React Ecosystem: shadcn/ui, Excalidraw, and Payload Dominate

React as a Specification

React 19 introduced Server Components and Server Functions, making React evolve from a library into *"a specification for frameworks."*

Multiple frameworks (Next.js, Remix, etc.) now interpret React's primitives differently while still allowing client-only usage.

Key Takeaways: What 2024 Tells Us About JavaScript's Future

1

Component ownership beats imports

shadcn/ui's copy-paste model proved its staying power for a second year, reaching 77.5k total stars.

2

HTML-first is serious

htmx overtook React as the #1 front-end framework by stars added, validating server-driven architectures.

3

React is becoming a framework spec

Server Components and Server Functions make React more of a specification than a standalone library.

4

AI integration is table stakes

4 of the top 10 overall projects (n8n, Flowise, Supabase, AFFiNE) have significant AI capabilities.

5

Vue's ecosystem maturity

A wave of high-quality UI libraries and the Vue 3.5 reactivity overhaul signal a confident ecosystem.
