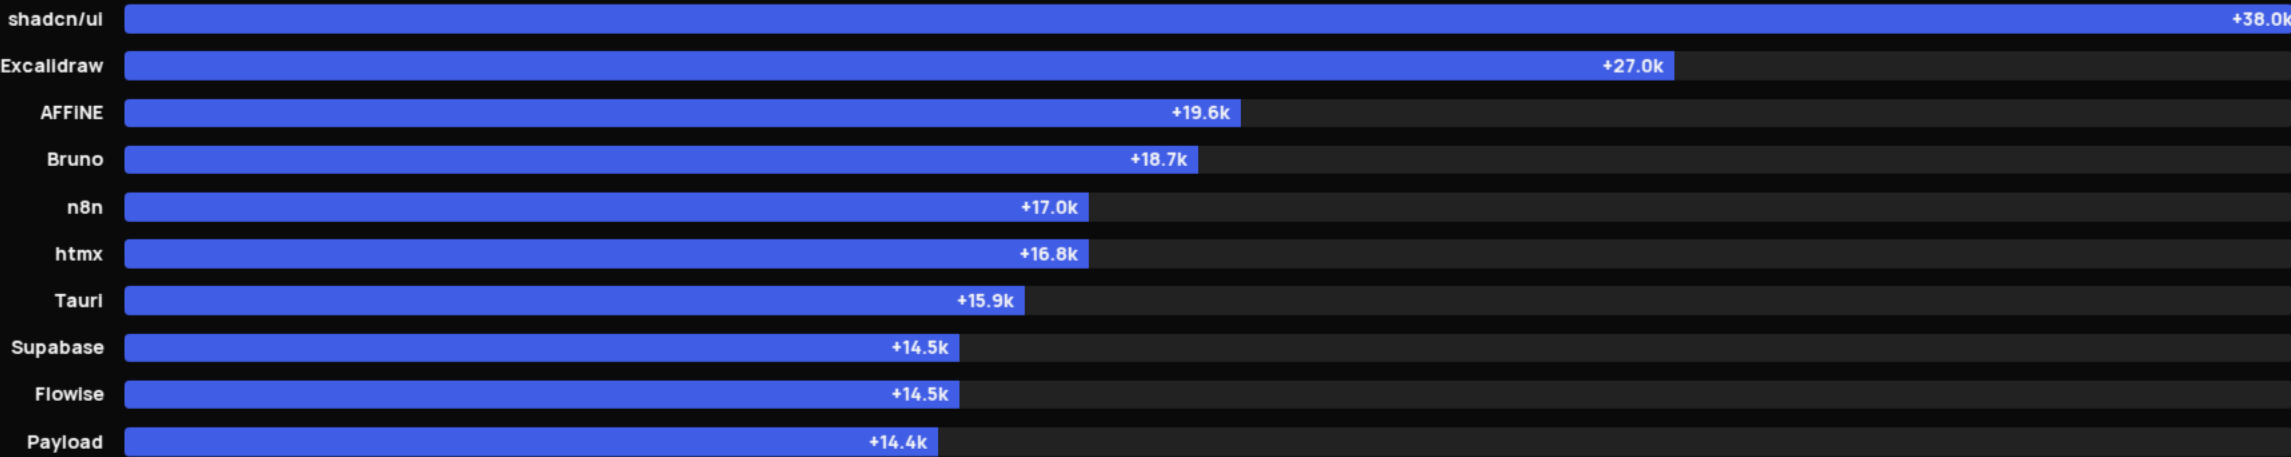

The Year's Hottest Projects by GitHub Stars

9th Edition

Based on GitHub stars added in 2024 from the Best of JS curated list.

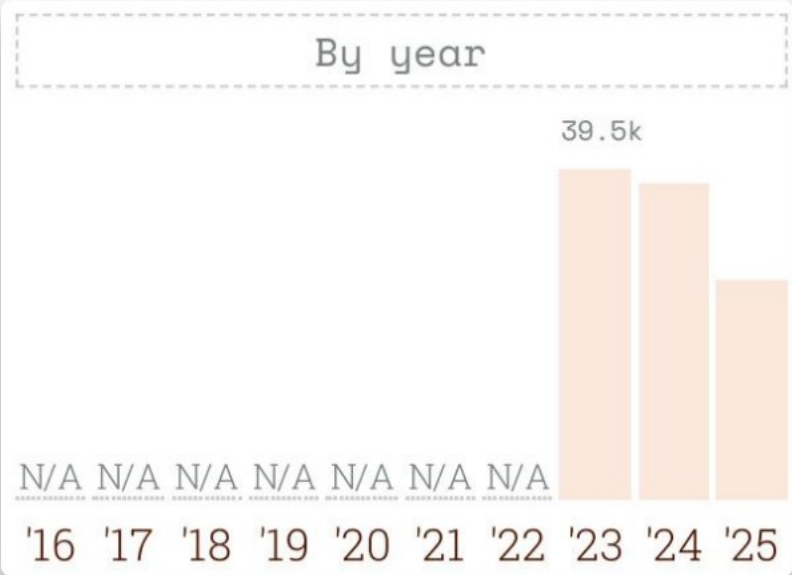

Overall Top 10 Most Popular

shadcn/ui leads with a massive gap over the rest.

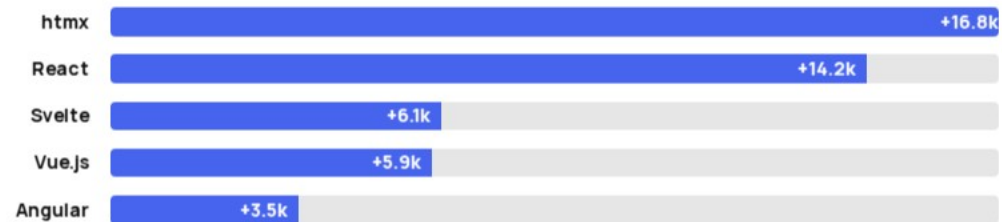

shadcn/ui: Back-to-Back Champion

- **Copy-Paste Win:** Letting developers own component code proved its staying power.
- **Growth:** 39.5k in 2023, 38.0k in 2024.
- **2024 Additions:** Charts, Themes, Blocks, responsive sidebar.
- **Ecosystem:** New CLI supports Next.js, Remix, Vite, Laravel.

Front-end Frameworks

htmx overtakes React as the #1 framework by stars added.

htmx Philosophy

Extends HTML with `hx-*` attributes to enable data fetching without writing JS. Validates server-driven architectures.

React 19

React is evolving from a library into "a specification for frameworks" with Server Components and Functions.

React Ecosystem Dominance

React evolves toward a full-stack framework specification.
