OVERALL TOP 10 PROJECTS

shadcn/ui Dominates with +38k Stars

Most starred JavaScript projects on GitHub in 2024 — star count = stars added this year

shadcn/ui: Back-to-Back Champion

Why it won — again

- **Component ownership model** — Developers copy-paste & own component code — not just import
- **CLI ecosystem expansion** — Supports Next.js, Remix, Vite, Laravel, and monorepos
- **AI integration** — Deep v0 service integration for AI-generated components
- **Rich feature additions** — Charts, Themes, Blocks, Sidebar — all in one year

Year-over-Year Star Gains

2023 +39.5k

2024 +38.0k

77.5k total stars

Created Jan 2023 | Sustained momentum across two consecutive years

htmx Overtakes React as #1 by Stars Added

Stars added in 2024 — a ranking shakeup driven by HTML-first philosophy

htmx #1

HTML extensions — no JS required for AJAX/WebSockets

React #2

React 19 launched Dec: Server Components + Server Functions

Svelte #3

Runes mode introduced; highest positive opinion in State of JS

Vue.js #4

Vue 3.5 reactivity rework with alien-signals approach

Angular #5

Steady growth; Signals pattern now native

React Ecosystem: shadcn/ui, Excalidraw & Payload Lead

React is evolving from library → framework specification

React 19 marks a turning point

Server Components & Server Functions land in production. Multiple frameworks (Next.js, Remix) now interpret React's primitives differently — making React more a specification than a standalone library.

Vue Ecosystem: Nuxt, PrimeVue & Slidev Lead Growth

Vue 3.5 reactivity rework + wave of high-quality UI libraries signal confident maturity

Vue 3.5 alien-signals landing

The lighter alien-signals reactivity approach is already in main branch. Daniel Roe (Nuxt core) highlighted active release cycles and regular performance improvements as ecosystem drivers.

AI Tools, Desktop Apps & Browser Innovation

Four of the top-10 overall projects have significant AI capabilities

AI-Powered Workflows

n8n +17.0k

Flowise +14.5k

Supabase +14.5k

Desktop via Tauri

Tauri +15.9k

Browser Innovation

PGlite — Postgres in WASM —

WebVM — Browser VM —

BaaS Backends

Supabase +14.5k

Payload CMS +14.4k

Key Takeaways: What 2024 Tells Us

1. Component ownership beats imports

shadcn/ui's copy-paste model sustains extraordinary momentum — now at 77.5k stars.

2. HTML-first approaches gain serious traction

htmx overtakes React as #1 framework by stars added — server-driven, low-JS architectures validated.

3. React is becoming a framework specification

Server Components & Server Functions in React 19 mean multiple frameworks now interpret React differently.

4. AI integration is table stakes

4 of the top-10 overall projects have significant AI capabilities — Flowise, n8n, Supabase, AFFiNE.

5. Vue ecosystem signals confident maturity

Wave of high-quality UI libraries + Vue 3.5 alien-signals rework indicate a confident, maturing ecosystem.
