Key Takeaways: What 2024 Tells Us About JavaScript's Future

Component ownership beats imports: shadcn/ui's copy-paste model proved its staying power for a second year, reaching 77.5k total stars

HTML-first is serious: htmx overtook React as #1 front-end framework by stars added, validating server-driven, low-JavaScript architectures

React is becoming a framework spec: Server Components and Server Functions in React 19 make React more specification than library

AI integration is table stakes: Four of the top 10 projects (n8n, Flowise, Supabase, AFFiNE) have significant AI capabilities

Vue's ecosystem maturity: Wave of high-quality UI libraries and Vue 3.5 reactivity overhaul signal growing ecosystem confidence

Looking ahead to 2025: Expect continued HTML-first experimentation, AI-native tooling proliferation, and browser as a true platform.
